## **SPECIAL NOTICE TO AGENCIES**

### **Small Business Participation**

SBA strongly supports the participation of small business concerns in the Federal Supply Schedules Program. To enhance Small Business Participation SBA policy allows agencies to include in their procurement base and goals, the dollar value of orders expected to be placed against the Federal Supply Schedules, and to report accomplishments against these goals.

For orders exceeding the micro-purchase threshold, FAR 8.404 requires agencies to consider the catalogs/price lists of at least three schedule contractors or consider reasonably available information by using the GSA Advantage!™ on-line shopping service ([www.fss.gsa.gov](http://www.fss.gsa.gov)). The catalogs/price lists, GSA Advantage!™ and the Federal Supply Service Home Page ([www.fss.gsa.gov](http://www.fss.gsa.gov)) contain information on a broad array of products and services offered by small business concerns.

This information should be used as a tool to assist ordering activities in meeting or exceeding established small business goals. It should also be used as a tool to assist in including small, small disadvantaged, and women-owned small businesses among those considered when selecting price lists for a best value determination.

For orders exceeding the micro-purchase threshold, customers are to give preference to small business concerns when two or more items at the same delivered price will satisfy their requirement.

ASPs shall not be responsible for any software programs, data or other information stored or used on any media or part of any Product returned to FPC for warranty service or other repair including the costs of recovering such programs or data. If during the warranty service or repair of the Product the contents of the hard disk or any other data storage media are altered, deleted, modified or lost, FPC is not responsible. ### **How to Obtain Service on Extended Warranty Plans**

For one and two year service plans and one and three year screen damage plans, customer should call 1-800-8-FUJITSU. A remote diagnostic program will be run to determine if the computer must be returned to Fujitsu. In the event this is necessary, a RMA number will be issued. This number should appear on both the inside and outside of the package. Fujitsu will not be responsible for files left on the computer at the time it is returned for repair. Products are to be returned to our repair facility at the following address:

Fujitsu Computer Systems  
5170 Raines Road  
Memphis, Tennessee

The government customer is responsible for freight charges to ship product to Fujitsu. Fujitsu will pay return freight charges to the customer.

### **Executive Mobile Service**

The Executive Mobile Service Plans offer on-site repair service. The government customer should telephone 1-900-8-FUJITSU. A remote diagnostic will be run to determine the problem and a call will be scheduled. The field engineer will confirm the time that service is scheduled. Repair parts will be sent overnight to the customer location. The field engineer arrives on site, repair equipment and returns replaced parts to Fujitsu.

### **Quality Care**

If unintentional damage occurs, customer should call Fujitsu at 1-800-8FUJITSU. Fujitsu technicians, through a series of questions, will determine extent and cause of damage. Depending upon the problem, Fujitsu will initiate appropriate repairs/replacement.
