Communication Cabling – Copper and Fiber Optic

IPC'S are communication cabling specialists in a wide range of vendor cabling solutions. We have highly trained engineers and licensed technicians to undertake the design and installation of your structured cabling system.

SERVICES

- ❖ Site surveys including evaluations, identification and certification of existing voice and data cabling.
- ❖ The installation and service of Category 3 telephone and PBX cabling systems. We extend from the D-Marc to the user locations: DSL, ISDN, T1 and analog/pots lines provided from the local Telco provider.
- ❖ We also install and support and associated hardware from, Avaya, Cisco voice over IP, Polycom, Plantronics and hands free telephone call boxes and security device.
- ❖ The installation and service of Category 5, 5E and Category 6 data network copper cabling solutions for Data Centers, clean rooms, labs and business office environments.
- ❖ The installation and service of optical fiber. Single Mode and Multimode (62.5 micron and laser optimized 50 micron fiber).
- ❖ The installation and service of campus, single tenant and multi-tenant backbone infrastructure cabling systems.
- ❖ The installation and service of overhead paging systems from Valcom and Bogen.
- ❖ Voice cross connections from PBX to telecommunications closet to end user location.
- ❖ Data patching from the cables termination point in the Telecommunications Closet to the network switches, hubs and servers.
- ❖ Documentation testing per the ANSI/EIA/TIA standards.
- ❖ Moves, Adds and Changes.
- ❖ Hard and soft copies of copper and fiber test results.
- ❖ As built drawings in a .dwg format.

Certification and Compliance

Quality Control

IPCS has implemented a structured quality control system across all aspects of our operations. All installations are monitored and controlled by one of our Bicsi RCDD staff.

Testing

IPCS has a 100% test policy. Every telecommunications cable installed by IPCS will be tested to ensure correct installation and adherence to ANSI/TIA/EIA Standards.

Test results are generally presented as part of any as installed documentation. Where documentation is not requested all test results are kept for 2 years on our computer system.

IPCS tests all telecommunications cabling using standards compliant cable scanners and testers. Our cable scanners are regularly checked and calibrated to ensure that all cable tests are carried out to the highest possible standard.
