LABOR CATEGORY DESCRIPTIONS

Computer Operator I
Experience: 1 year of experience required
Education: High School Diploma
Job duties: Control and operation of networks, computers, automated systems and peripherals. Must be able to identify and troubleshoot computer and processing problems and provide system support for all users of the computer systems and applications.

Computer Operator II
Experience: 3 of years of experience required
Education: High School Diploma
Job duties: Control and operation of networks, computers, automated systems and peripherals. Must be able to identify and troubleshoot computer and processing problems and provide system support for all users of the computer systems and applications.

Computer Operator III
Experience: 5 of years of experience required
Education: High School Diploma
Job duties: Control and operation of networks, computers, automated systems and peripherals. Must be able to identify and troubleshoot computer and processing problems and provide system support for all users of the computer systems and applications.

Computer Operator IV
Experience: 8 of years of experience required
Education: High School Diploma
Job duties: Control and operation of networks, computers, automated systems and peripherals. Must be able to identify and troubleshoot computer and processing problems and provide system support for all users of the computer systems and applications.

Computer Operator V
Experience: 10 of years of experience required
Education: High School Diploma
Job duties: Control and operation of networks, computers, automated systems and peripherals. Must be able to identify and troubleshoot computer and processing problems and provide system support for all users of the computer systems and applications.
**GIS Analyst I**

Experience: 4 of years of experience required  
Education: High School Diploma  
Job duties: Knowledge of acquiring and processing data from state and federal agencies used in environmental assessment analysis and/or integrated into the Geographic Information System (GIS) infrastructure. Must have demonstrated proficiency with GIS software and experience developing GIS databases utilizing field data.

**GIS Analyst II**

Experience: 6 of years of experience required  
Education: High School Diploma  
Job duties: Knowledge of acquiring and processing data from state and federal agencies used in environmental assessment analysis and/or integrated into the Geographic Information System (GIS) infrastructure. Must have demonstrated proficiency with GIS software and experience developing GIS databases utilizing field data.

**GIS Analyst III**

Experience: 10 of years of experience required  
Education: High School Diploma  
Job duties: Knowledge of acquiring and processing data from state and federal agencies used in environmental assessment analysis and/or integrated into the Geographic Information System (GIS) infrastructure. Must have demonstrated proficiency with GIS software and experience developing GIS databases utilizing field data.

**GIS Analyst IV**

Experience: 12 of years of experience required  
Education: High School Diploma  
Job duties: Knowledge of acquiring and processing data from state and federal agencies used in environmental assessment analysis and/or integrated into the Geographic Information System (GIS) infrastructure. Must have demonstrated proficiency with GIS software and experience developing GIS databases utilizing field data.

**Programmer I**

Experience: 3 of years of experience required  
Education: High School Diploma  
Job duties: Design, development, testing, implementation and enhancement of software for newly specified functionalities that will meet end user requirements. Requires the ability to take high-level designs to a detailed level and develop and test the appropriate code.
**Programmer II**

Experience: 5 of years of experience required  
Education: High School Diploma  
Job duties: Design, development, testing, implementation and enhancement of software for newly specified functionalities that will meet end user requirements. Requires the ability to take high-level designs to a detailed level and develop and test the appropriate code.

**Programmer III**

Experience: 7 of years of experience required  
Education: High School Diploma  
Job duties: Design, development, testing, implementation and enhancement of software for newly specified functionalities that will meet end user requirements. Requires the ability to take high-level designs to a detailed level and develop and test the appropriate code.

**Programmer IV**

Experience: 8 of years of experience required  
Education: High School Diploma  
Job duties: Design, development, testing, implementation and enhancement of software for newly specified functionalities that will meet end user requirements. Requires the ability to take high-level designs to a detailed level and develop and test the appropriate code.

**Programmer V**

Experience: 10 of years of experience required  
Education: High School Diploma  
Job duties: Design, development, testing, implementation and enhancement of software for newly specified functionalities that will meet end user requirements. Requires the ability to take high-level designs to a detailed level and develop and test the appropriate code.

**Systems Analyst I**

Experience: 3 of years of experience required  
Education: High School Diploma  
Job duties: Analyzing technical requirements and planning for current and future capacity needs of the system. Requires knowledge of methodologies used in designing scalability into the system, and knowledge of available hardware, system software, and input/output devices.

**Systems Analyst II**

Experience: 5 of years of experience required  
Education: High School Diploma  
Job duties: Analyzing technical requirements and planning for current and future capacity needs of the system. Requires knowledge of methodologies used in designing scalability into the system, and knowledge of available hardware, system software, and input/output devices.
**Systems Analyst III**

Experience: 10 of years of experience required
Education: High School Diploma
Job duties: Analyzing technical requirements and planning for current and future capacity needs of the system. Requires knowledge of methodologies used in designing scalability into the system, and knowledge of available hardware, system software, and input/output devices.

**Systems Analyst IV**

Experience: 12 of years of experience required
Education: High School Diploma
Job duties: Analyzing technical requirements and planning for current and future capacity needs of the system. Requires knowledge of methodologies used in designing scalability into the system, and knowledge of available hardware, system software, and input/output devices.

**Systems Analyst V**

Experience: 15 of years of experience required
Education: High School Diploma
Job duties: Analyzing technical requirements and planning for current and future capacity needs of the system. Requires knowledge of methodologies used in designing scalability into the system, and knowledge of available hardware, system software, and input/output devices.

**Technical Writer I**

Experience: 3 of years of experience required
Education: High School Diploma
Job duties: Creating both written and online documentation. Must have the ability to write and implement User’s Guides, Installation Guides, Database Administration Guides, System Administrators Guides, Disaster Recovery and online technical documentation.

**Technical Writer II**

Experience: 5 of years of experience required
Education: High School Diploma
Job duties: Creating both written and online documentation. Must have the ability to write and implement User’s Guides, Installation Guides, Database Administration Guides, System Administrators Guides, Disaster Recovery and online technical documentation.

**Technical Writer III**

Experience: 8 of years of experience required
Education: High School Diploma
Job duties: Creating both written and online documentation. Must have the ability to write and implement User’s Guides, Installation Guides, Database Administration Guides, System Administrators Guides, Disaster Recovery and online technical documentation.
**Web Design I**

Experience: 3 of years of experience required  
Education: High School Diploma  
Job duties: Design, development and implementation of intranet/Internet systems. Requires proficiency with established methodologies and state-of-the-art development tools used to construct and support intranet and Internet web-based applications.

**Web Design II**

Experience: 5 of years of experience required  
Education: High School Diploma  
Job duties: Design, development and implementation of intranet/Internet systems. Requires proficiency with established methodologies and state-of-the-art development tools used to construct and support intranet and Internet web-based applications.

**Web Design III**

Experience: 8 of years of experience required  
Education: High School Diploma  
Job duties: Design, development and implementation of intranet/Internet systems. Requires proficiency with established methodologies and state-of-the-art development tools used to construct and support intranet and Internet web-based applications.

**Consultant**

Experience: 2 of years of experience required  
Education: Master's Degree  
Job duties: Work in partnership with clients, advising them how to use information technology in order to meet their business objectives or overcome problems.
