The history of Prime Task, Inc (Prime Task) goes back more than 10 years. Our first customer was Kowloon-Canton Railroad Corporation (KCRC), which was building a new railroad and need a training system to prepare and certify its operational personnel. Prime Task was subcontracted by Booz Allen Hamilton to architect, design and develop simulation and training system, which seamlessly integrated the simulators developed by Mitsubishi (train cab), Alcatel (main control system), and Siemens (electrical control system). While working on the KCRC project (successfully completed in 2004), Prime Task expanded to serve other international clients (e.g., UN, The World Bank, UNICEF), US Government (e.g., IRS, FBI, DOJ), major corporations (e.g., Booz-Allen, Northrop Grumman, IBM, Halliburton, SunTrust Bank), and some a large and small not-for-profit clients (e.g., The Andrei Sakharov Foundation).

Between 2005 and 2009, following a strategic acquisition by Advanced Language Systems International (ALSI), Prime Task operated as an IT Division of ALSI, supporting both its own clients as well as ALSI's language services clients. During that time Prime Task developed Language Proficiency Testing Systems (LPTS), a tool for efficient, objective, and automated testing of proficiency in different languages, and a number of specialized Computer-Based Training (CBT) modules as refresher courses for several languages. The first

version of LPTS was tailored for the IRS and was delivered for operational use in 2006; it is presently used to certify IRS reviewers/editors for foreign language publications. If you are interested in off-the-shelf or custom-developed LPTS or CBT modules, please, contact us with any questions.

Prior to their joining Prime Task and ALSI were working together on a number of innovative products that utilized the synergy between their respective IT and linguistic expertise to develop systems for intelligence gathering and analysis. As part of ALSI, Prime Task continued developing these and other products and providing high quality IT and Language services to a wide and growing base of Government and commercial clients.

The 2009 re-structuring ended with the separation of Prime Task from ALSI so that it is again operating as an independent company.

The IT services provided by Prime Task include system engineering, architecture definition, requirements analysis, application development, business process analysis and design, data architecture.

Prime Task services are available to the US Government as well as state and local governments under GSA contract #GS-35F-0420-T.

## INFORMATION FOR ORDERING ACTIVITIES APPLICABLE TO ALL SPECIAL ITEM NUMBERS

### SPECIAL NOTICE TO AGENCIES: Small Business Participation

SBA strongly supports the participation of small business concerns in the Federal Acquisition Service. To enhance Small Business Participation SBA policy allows agencies to include in their procurement base and goals, the dollar value of orders expected to be placed against the Federal Supply Schedules, and to report accomplishments against these goals.

For orders exceeding the micropurchase threshold, FAR 8.404 requires agencies to consider the catalogs/pricelists of at least three schedule contractors or consider reasonably available information by using the GSA Advantage!™ on-line shopping service ([www.gsaadvantage.gov](http://www.gsaadvantage.gov)). The catalogs/pricelists, GSA Advantage!™ and the Federal Acquisition Service Home Page ([www.fss.gsa.gov](http://www.fss.gsa.gov)) contain information on a broad array of products and services offered by small business concerns.

This information should be used as a tool to assist ordering activities in meeting or exceeding established small business goals. It should also be used as a tool to assist in including small, small disadvantaged, and women-owned small businesses among those considered when selecting pricelists for a best value determination.

For orders exceeding the micropurchase threshold, customers are to give preference to small business concerns when two or more items at the same delivered price will satisfy their requirement.
