SPECIAL NOTICE TO AGENCIES: Small Business Participation

SBA strongly supports the participation of small business concerns in the Federal Acquisition Service. To enhance Small Business Participation SBA policy allows agencies to include in their procurement base and goals, the dollar value of orders expected to be placed against the Federal Supply Schedules, and to report accomplishments against these goals.

For orders exceeding the micropurchase threshold, FAR 8.404 requires agencies to consider the catalogs/pricelists of at least three schedule contractors or consider reasonably available information by using the GSA Advantage!™ on-line shopping service (www.fss.gsa.gov). The catalogs/pricelists, GSA Advantage!™ and the Federal Acquisition Service Home Page (www.fss.gsa.gov) contain information on a broad array of products and services offered by small business concerns.

This information should be used as a tool to assist ordering activities in meeting or exceeding established small business goals. It should also be used as a tool to assist in including small, small disadvantaged, and women-owned small businesses among those considered when selecting pricelists for a best value determination.

For orders exceeding the micropurchase threshold, customers are to give preference to small business concerns when two or more items at the same delivered price will satisfy their requirement.

GSA Ordering process options for Contract # GS-35-0438L

The manufacturer holds the GSA contract for Rauland-Borg Products. Based on the contract and items submitted to GSA, authorized distributors are able to invoice directly with the customer. Based on the customers relationship and management of the GSA program there are two payment options available to Rauland-Borg GSA customers.

In either option the customer should work with an authorized Rauland-Borg Distributor to discuss system questions including; type appropriate for them, configuration, technical, features, installation, maintenance, and price.

Option 1: Processed directly with the distributor. A clear division on the PO (Purchase Order) must be made between:

- Rauland-Borg items
- Items not on the Rauland GSA contract. Examples: wire and labor.

Or have separate PO for each of the above mentioned items

Customers, when reporting sales against GSA contract number GS-35-0438L please only report Rauland-Borg items to GSA.

When processing directly it is the Distributors responsibility to highlight the contract number GS-35-0438L to Rauland-Borg on each GSA PO. So the sale can be reported & industrial funding fee paid correctly to GSA.

To authenticate that the company you are working with is an authorized GSA distributor of Rauland-Borg you can contact Colleen McMahon either by:

- Email Colleen.McMahon@Rauland.com or by
- Phone 847-590-375

Option 2: Processed with Rauland-Borg directly. Orders placed directly with Rauland-Borg need to be care of the distributor you are working with. You will then receive billing and make payment to Rauland-Borg. The PO should only include the parts on the contract and should not include installation labor based on our processes. The labor should be a separate PO directly with the distributor

PO that are processed directly by Rauland-Borg should be faxed:

- Attn: Eala Scott
- With the GSA contract number **GS-35-0438L**
- To Rauland-Borg Care of (*your distributor name*)
- To fax number 800-632-8520

Eala Scott can be contacted either by:

- Email <mailto:Eala.Scott@Rauland.com> or by
- Phone 847-590-7364

For larger projects it is recommended for both our customer & distributor benefits that the contract & PO be broken out into sub project when acceptable to both parties. This gives milestone control of the project and helps customers and our distributors better manage the financial flow of the project.

Within the GSA program as a customer you can pay invoices:

- At delivery for parts and or systems
- Acceptance upon completion of the installation of the system

- (1) Title to and ownership of the software and documentation shall remain with the Contractor, unless otherwise specified.
- (2) Software licenses are by site and by ordering activity. An ordering activity is defined as a cabinet level or independent ordering activity. The software may be used by any subdivision of the ordering activity (service, bureau, division, command, etc.) that has access to the site the software is placed at, even if the subdivision did not participate in the acquisition of the software. Further, the software may be used on a sharing basis where multiple agencies have joint projects that can be satisfied by the use of the software placed at one ordering activity's site. This would allow other agencies access to one ordering activity's database. For ordering activity public domain databases, user agencies and third parties may use the computer program to enter, retrieve, analyze and present data. The user ordering activity will take appropriate action by instruction, agreement, or otherwise, to protect the Contractor's proprietary property with any third parties that are permitted access to the computer programs and documentation in connection with the user ordering activity's permitted use of the computer programs and documentation. For purposes of this section, all such permitted third parties shall be deemed agents of the user ordering activity.
- (3) Except as is provided in paragraph 8.b(2) above, the ordering activity shall not provide or otherwise make available the software or documentation, or any portion thereof, in any form, to any third party without the prior written approval of the Contractor. Third parties do not include prime Contractors, subcontractors and agents of the ordering activity who have the ordering activity's permission to use the licensed software and documentation at the facility, and who have agreed to use the licensed software and documentation only in accordance with these restrictions. This provision does not limit the right of the ordering activity to use software, documentation, or information therein, which the ordering activity may already have or obtains without restrictions.
- (4) The ordering activity shall have the right to use the computer software and documentation with the computer for which it is acquired at any other facility to which that computer may be transferred, or in cases of disaster recovery, the ordering activity has the right to transfer the software to another site if the ordering activity site for which it is acquired is deemed to be unsafe for ordering activity personnel; to use the computer software and documentation with a backup computer when the primary computer is inoperative; to copy computer programs for safekeeping (archives) or backup purposes; to transfer a copy of the software to another site for purposes of benchmarking new hardware and/or software; and to modify the software and documentation or combine it with other software, provided that the unmodified portions shall remain subject to these restrictions.
- (5) "Commercial Computer Software" may be marked with the Contractor's standard commercial restricted rights legend, but the schedule contract and schedule pricelist, including this clause, "Utilization Limitations" are the only governing terms and conditions, and shall take precedence and supersede any different or additional terms and conditions included in the standard commercial legend.

9. SOFTWARE CONVERSIONS - (132-32 AND 132-33)

Full monetary credit will be allowed to the ordering activity when conversion from one version of the software to another is made as the result of a change in operating system, or from one computer system to another. Under a perpetual license (132-33), the purchase price of the new software shall be reduced by the amount that was paid to purchase the earlier version. Under a term license (132-32), conversion credits which accrued while the earlier version was under a term license shall carry forward and remain available as conversion credits which may be applied towards the perpetual license price of the new version.

10. DESCRIPTIONS AND EQUIPMENT COMPATIBILITY

The Contractor shall include, in the schedule pricelist, a complete description of each software product and a list of equipment on which the software can be used. Also, included shall be a brief, introductory explanation of the modules and documentation which are offered.
