GENERAL SERVICES ADMINISTRATION
FEDERAL SUPPLY SERVICE
AUTHORIZED FEDERAL SUPPLY SCHEDULE PRICELIST

On-line access to contract ordering information, terms and conditions, up-to-date pricing, and the option to create an electronic delivery order is available through GSA Advantage!, a menu-driven database system. The INTERNET address for GSA Advantage! is http://www.gsaadvantage.gov.

SCHEDULE TITLE: Multiple Award Schedule (MAS)

CONTRACT NUMBER: GS-35F-0438U

CATEGORY/SPECIAL ITEM NUMBER: 54151S Information Technology (IT)
Professional Services/IT Professional Services and/or labor categories for database planning and design; systems analysis, integration, and design; programming, conversion and implementation support; network services, data/records management, and testing (formerly SIN 132-51: IT Professional Services)

CONTRACT PERIOD: June 10, 2018 through June 9, 2023

BUSINESS SIZE: Small Disadvantaged Business

For more information on ordering from Federal Supply Schedule go to the GSA Schedules page at GSA.gov.

**Labor Categories**

### Subject Matter Expert Level 5

**Functional Responsibility:** Recognized expert in his/her field of endeavor. 13 years of progressive experience in related fields. As an expert in the subject matter field, may augment or direct project teams. Provide high level functional and FIP systems analysis, design, integration, documentation, and implementation advice on exceptionally complex studies which require an expert knowledge of the subject matter for effective problem solution. Participate in all phases of study development with emphasis on the planning, analysis, documentation, and presentation phases. Apply higher level mathematical principles and methods to exceptionally difficult and narrowly defined technical problems in engineering and other physical sciences to arrive at automated solutions. Reviews and approves the design and preparation of technical documentation and reports. Prepares and delivers senior management presentations and briefings as required by the task order. May serve as a Task Leader responsible for ensuring the quality and timeliness of services delivered.

**Years of Experience:** A minimum of 13 years of experience related to the field of study. A minimum of 5 years Project Management and direct Supervision experience.

**Education/Degree Requirement:** Bachelor's degree or appropriate combination of education and significant experience and demonstrated successful large project implementation. Related graduate degree (Master's or some Ph.D. coursework) or MBA strongly preferred. Master’s degree will account for 2 years of experience.

### Senior Subject Matter Expert Level 1

**Functional Responsibility:** Expert in his/her field of endeavor. 10 years of progressive experience required. Apply specialized expertise within areas of engineering, computer science, systems integration, data management, networks, telecommunications, simulation, etc. in the investigation, analysis, design, development, implementation, test and evaluation of complex systems. Assumes leadership role and is responsible for managing products, programs and services. As an expert in the subject matter field, augment and direct project team. Function as the technical lead in the analysis, design and implementation. Provide technical recommendations as needed in the area of expertise. Responsible for ensuring the quality and timeliness of services delivered.

**Years of Experience:** A minimum of 10 years of experience related to the field of study. A minimum of 5 years Project Management and direct Supervision experience.

**Education/Degree Requirement:** Bachelor's degree or appropriate combination of education and significant experience and demonstrated successful large project implementation. Related graduate degree (Master's or some Ph.D. coursework) or MBA strongly preferred. Master’s degree will account for 2 years of experience.

### Senior Subject Matter Expert Level 2

**Functional Responsibility:** Expert in his/her field of endeavor. 11 years of progressive experience required. Applies specialized expertise within areas of engineering, computer science, systems integration, data management, networks, telecommunications, simulation, etc. in the investigation, analysis, design, development, implementation, test and evaluation of complex systems. Assumes leadership role and is responsible for managing products, programs and services. As an expert in the subject matter field, augment and direct project team. Function as the technical lead in the analysis, design and implementation. Provide technical recommendations as needed in the area of expertise. Responsible for ensuring the quality and timeliness of services delivered.

**Years of Experience:** A minimum of 11 years of experience related to the field of study. A minimum of 5 years of Project Management and direct Supervision experience.

**Education/Degree Requirement:** Bachelor's degree or appropriate combination of education and significant experience and demonstrated successful large project implementation. Related graduate degree (Master's or some Ph.D. coursework) or MBA strongly preferred. Master’s degree will account for 2 years of experience.

**Education/Degree Requirement:** Bachelor's degree or appropriate combination of education and significant experience and demonstrated successful large project implementation. Related graduate degree (Master's or some Ph.D. coursework) or MBA strongly preferred. Master’s degree will account for 2 years of experience.

---

### Senior IT Project Director

**Functional Responsibility:** Responsible for all phases of performance, including contract management, contract cost control, project management, coordination of resource needs, coordination with corporate resources and management, and has direct accountability for the technical accuracy, timeliness and quality of deliverables. Responsible for managing products, programs and services involving department or cross-functional teams focused on the delivery of a product, service or computer-based system to internal or external customers. Monitors the product, program and/or service from initiation through delivery, interfacing with customer on technical matters. Assigns and monitors work of systems analysis and program staff, providing technical support and direction. Programs are often of finite or infinite duration, require resources from multiple functional areas, and result in the timely delivery of a complex service or custom product in a manner previously agreed upon by the company and the customer.

**Years of Experience:** A minimum of 10 years Project Management and Direct Supervision experience.

**Education/Degree Requirement:** Bachelor's degree or appropriate combination of education and significant experience and demonstrated successful large project implementation. Related graduate degree (Master's or some Ph.D. coursework) or MBA strongly preferred. Master’s Degree will account for 2 years of experience.

**Years of Experience:** A minimum of 5 years Project Management and Direct Supervision experience.

**Education/Degree Requirement:** Bachelor's degree or appropriate combination of education and significant experience and demonstrated successful large project implementation. Related graduate degree (Master's or some Ph.D. coursework) or MBA strongly preferred. Master’s Degree will account for 2 years of experience.
**IT Project Manager**

**Functional Responsibility:** Assigns and monitors the contract-related tasks to the IT team. Ensures that direct reports are billable to contracts. Ensures the attendance and professionalism of the direct reports. Supervises the project performance of staff in accordance with the organization’s policies and procedures. Identifies and develops work-related procedures for staff. Skilled in structured systems design, demonstrated by the ability to clearly translate business requirements into a system design. Knowledge of system implementation methodologies and experience applying the methodologies on more than one enterprise-wide project. Provides quality assurance for all deliverables. Attends client briefings and presentations.

**Years of Experience:** A minimum of 3 years managing IT projects.

**Education/Degree Requirement:** Bachelor's degree in Computer Science, Information Systems, Engineering, Business, or other related Scientific or Technical disciplines; four years’ experience equals a Bachelor’s degree.

**IT Administrative Assistant**

**Functional Responsibility:** Maintains project, team, and individual schedules of activities. Provides support to meetings, training courses, development of contract deliverables, completion of proposals, and other project-related activities. Develops draft and final correspondence, documents, briefings and other materials using software tools such as word processors and graphics presentations packages. Assists in the preparation of management plans and reports. Performs other routine administrative support tasks including making copies, processing mail and other distribution, maintaining files, and ordering and maintaining office supplies. Frequently performs tasks concurrently.

**Years of Experience:** A minimum of 2 years’ experience performing a variety of clerical support functions.

**Education/Degree Requirement:** High school diploma or equivalent.

**Database System Specialist**

**Functional Responsibility:** Performs support services involving specific development, maintenance and troubleshooting activities in support of new or legacy data systems in a PC-based or network-based hardware and software environment. Installs and configures systems to comply with developer’s specifications. Supports efforts to independently test and evaluate data systems for potential use. Maintains documentation of data systems, updating documentation when system upgrades are installed. May supervise others in installing and maintaining hardware and software.

**Years of Experience:** A minimum of 2 years’ experience is required in supporting the development, installation and maintenance of data systems. Minimum of 1 year of experience in a multi-platform, distributed data processing environment. Possesses some experience supervising others in performing IT-related activities.

**Education/Degree Requirement:** Technical certification or Associates Degree in a technical discipline; two years of experience equals an Associate’s Degree.

**Database System Specialist**

**Functional Responsibility:** Performs data entry via on-line data terminal, key-to-tape, key-to-disk, or similar device. Verifies data entered, where applicable.

**Years of Experience:** 0 to 1 year experience in data entry and verification.

**Education/Degree Requirement:** High school diploma or equivalent.
### Desktop/Help Desk Support Technician

**Functional Responsibility:** Answers incoming Help Desk calls and/or monitor e-mail or other incident reporting methods. Provides first call problem determination, troubleshooting and resolution. Log calls; accurately and completely document incident information. Assists staff with technical support of desktop computers, applications, and related technology. Support includes specification, installation, and testing of computer systems and peripherals within established standards and guidelines. Activities require interaction with application software and operating systems to diagnose and resolve unique, non-recurring problems. Assists in the setup, maintenance, and testing of network servers and associated equipment.

**Years of Experience:** 2-3 years hands-on experience with hardware, 2 years’ experience with the installation, configuration and troubleshooting of MS Windows 2000/XP.

**Education/Degree Requirement:** 2 year technical degree; two years’ experience equals a technical degree.

### Web/Graphics Designer II

**Functional Responsibility:** Develops graphics and layouts for product illustrations and company logo. Keys information into computer equipment to create layouts for client or supervisor. Prepares illustrations or rough sketches of material, discussing them with clients and/or supervisors and making necessary changes. Designs, develops, troubleshoots, debugs, and implements software code (such as HTML, CGI, and JavaScript) for components of the website in support of Information Technology (IT) projects. Studies illustrations and photographs to plan presentation of materials, products, or services. Prepares notes and instructions for workers who assemble and prepare final layouts for printing. Review final layouts and suggest improvements as needed. Confer with clients to discuss and determine layout design. Create designs, concepts, and sample layouts based on knowledge of layout principles and esthetic design concepts. Determine size and arrangement of illustrative material and copy, and select style and size of type.

**Years of Experience:** 4 years of graphic design experience and 2 years’ experience in Web software applications design and development, information architecture, and requirements analysis.

**Education/Degree Requirement:** Bachelor's degree in Graphics Arts, Computer Science, Information Systems, Engineering, Business, or other related Scientific or Technical disciplines; four years’ experience equals a Bachelor’s degree.

### System Analyst III/Programmer III

**Functional Responsibility:** Serves as both lead and supporting analyst and designer on PC-based and network based system development and maintenance projects. Translates operational requirements into specific hardware and software designs or process solutions. Performs all necessary functions including end user interface, requirements analysis and definition, functional description development, design development, test plan development and implementation, and the development of final documentation. Designs programs using flow charts, data flow diagrams, and/or pseudo code. Performs and assists in problem resolution, and troubleshooting on existing systems. Generally assigned to more than one task concurrently.

**Years of Experience:** A minimum of 6 years’ experience in information technology.

**Education/Degree Requirement:** Bachelor's degree in Computer Science, Information Systems, Engineering, Business, or other related Scientific or Technical discipline; four years’ experience equals a Bachelor’s degree.
### System Analyst II/Programmer II

**Functional Responsibility:** Analyzes and develops computer software possessing a wide range of capabilities, including numerous engineering, business, and records management functions. Develops plans for automated information systems from project inception to conclusion. Analyzes user interfaces, maintain hardware and software performance tuning, analyze workload and computer usage, maintain interfaces with outside systems, analyze downtimes, analyze proposed system modifications, upgrades and new COTS. Analyzes the problem and the information to be processed. Defines the problem, and develops system requirements and program specifications, from which programmers prepare detailed flow charts, programs, and tests. Coordinates closely with programmers to ensure proper implementation of program and system specifications. Develops, in conjunction with functional users, system alternative solutions.

**Years of Experience:** A minimum of 4 years’ experience, of which at least 2 years must be specialized.

**Education/Degree Requirement:** A Bachelor's degree in Computer Science, Information Systems, Engineering, Business, or other related scientific or technical discipline; four years’ experience equals a Bachelor’s degree.

**Years of Experience:** A minimum of 2 years’ experience.

**Education/Degree Requirement:** A Bachelor's degree in Computer Science, Information Systems, Engineering, Business, or other related scientific or technical discipline; four years’ experience equals a Bachelor’s degree.

### Expert Technical Writer/Editor

**Functional Responsibility:** Research, writes, and edits materials for related reports, manuals, briefs, proposals, instructional material, catalogs, technical publications, and software and hardware documentation. Revises text and recommends changes in scope, format, and content to ensure conformance with established standards. May edit, standardize, or make changes to material prepared by other writers. Performs final quality assurance on all materials. Edits functional descriptions, system specifications, user’s manuals, special reports, or any other customer deliverables and documents.

**Years of Experience:** A minimum of 8 years of experience. Specialized experience includes demonstrated experience in creating, editing, and proofreading documents, including technical documents.

**Education/Degree Requirement:** Master’s degree in English, Literature, or a related discipline is preferred. A Bachelor’s Degree is required with a combination of other education and training. Masters will account for 2 years of experience.
