Substitution Methodology:
Due to the availability or limitation of education, occasionally substitution of experience as referenced below for a professional labor type with additional years of experience will be provided to the Federal Agency when responding to their IT requirements and it is solely the acquiring agency’s determination, if the substitution is considered acceptable prior to an award.

Program Manager
Minimum/General Experience: Bachelor's Degree with 10 years of experience or equivalent work experience of 12 years operations management, software engineering, systems integration, or related experience with experience in large-scale systems in design, integration, development, and/or operations. Demonstrated ability in providing solution sets, managing projects similar in scope and complexity to the project requirement. Requires competence and experience in human resource management, problem solving, and quality assurance techniques. Also requires excellent communication skills, both written and verbal.

Functional Responsibility: Responsible for coordinating, defining, staffing, and managing multiple projects. The Program Manager works across the business – Strategic Direction, Requirements Analysis, Relationship Management, Quality Assurance and Testing, Systems Analysis, Software/Systems Integration and Development, and Technical Writing teams to ensure the delivery of a high-quality software application. Primary technical point of contact for Project Managers and various technical personnel on project. Develops project schedules, coordinates project status meetings, and manages resources in all phases of systems development lifecycle. Works with the project business owner to oversee delivery performance, ensure delivery quality and report schedule, cost, and execution performance.

Senior IT Specialist
Minimum/General Experience: Bachelor's Degree with 5 years of experience or equivalent work experience of 8 years experience in lifecycle system design, development, installation, integration, evaluation, enhancement, operations, maintenance, testing, or problem diagnosis/resolution.

Functional Responsibility: Performs requirement analysis, systems design, development, installation, testing, operations, and maintenance for application system components for large-scale and distributed systems. Performs system, and/or product evaluation, integration, testing, and problem diagnosis/resolution. Provides technical leadership, reviews work products, and makes technical recommendations, as needed, for changes in the supported technical architecture.
**Project Manager**

Minimum/General Experience: Bachelor's Degree with 5 years of experience or equivalent work experience of 8 years operations, engineering, or related experience with three years of experience in large-scale systems in integration, design, development and/or operations. Demonstrated ability in managing projects similar in scope and complexity to the project requirement. Requires competence and experience in human resource management, problem solving, and quality assurance techniques. Also requires excellent communication skills, both written and verbal.

Functional Responsibility: Responsible for coordinating, defining, staffing, and managing one or multiple projects. The Project Manager works across the business – Strategic Direction, Requirements Analysis, Relationship Management, Quality Assurance and Testing, Systems Analyst, Systems Integration and Development, and Technical Writing teams to ensure the delivery of a high-quality solution. Primary technical point of contact with Program Manager and various technical personnel on project. Develops project schedules, coordinates project status meetings, and manages resources in all phases of systems development lifecycle. Works with the project business owner to oversee delivery performance, ensure delivery quality and report schedule, cost, and execution performance.

**Technical Architect**

Minimum/General Experience: Bachelor's Degree with 8 years or equivalent work experience of 10 years integration, systems analysis, operations, or programming experience, including four years in the areas of developing systems requirements and design specifications; experience in project management/task leader positions in development or implementation.

Functional Responsibility: Applies, as appropriate, activity and data modeling, transaction/workflow analysis, internal control and risk analysis and modern business methods, and performance measurement techniques. Provides technical direction to personnel performing systems analysis and system/subsystem development and operations tasks. Coordinates and performs logical and physical systems design. Reviews and prepares system documents and specifications. Prepares reports, studies, and documentation, delivers presentations, and participates in meetings.

**IT Specialist**

Minimum/General Experience: Bachelor's Degree with 4 years or equivalent work experience of 6 years in lifecycle system design, development, installation, integration, evaluation, enhancement, operations, maintenance, testing, or problem diagnosis/resolution. Also can direct policy documentation, communications, outreach, stakeholder management efforts related to system implementation and operations.

Functional Responsibility: Supports the project team in performing requirements analysis, design, development, installation, testing, operations, and maintenance for systems.

**Associate**

Minimum/General Experience: Bachelor's Degree or equivalent work experience of 4 years in lifecycle system design, development, installation, integration, evaluation, enhancement, operations, maintenance, testing, or problem diagnosis/resolution. Also can support policy development, communications, outreach, stakeholder management efforts related to system implementation and operations.

Functional Responsibility: Supports the project team in performing requirements analysis, design, development, installation, testing, and maintenance systems. Also performs non-technical program tasks to support delivery performance, ensure delivery quality and report schedule, cost, and execution performance.
**Functional Subject Matter Expert**

Minimum/General Experience: Bachelor's Degree with 10 years or equivalent work experience of 15 years in functional experience in the domain of engagement. Possesses requisite knowledge and expertise so recognized in the professional community that the Government is able to qualify the individual as an expert in the field. Demonstrates exceptional oral and written communication skills. Experience with policy development, communications, outreach, stakeholder management efforts related to system implementation and operations.

Functional Responsibility: Analyzes user needs to determine functional requirements. Performs functional analysis to identify required tasks and their interrelationships. Identifies resources required for each task. Supports the project team in developing business and functional requirements, conducting end-user analysis of system function, testing, and development of communications material.

**Sr. Principal Consultant**

Minimum/General Experience: Bachelor's Degree with 10 years or equivalent work experience of 15 years in the domain of engagement. Demonstrates very strong oral and written communication skills. Experience with policy, business process re-engineering, strategic consulting, alignment of IT and functional requirements, development, communications, outreach, stakeholder management efforts related to system implementation and operations.

Functional Responsibility: Analyzes user needs to determine functional requirements. Provides policy, business process re-engineering, strategic consulting, alignment of IT and functional requirements, development, communications, outreach, stakeholder management efforts related to system implementation and operations.
