24. CONTRACTOR HAS REGISTERED IN THE SYSTEM FOR AWARD MANAGEMENT (SAM) DATABASE.
1. MATERIAL AND WORKMANSHIP

All equipment furnished hereunder must satisfactorily perform the function for which it is intended.

2. ORDER

Written orders, EDI orders (GSA Advantage! and FACNET), credit card orders, and orders placed under blanket purchase agreements (BPA) agreements shall be the basis for purchase in accordance with the provisions of this contract. If time of delivery extends beyond the expiration date of the contract, the Contractor will be obligated to meet the delivery and installation date specified in the original order. For credit card orders and BPAs, telephone orders are permissible.

3. TRANSPORTATION OF EQUIPMENT

FOB DESTINATION. Prices cover equipment delivery to destination, for any location within the geographic scope of this contract.

4. INSTALLATION AND TECHNICAL SERVICES

a. INSTALLATION. When the equipment provided under this contract is not normally self-installable, the Contractor's technical personnel shall be available to the ordering activity, at the ordering activity's location, to install the equipment and to train ordering activity personnel in the use and maintenance of the equipment. The charges, if any, for such services are listed below, or in the price schedule:
   Equipment is self-installable.

b. INSTALLATION, DEINSTALLATION, REINSTALLATION. The Davis-Bacon Act (40 U.S.C. 276a-276a-7) provides that contracts in excess of $2,000 to which the United States or the District of Columbia is a party for construction, alteration, or repair (including painting and decorating) of public buildings or public works with the United States, shall contain a clause that no laborer or mechanic employed directly upon the site of the work shall received less than the prevailing wage rates as determined by the Secretary of Labor. The requirements of the Davis-Bacon Act do not apply if the construction work is incidental to the furnishing of supplies, equipment, or services. For example, the requirements do not apply to simple installation or alteration of a public building or public work that is incidental to furnishing supplies or equipment under a supply contract. However, if the construction, alteration or repair is segregable and exceeds $2,000, then the requirement of the Davis-Bacon Act applies.

The ordering activity issuing the task order against this contract will be responsible for proper administration and enforcement of the Federal labor standards covered by the Davis-Bacon Act. The proper Davis-Bacon wage determination will be issued by the ordering activity at the time a request for quotations is made for applicable construction classified installation, deinstallation, and reinstallation services under SIN 33411 or SIN 33411REF.

c. OPERATING AND MAINTENANCE MANUALS. The Contractor shall furnish the ordering activity with one (1) copy of all operating and maintenance manuals which are normally provided with the equipment being purchased.

5. INSPECTION/ACCEPTANCE

The Contractor shall only tender for acceptance those items that conform to the requirements of this contract. The ordering activity reserves the right to inspect or test any equipment that has been tendered for acceptance. The ordering activity may require repair or replacement of nonconforming equipment at no increase in contract price. The ordering activity must exercise its post acceptance rights (1) within a reasonable time after the defect was discovered or should have been discovered; and (2) before any substantial change occurs in the condition of the item, unless the change is due to the defect in the item.
6. **WARRANTY**

   a. Unless specified otherwise in this contract, the Contractor’s standard commercial warranty as stated in the contract’s commercial pricelist will apply to this contract.

   b. The Contractor warrants and implies that the items delivered hereunder are merchantable and fit for use for the particular purpose described in this contract.

   c. Limitation of Liability. Except as otherwise provided by an express or implied warranty, the Contractor will not be liable to the ordering activity for consequential damages resulting from any defect or deficiencies in accepted items.

   d. If inspection and repair of defective equipment under this warranty will be performed at the Contractor's plant, the address is as follows: Not Applicable

7. **PURCHASE PRICE FOR ORDERED EQUIPMENT**

   The purchase price that the ordering activity will be charged will be the ordering activity purchase price in effect at the time of order placement, or the ordering activity purchase price in effect on the installation date (or delivery date when installation is not applicable), whichever is less.

8. **RESPONSIBILITIES OF THE CONTRACTOR**

   The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City or otherwise) covering work of this character, and shall include all costs, if any, of such compliance in the prices quoted in this offer.

9. **TRADE-IN OF INFORMATION TECHNOLOGY EQUIPMENT**

   When an ordering activity determines that Information Technology equipment will be replaced, the ordering activity shall follow the contracting policies and procedures in the Federal Acquisition Regulation (FAR), the policies and procedures regarding disposition of information technology excess personal property in the Federal Property Management Regulations (FPMR) (41 CFR 101-43.6), and the policies and procedures on exchange/sale contained in the FPMR (41 CFR part 101-46).
1. SERVICE AREAS

Support/Repair services are all performed remotely.

2. MAINTENANCE ORDER

a. Agencies may use written orders, EDI orders, credit card orders, or BPAs, for ordering maintenance under this contract. The Contractor shall confirm orders within fifteen (15) calendar days from the date of receipt, except that confirmation of orders shall be considered automatic for renewals for maintenance (Special Item Number 811212). Automatic acceptance of order renewals for maintenance service shall apply for machines which may have been discontinued from use for temporary periods of time not longer than 120 calendar days. If the order is not confirmed by the Contractor as prescribed by this paragraph, the order shall be considered to be confirmed by the Contractor.

b. The Contractor shall honor orders for maintenance for the duration of the contract period or a lesser period of time, for the equipment shown in the pricelist. Maintenance service shall commence on a mutually agreed upon date, which will be written into the maintenance order. Maintenance orders shall not be made effective before the expiration of any applicable maintenance and parts guarantee/warranty period associated with the purchase of equipment. Orders for maintenance service shall not extend beyond the end of the contract period.

c. Maintenance may be discontinued by the ordering activity on thirty (30) calendar days written notice, or shorter notice when agreed to by the Contractor; such notice to become effective thirty (30) calendar days from the date on the notification. However, the ordering activity may extend the original discontinuance date upon written notice to the Contractor, provided that such notice is furnished at least ten (10) calendar days prior to the original discontinuance date.

d. Annual Funding. When annually appropriated funds are cited on a maintenance order, the period of maintenance shall automatically expire on September 30th of the contract period, or at the end of the contract period, whichever occurs first. Renewal of a maintenance order citing the new appropriation shall be required, if maintenance is to continue during any remainder of the contract period.

e. Cross-year Funding within Contract Period. Where an ordering activity's specific appropriation authority provides for funds in excess of a 12 month, fiscal year period, the ordering activity may place an order under this schedule contract for a period up to the expiration of the contract period, notwithstanding the intervening fiscal years.

f. Ordering activities should notify the Contractor in writing thirty (30) calendar days prior to the expiration of maintenance service, if maintenance is to be terminated at that time. Orders for continued maintenance will be required if maintenance is to be continued during the subsequent period.
3. REPAIR SERVICE AND REPAIR PARTS/SPARE PARTS ORDERS
   a. Agencies may use written orders, EDI orders, credit card orders, blanket purchase agreements (BPAs), or small order procedures for ordering repair service and/or repair parts/spare parts under this contract. Orders for repair service shall not extend beyond the end of the contract period.
   b. When repair service is ordered, only one chargeable repairman shall be dispatched to perform repair service, unless the ordering activity agrees, in advance, that additional repair personnel are required to effect repairs.

4. LOSS OR DAMAGE
   When the Contractor removes equipment to his establishment for repairs, the Contractor shall be responsible for any damage or loss, from the time the equipment is removed from the ordering activity installation, until the equipment is returned to such installation.

5. SCOPE
   a. The Contractor shall provide maintenance for all equipment listed herein, as requested by the ordering activity during the contract term. Repair service and repair parts/spare parts shall apply exclusively to the equipment types/models within the scope of this Information Technology Schedule.
   b. Equipment placed under maintenance service shall be in good operating condition.
      (1) In order to determine that the equipment is in good operating condition, the equipment shall be subject to inspection by the Contractor, without charge to the ordering activity.
      (2) Costs of any repairs performed for the purpose of placing the equipment in good operating condition shall be borne by the Contractor, if the equipment was under the Contractor's guarantee/warranty or maintenance responsibility prior to the effective date of the maintenance order.
      (3) If the equipment was not under the Contractor's responsibility, the costs necessary to place the equipment in proper operating condition are to be borne by the ordering activity, in accordance with the provisions of Special Item Number 811212 (or outside the scope of this contract).

6. RESPONSIBILITIES OF THE ORDERING ACTIVITY
   a. Ordering activity personnel shall not perform maintenance or attempt repairs to equipment while such equipment is under the purview of a maintenance order, unless agreed to by the Contractor.
   b. Subject to security regulations, the ordering activity shall permit access to the equipment which is to be maintained or repaired.
   c. If the Ordering Activity desires a factory authorized/certified service personnel then this should be clearly stated in the task or delivery order.

7. RESPONSIBILITIES OF THE CONTRACTOR
   a. For equipment not covered by a maintenance contract or warranty, the Contractor's repair service personnel shall complete repairs as soon as possible after notification by the ordering activity that service is required. Within the service areas, this repair service should normally be done within 4 hours after notification.
   b. If the Ordering Activity task or delivery order specifies a factory authorized/certified service personnel then the Contractor is obligated to provide such a factory authorized/certified service personnel for the equipment to be repaired or serviced, unless otherwise agreed to in advance between the Agency and the Contractor.
8. **MAINTENANCE RATE PROVISIONS**

a. The Contractor shall bear all costs of maintenance, including labor, parts, and such other expenses as are necessary to keep the equipment in good operating condition, provided that the required repairs are not occasioned by fault or negligence of the ordering activity.

b. **REGULAR HOURS**

The basic monthly rate for each make and model of equipment shall entitle the ordering activity to maintenance service during a mutually agreed upon nine (9) hour principal period of maintenance, Monday through Friday, exclusive of holidays observed at the ordering activity location.

c. **AFTER HOURS**

Should the ordering activity require that maintenance be performed outside of Regular Hours, charges for such maintenance, if any, will be specified in the pricelist. Periods of less than one hour will be prorated to the nearest quarter hour.

d. **TRAVEL AND TRANSPORTATION**

If any charge is to apply, over and above the regular maintenance rates, because of the distance between the ordering activity location and the Contractor’s service area, the charge will be negotiated at the Task Order level.

e. **QUANTITY DISCOUNTS**

None.

9. **REPAIR SERVICE RATE PROVISIONS**

Contact Contract for devices which are not supported by an extended maintenance plan.

10. **REPAIR PARTS/SPARE PARTS RATE PROVISIONS**

All parts, furnished as spares or as repair parts in connection with the repair of equipment, unless otherwise indicated in this pricelist, shall be new, standard parts manufactured by the equipment manufacturer. All parts shall be furnished at prices indicated in the Contractor’s pricelist.

11. **GUARANTEE/WARRANTY—REPAIR SERVICE AND REPAIR PARTS/SPARE PARTS**

a. **REPAIR SERVICE**

Contact Contractor

b. **REPAIR PARTS/SPARE PARTS**

All parts, furnished either as spares or repairs parts will be guaranteed/warranted for a period 1 year.

12. **INVOICES AND PAYMENTS**

a. **Maintenance Service**

(1) Invoices for maintenance service shall be submitted by the Contractor on a quarterly or monthly basis, after the completion of such period. Maintenance charges must be paid in arrears (31 U.S.C. 3324). PROMPT PAYMENT DISCOUNT, IF APPLICABLE, SHALL BE SHOWN ON THE INVOICE.

(2) Payment for maintenance service of less than one month's duration shall be prorated at 1/30th of the monthly rate for each calendar day.
b. Repair Service and Repair Parts/Spare Parts

Invoices for repair service and parts shall be submitted by the Contractor as soon as possible after completion of work. Payment under blanket purchase agreements will be made quarterly or monthly, except where cash payment procedures are used. Invoices shall be submitted separately to each ordering activity office ordering services under the contract. The cost of repair parts shall be shown as a separate item on the invoice, and shall be priced in accordance with paragraph #10, above. PROMPT PAYMENT DISCOUNT, IF APPLICABLE, SHALL BE SHOWN ON THE INVOICE.
1. SCOPE
a. The prices, terms and conditions stated under Special Item Number 54151S Information Technology Professional Services apply exclusively to IT Professional Services within the scope of this Information Technology Schedule.
b. The Contractor shall provide services at the Contractor’s facility and/or at the ordering activity location, as agreed to by the Contractor and the ordering activity.

2. PERFORMANCE INCENTIVES 1-FSS-60 Performance Incentives (April 2000)
a. Performance incentives may be agreed upon between the Contractor and the ordering activity on individual fixed price orders or Blanket Purchase Agreements under this contract.
b. The ordering activity must establish a maximum performance incentive price for these services and/or total solutions on individual orders or Blanket Purchase Agreements.
c. Incentives should be designed to relate results achieved by the contractor to specified targets. To the maximum extent practicable, ordering activities shall consider establishing incentives where performance is critical to the ordering activity’s mission and incentives are likely to motivate the contractor. Incentives shall be based on objectively measurable tasks.

3. ORDER
a. Agencies may use written orders, EDI orders, blanket purchase agreements, individual purchase orders, or task orders for ordering services under this contract. Blanket Purchase Agreements shall not extend beyond the end of the contract period; all services and delivery shall be made and the contract terms and conditions shall continue in effect until the completion of the order. Orders for tasks which extend beyond the fiscal year for which funds are available shall include FAR 52.232-19 (Deviation – May 2003) Availability of Funds for the Next Fiscal Year. The purchase order shall specify the availability of funds and the period for which funds are available.
b. All task orders are subject to the terms and conditions of the contract. In the event of conflict between a task order and the contract, the contract will take precedence.

4. PERFORMANCE OF SERVICES
a. The Contractor shall commence performance of services on the date agreed to by the Contractor and the ordering activity.
b. The Contractor agrees to render services only during normal working hours, unless otherwise agreed to by the Contractor and the ordering activity.
c. The ordering activity should include the criteria for satisfactory completion for each task in the Statement of Work or Delivery Order. Services shall be completed in a good and workmanlike manner.
d. Any Contractor travel required in the performance of IT Services must comply with the Federal Travel Regulation or Joint Travel Regulations, as applicable, in effect on the date(s) the travel is performed. Established Federal Government per diem rates will apply to all Contractor travel. Contractors cannot use GSA city pair contracts.

5. STOP-WORK ORDER (FAR 52.242-15) (AUG 1989)
(a) The Contracting Officer may, at any time, by written order to the Contractor, require the Contractor to stop all, or any part, of the work called for by this contract for a period of 90 days after the order is delivered to the Contractor, and for any further period to which the parties may agree. The order shall be specifically identified as a stop-work order issued under this clause. Upon receipt of the order, the Contractor shall immediately comply with its terms and take all reasonable steps to minimize the incurring of costs allocable to the work covered by the order during the period of work stoppage. Within a period of 90 days after a stop-work is delivered to the Contractor, or within any extension of that period to which the parties shall have agreed, the Contracting Officer shall either-
(1) Cancel the stop-work order; or
(2) Terminate the work covered by the order as provided in the Default, or the Termination for Convenience of the Government, clause of this contract.

(b) If a stop-work order issued under this clause is canceled or the period of the order or any extension thereof expires, the Contractor shall resume work. The Contracting Officer shall make an equitable adjustment in the delivery schedule or contract price, or both, and the contract shall be modified, in writing, accordingly, if-

(1) The stop-work order results in an increase in the time required for, or in the Contractor's cost properly allocable to, the performance of any part of this contract; and
(2) The Contractor asserts its right to the adjustment within 30 days after the end of the period of work stoppage; provided, that, if the Contracting Officer decides the facts justify the action, the Contracting Officer may receive and act upon the claim submitted at any time before final payment under this contract.

(c) If a stop-work order is not canceled and the work covered by the order is terminated for the convenience of the Government, the Contracting Officer shall allow reasonable costs resulting from the stop-work order in arriving at the termination settlement.

(d) If a stop-work order is not canceled and the work covered by the order is terminated for default, the Contracting Officer shall allow, by equitable adjustment or otherwise, reasonable costs resulting from the stop-work order.

6. INSPECTION OF SERVICES

7. RESPONSIBILITIES OF THE CONTRACTOR

The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character. If the end product of a task order is software, then FAR 52.227-14 (Dec 2007) Rights in Data – General, may apply.

8. RESPONSIBILITIES OF THE ORDERING ACTIVITY

Subject to security regulations, the ordering activity shall permit Contractor access to all facilities necessary to perform the requisite IT Professional Services.

9. INDEPENDENT CONTRACTOR

All IT Professional Services performed by the Contractor under the terms of this contract shall be as an independent Contractor, and not as an agent or employee of the ordering activity.

10. ORGANIZATIONAL CONFLICTS OF INTEREST

a. Definitions.

“Contractor” means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.

“Contractor and its affiliates” and “Contractor or its affiliates” refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor.

An “Organizational conflict of interest” exists when the nature of the work to be performed under a proposed ordering activity contract, without some restriction on ordering activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor’s or its affiliates’ objectivity in performing contract work.
b. To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508.

11. **INVOICES**

The Contractor, upon completion of the work ordered, shall submit invoices for IT Professional services. Progress payments may be authorized by the ordering activity on individual orders if appropriate. Progress payments shall be based upon completion of defined milestones or interim products. Invoices shall be submitted monthly for recurring services performed during the preceding month.

12. **PAYMENTS**

For firm-fixed price orders the ordering activity shall pay the Contractor, upon submission of proper invoices or vouchers, the prices stipulated in this contract for service rendered and accepted. Progress payments shall be made only when authorized by the order. For time-and-materials orders, the Payments under Time-and-Materials and Labor-Hour Contracts at FAR 52.212-4 (MAR 2009) (ALTERNATE I – OCT 2008) (DEVIATION I – FEB 2007) applies to time-and-materials orders placed under this contract. For labor-hour orders, the Payment under Time-and-Materials and Labor-Hour Contracts at FAR 52.212-4 (MAR 2009) (ALTERNATE I – OCT 2008) (DEVIATION I – FEB 2007) applies to labor-hour orders placed under this contract. 52.216-31(Feb 2007) Time-and-Materials/Labor-Hour Proposal Requirements—Commercial Item Acquisition As prescribed in 16.601(e)(3), insert the following provision:

(a) The Government contemplates award of a Time-and-Materials or Labor-Hour type of contract resulting from this solicitation.

(b) The offeror must specify fixed hourly rates in its offer that include wages, overhead, general and administrative expenses, and profit. The offeror must specify whether the fixed hourly rate for each labor category applies to labor performed by—

   (1) The offeror;

   (2) Subcontractors; and/or

   (3) Divisions, subsidiaries, or affiliates of the offeror under a common control.

13. **RESUMES**

Resumes shall be provided to the GSA Contracting Officer or the user ordering activity upon request.

14. **INCIDENTAL SUPPORT COSTS**

Incidental support costs are available outside the scope of this contract. The costs will be negotiated separately with the ordering activity in accordance with the guidelines set forth in the FAR.

15. **APPROVAL OF SUBCONTRACTS**

The ordering activity may require that the Contractor receive, from the ordering activity's Contracting Officer, written consent before placing any subcontract for furnishing any of the work called for in a task order.

16. **DESCRIPTION OF IT PROFESSIONAL SERVICES AND PRICING**

Please refer to the information provided below.
### Experience Substitutions Methodology:

<table>
<thead>
<tr>
<th>Experience Substitution</th>
<th>Education Level</th>
</tr>
</thead>
<tbody>
<tr>
<td>High School Diploma + 4 years additional experience</td>

**Title:** Systems Administrator III  
**Minimum Education:** Associates Degree in an IT Related Field  

| Minimum Experience: | Five years of general experience or three years of specialized experience in a systems administration environment is required. Knowledge of IT best practices and principles needed to solve computer and software problems. Highly developed interpersonal, written, and verbal communications skills; Strong analytical, documentation, proactive thinking and project management skills. Advanced IT troubleshooting skills. Knowledge of network and server deployments. Experience with laptop and PC setup. |

**Functional Duties/Responsibilities:** Effectively provision, install/configure, operate, and maintain systems hardware and software and related infrastructure. This includes install new/rebuild existing servers and configure hardware, peripherals, services, settings, directories, storage, etc. in accordance with standards and project or operational requirements. Develop and maintain installation and configuration procedures. Conduct capacity and performance analysis and provide system configuration change and upgrade recommendations to maintain updated systems standards. Research and recommend innovative, and where possible automate approaches for systems administration tasks to promote innovation within the infrastructure. Identify approaches that leverage the company’s resources and provide economies of scale. Participation on projects is focused on smoothing the transition of projects from development staff to production staff by performing operations activities within the project life-cycle and providing assistance to users in accessing and using systems. Accountable for the Linux and Windows operating systems of the business; Linux, Windows and Application systems that support the business; and support, maintenance and research on these systems to ensure process improvement. Ability to mentor and/or manage more junior team members.  

---

**Title:** System Engineer I  
**Minimum Education:** Associates Degree in an IT Related Field  

| Minimum Experience: | One year of experience with systems engineering practices. Hands on experience with Windows 2008 Server and Exchange server 2010. Solid troubleshooting skills are necessary and may happen at all layers. Knowledgeable in multiple current technology areas, including relational database platforms, client/server computer operating systems (thick & thin clients), networking hardware, protocols and administration, project management, and system integration across multi-tiered IT environments. |
### Functional Duties/Responsibilities:

Analyze system capacity and throughput requirements in response to demand forecasts and operations trends to determine, plan, and provide for system capabilities required for projected workloads. Work under supervision and assistance of senior staff to provide the customer with reliable technical solutions related to the deployed systems. Plan layout and install new systems or modification of existing systems. May set up and control analog or hybrid computer systems to solve mission-specific engineering problems. Recognize and recommend new or emerging technology or software to satisfy functional requirements and processes. Provide highly technical and/or specialized guidance concerning automation solutions to complex information processing problems related to subject field. Provide customer support using enterprise solutions software to integrate business areas, consistent with today’s technology in order to operate in an open systems environment and client service architectures.

### Title: System Engineer II

#### Minimum Education:

- Associates Degree in an IT Related Field

#### Minimum Experience:

- Three years of general experience or one year of specialized experience with systems engineering practices. Hands on experience with Windows 2008 Server and Exchange server 2010. Experience with Dell PowerEdge servers and VMware ESX 3.5 or above. Solid troubleshooting skills are necessary and may happen at all layers. Knowledgeable in multiple current technology areas, including relational database platforms, client/server computer operating systems (thick & thin clients), networking hardware, protocols and administration, project management, and system integration across multi-tiered highly secure IT environments.

### Functional Duties/Responsibilities:

Analyze system capacity and throughput requirements in response to demand forecasts and operations trends to determine, plan, and provide for system capabilities required for projected workloads. Provide assistance to junior staff and take direction from senior staff to provide the customer with reliable technical solutions related to systems deployment. Plan layout and installation of new systems or modification of existing systems. May set up and control analog or hybrid computer systems to solve mission-specific engineering problems. Recognize and recommend new or emerging technology or software to satisfy functional requirements and processes. Provide highly technical and/or specialized guidance concerning automation solutions to complex information processing problems related to the subject field. Provide customer support using enterprise solutions software to integrate business areas, consistent with today’s technology in order to operate in an open systems environment and client service architectures. Ability to mentor and/or manage more junior team members.

### Title: System Engineer III

#### Minimum Education:

- Bachelors Degree in an IT Related Field

#### Minimum Experience:

- Five years of general experience or three years of specialized experience with systems engineering practices. Hands on experience with Windows 2008 Server and Exchange server 2010. Experience with Dell PowerEdge servers. Broad experience installing, configuring, and maintaining Active Directory environment. Experience with VMware ESX 3.5 or above. Solid troubleshooting skills are necessary and may happen at all layers. Knowledgeable in multiple current technology areas, including relational database platforms, client/server computer operating systems (thick & thin clients), networking hardware, protocols and administration, project management, and system integration across multi-tiered highly secure IT environments.
**Functional Duties/Responsibilities:**
Analyze system capacity and throughput requirements in response to demand forecasts and operations trends to determine, plan, and provide for system capabilities required for projected workloads. Ability to mentor and/or manage more junior team members. Plan layout and installation of new systems or modification of existing systems. May set up and control analog or hybrid computer systems to solve mission-specific engineering problems. Recognize and recommend new or emerging technology or software to satisfy functional requirements and processes. Provide highly technical and/or specialized guidance concerning automation solutions to complex information processing problems related to the subject field. Provide customer support using enterprise solutions software to integrate business areas, consistent with today’s technology in order to operate in an open systems environment and client service architectures. Oversee junior staff in completion of daily tasks and projects.

<thead>
<tr>
<th>Title:</th>
<th>System Architect</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimum Education:</td>
<td>Bachelors Degree in an IT Related Field</td>
</tr>
<tr>
<td>Minimum Experience:</td>
<td>Seven years of general experience or five years of specialized experience in a systems architect environment. At least three years of experience as a lead engineer or architect. Extensive experience building high traffic enterprise systems. Strong understanding of high performance system architectures and patterns. Previous experience creating detailed system and functional requirements documentation including infrastructure requirements and test plans. Knowledgeable in updated cloud architectures. Strong practical working skills with Java, Apache, Tomcat, Linux, Windows, MySQL. Solid and demonstrated TCP/IP knowledge. Excellent writing skills, to communicate information effectively to customers, marketing, executives, and technical staff. Proactive, collaborative, and high-energy attitude.</td>
</tr>
</tbody>
</table>

<p>| Functional Duties/Responsibilities: | Interface with the customer, management and all other stakeholders in order to determine their needs. Generate systems requirements at a consistent, complete, correct and operationally defined high level, based on the user’s needs and other constraints such as cost and schedule. Perform cost-benefit analyses to determine whether requirements are best met by manual, software, or hardware functions; making maximum use of commercial off-the-shelf or already developed components. Developing partitioning algorithms to allocate all present and foreseeable requirements into discrete partitions such that a minimum of communications is needed among partitions, and between the user and system. Ensure that a maximally robust systems design is developed. Ensures these systems are compatible and in compliance with the standards for open systems architectures, the Open Systems Interconnection (OSI) and International Standards Organization (ISO) reference models, and profiles of standards - such as Institute of Electrical and Electronic Engineers (IEEE) Open Systems Environment (OSE) reference model - as they apply to the implementation and specification of Information Management (IM) solution of the application platform, across the application program interface (API), and the external environment/software application. Generate products such as sketches, models, and early user guide, and prototypes to keep the user and the engineers constantly up to date and in agreement on the system to be provided as it is evolving. Ensure that all architectural products and products with architectural input are maintained in the most current state and never allowed to become obsolete. |</p>

### Title: Storage Area Network (SAN) Engineer I

**Minimum Education:** Associates Degree in an IT Related Field

**Minimum Experience:** One year of experience in a NetApp delivery environment. Previous NetApp systems engineer and storage experience. Strong foundation in NetApp storage and SnapSuite of software (SnapManager, etc.). Some experience with NetApp storage efficiencies (RAID-DP, dedupe, Thin Provisioning, SnapShots). Experience with 6xxx series products and current revisions of Data ONTAP. Fundamental understanding on NAS and SAN environments and technologies. Experience with installation/Configuration; ONTAP upgrades/downgrades as well as with both block level and file level data migrations. VMware knowledge is preferred. Ability to maintain technology expertise & currency in NetApp technologies.

**Functional Duties/Responsibilities:**
Primary responsibility is to deliver NetApp products as a part of a team. Assist in the design and/or recommendation of technical solutions based on NetApp Storage Solutions. Facilitate long-term customer relationships through the delivery of technical solutions to customer business problems. Participate in prospective client meetings, presentations, conference calls, web conferences, and whiteboard sessions. Provide assistance to senior staff to provide the customer with reliable technical solutions related to NetApp storage deployment. Provide input to a detailed Situation Report to upper management to track the deployment progress. Assist other team members in troubleshooting NetApp issues.

### Title: Storage Area Network (SAN) Engineer II

**Minimum Education:** Associates Degree in an IT Related Field

**Minimum Experience:** Three years of general experience or one year of specialized experience in a NetApp delivery environment, with tier 2 support and customer service skills as well as strong communication and interpersonal skills. Previous NetApp systems and storage experience. Strong foundation in NetApp storage and SnapSuite of software (SnapManager, etc.). ### Web/Portal Developer I

**Title:** Web/Portal Developer I  
**Minimum Education:** Associates Degree in an IT Related Field  
**Minimum Experience:** One year of experience in a SharePoint environment, with top level support and customer service skills and strong communication and interpersonal skills. Experience with SQL Server 2005 or 2008 is required as well as a solid understanding of SharePoint 2007 architecture and content management concepts. Experience with third party Workflow, Content Management, and Business Intelligence tools and knowledge and experience using SharePoint Designer. Required documented experience in web design and enterprise portal management. Experience in a .Net environment, HTML, JavaScript, Cascading Style Sheets (CSS) and ASP. Knowledge and experience integrating SharePoint with Microsoft Office System, Microsoft Active Directory, and other tools and applications.  
**Functional Duties/Responsibilities:** Work with senior staff in deploying, maintaining, upgrading, troubleshooting and monitoring a SharePoint environment. Provides hardware and software support as required. Works under the supervision of senior staff to perform a variety of SharePoint engineering tasks, which are broad in nature and are concerned with the design, implementation, and operations of integrated portals. Provides the customer with reliable technical solutions related to portals using Windows SharePoint Services, SharePoint Portal Server and Microsoft Office SharePoint Server. Ability to assist with the migration of Microsoft and non-Microsoft applications to SharePoint and to assist Senior Leaders in developing custom Command Portal views and settings. Assist other team members in troubleshooting, porting/migration, configuration/administration management, pre-rollout testing and general development consulting. Design or set page layouts, graphics, color schemes and infrastructure to meet customer's needs.

### Title: Subject Matter Expert II

**Minimum Education:** Bachelor's Degree in an IT Related Field

**Minimum Experience:** Ten years of general experience in the designated area of expertise or seven years of specialized experience. Outstanding written and oral communication skills. Related knowledge and experience in business management, core system configuration; software development life cycle (SDLC); Report, Interface, Conversion, Enhancement & Forums (RICEF) development; systems testing; and business process re-engineering are beneficial. Knowledgeable in a particular area of Information Technology (e.g., Information Systems Architecture, Telecommunications Systems Design, Architecture, Implementation, Information Systems Integration, Software Development Methodologies, Security Engineering, Communications and Network Systems Management), or a specific functional area (e.g., finance, logistics, and operations research).

**Functional Duties/Responsibilities:** Provide guidance on resolving an organizational need, and actively participate in all phases of the software development life cycle. Under broad direction, provide support, analysis and research into especially complex problems, and processes relating to the subject matter. Serve as the technical specialist on high-level project teams providing technical direction, interpretation and alternatives. Provide technical solutions to a wide range of difficult problems. Contribute to the completion of specific programs and projects.

### Title: Project Manager I

**Minimum Education:** Bachelor's Degree in an IT Related Field

**Minimum Experience:** Three years of project management experience. Possesses a broad and deep knowledge of the IT industry, business administration, and human resource management.

**Functional Duties/Responsibilities:** Acts as the central point of contact and coordinating the management of all work performed under a task order. Coordinates the efforts of team members, vendors, and similar and report to the Program Manager if applicable. Facilitates the designated team to complete the job at hand under a predetermined deadline. Oversees the operational planning, establishment, execution, and evaluation of a multifaceted project typically consisting of a set of closely related subprojects or associated activities. Leads all aspects of project startup and ongoing execution, to include the identification, tracking, managing, and resolving of project issues; proactively disseminate project information to all stakeholders; identify, manage and mitigates project risk; ensures that the solution is of acceptable quality; proactively manages scope to ensure that only what was agreed to is delivered, unless changes are approved through scope management; defines and collects metrics to give a sense for how the project is progressing and whether the deliverables produced are acceptable; and manages the overall schedule to ensure work is assigned and completed on time and within budget.

### Title: Project Manager II

**Minimum Education:** Bachelor's Degree in an IT Related Field

**Minimum Experience:** Five years of project management experience. Possesses a broad and deep knowledge of the IT industry, business administration, and human resource management.

<tr>
<td>Functional Duties/Responsibilities:</td>
<td>Plan, test, install, and integrate new and upgraded versions of the relevant operating systems on organizational computer systems, all third-party software components, and subsystems. Researches and resolves complex systems software problems efficiently and accurately while adhering to internal software management standards and procedures. Provides technical support to applications and utility developers on requirements for integration into the operating environment. Serves as technical referent on engineering review boards considering all additions to or changes to the operating environment. Compose technical documents including, user's manuals, training materials, installation guides, proposals, and reports. Edit functional descriptions, system specifications, user's manuals, special reports, or any other customer deliverables and documents. Conduct research and ensure the use of proper technical terminology.</td>

<td>Five years of experience in a converged Cisco environment, with top level support and customer service skills. Relevant hands-on experience with firewalls, IDS, and DMZs. Experience with network services like DNS, DHCP, Radius, TACACS, SNMP, LDAP, SMTP, and NFS. Working knowledge of TCP/IP, LAN, WAN, and VPNs. Knowledge and experience with layer 2 and layer 3 switching, RIP, OSPF and BGP.</td>
</tr>
</tbody>
</table>

| Functional Duties/Responsibilities: | Plans, directs and coordinates network operation and performance functions to ensure network availability and high quality transmissions. Responsible for personnel and activities involved in monitoring, isolating, resolving and circumventing network problems. Advises management and interfaces with customers concerning problems affecting network performance. Plans implementation of enhancements and upgrades to the network and the acquisition, installation and testing of network hardware and software. Manages resource usage to minimize costs and maximize network availability. Interfaces with users to define present network needs and plan for future requirements. Analyzes user needs to determine functional and cross-functional requirements. Performs functional allocation to identify required tasks and their interrelationships. Applies business process improvement practices to re-engineer methodologies/principles and business process modernization projects. Applies, as appropriate, activity and data modeling, transaction flow analysis, internal control and risk analysis and modern business methods and performance measurement techniques. Assists in establishing information technology standards for information systems procedures. Constructs sound, logical business improvement opportunities consistent with current government and industry best practice guiding principles, cost savings, and Information Assurance open system architecture objectives. Supervise and provide technical assistance to the designated network team. Support the planning and performance of network engineering research, design development, operations, and other assignments in conformance with network design, engineering, and customer specifications. |

### Functional Duties/Responsibilities:
Develops information retrieval solutions to support client requirements for specified domain subjects, using information retrieval software languages and automated text analysis and extraction techniques. Carries out highly-complex information systems and/or information technology tasks within more than one discipline. Disciplines may include, but are not limited to, application support, database administration, software quality assurance/quality control, software engineering, network telecommunications, and infrastructure operations of administration, analysis, engineering and design. Incumbent monitors and supports the information technology and systems infrastructures. Troubleshoots and resolves highly complex problems. Implements various applications of a highly complex nature. Conducts analysis including planning, designing, and evaluating a variety of highly complex information technology tools. Responds to user requests for system needs and upgrades. Requires initiative and independent judgment outside of the standard methodology, techniques, procedures and criteria. Develops and improves processes and procedures. Sought as a resource for resolution of unique or complex problems.

**Functional Duties/Responsibilities:**

"Responsible for supporting cybersecurity systems integration efforts by performing hands-on operational support for asset management and vulnerability assessment functions. The Security Engineer will also coordinate with other Service Area representatives to support issue, problem and incident management activities as required. The Security Engineer is familiar with the methodologies and tools used to support Continuous Diagnostic and Monitoring (CDM) capabilities. The candidate will work closely with the CDM solution engineers, testers, training teams and the agencies themselves to ensure a successful operations and maintenance of the existing and new capabilities. Responsibilities include, but are not limited to the following:

- Evaluating security risks of applications, systems and networks.
- Developing, writing, and maintaining Security Plans for complex applications.
- Demonstrated experience engineering security solutions for medium-to-large complex IT development efforts involving both software and hardware.
- Assist in implementing data protection levels and encryption standards.
- Providing technical direction in implementing defense in depth strategies for sensitive workloads.
- Identifying deficiencies/weaknesses discovered in customer's systems and recommend corrective actions to address identified vulnerabilities and non-compliance of systems, including infrastructure.
- Utilizing applications and AWS services to support audit and continuous monitoring functions to ensure the security posture of system.
- Performing insider threat mitigation, and alignment to NIST Standards.

Functional Duties/Responsibilities:

The candidate will ensure that security requirements for information systems meet FISMA requirements. The candidate will be responsible for:

- Developing and updating security authorization packages in accordance with the client’s requirement and compliant with FISMA. Core documents that the candidate will be responsible for are the System Security Plan, Risk Assessment Report, Security Assessment Plan and Report, Contingency Plan, Incident Response Plan, Standard Operating Procedures, Plan of Actions and Milestones, Remediation Plans, Configuration Management Plan, etc.
- Develop and maintain the Plan of Action and Milestones and support remediation activities
- Validate that protective measures for physical security are in place to support the systems security requirements
- Maintaining an inventory of hardware and software for the information system
- Developing, coordinating, testing and training on Contingency Plans and Incident Response Plans
- Perform risk analyses to determine cost-effective and essential safeguards
- Support Incident Response and Contingency activities
- Able to perform security control assessment in using NIST 800-53A guidance
- Conduct Independent scans of the application, network and database (where required)
- Provide continuous monitoring to enforce client security policy and procedures and create processes that will provide oversight into the following activities for the system owner
- Experience in • Federal Government Information Assurance policies and regulations to include OMB requirements, FISMA, and NIST 800 series
  • OMB A-123 circular; OMB A-130 circular; FIPS 140, 199, 200, 201; NIST SP 800-18, 37 Revision 1, 39, 53 Revisions 3 and 4, 53A Revision 1, 60 Volumes 1 and 2, 800-64 Revision 2, 137, 144, 147; CNSS 1253 and risk management methodologies
  • Automated vulnerability and risk assessment tools such as Nessus, AppDetective/DbProtect, Hailstorm, McAfee Vulnerability Manager (Foundstone), and NMAP

Title: Cyber PM
Minimum Education: Bachelor's degree in Computer Science, Information Systems or Cybersecurity or Program Management
Minimum Experience: Requires at least 10 years experience managing a diverse technical team.
Functional Duties/Responsibilities: Oversees the Contract. Ensures the completion of personnel tasks to ensure the information technology services provided to client are effective and efficiently delivered. Directly manages subordinate staff and the delivery of the services required under the Task Order so that the stated requirements are met in a timely manner. Interacts with technical client staff to ensure services and solutions under the delivery order satisfy technical requirements within approved resource levels.

Title: Cyber SME
Minimum Education: Bachelor's degree in Computer Science, Information Systems or Cybersecurity
Minimum Experience: Requires 10 years of experience and expertise in computer forensics, incident response, and information security.
Functional Duties/Responsibilities: Acts as the Senior Advisor to Senior Government Leadership and staff on matters related to cybersecurity technology, operations and policy. Expert knowledge is required in these areas. Must have specific knowledge and understanding of large scale enterprise technology, network operations, and cyber requirements. Requires that they guide the client in formulating requirements, advise on alternative approaches, and conduct strategic analysis. They approve and monitor technical planning as contained in Task Order scheduling. Assist the Program Manager with the organization and leading of teams. Requires expertise with Knowledge Management and process creation.

</table>
### Notes:

1. **Intelligent Waves is offering government site labor rates.**

2. **The rates in this pricelist are for CONUS contract locations. For OCONUS efforts, Intelligent Waves’ rates will be adjusted using the Department of State and Department of Defense practices for deployed personnel. Other related international expenses required to support employees outside of the Continental United States will also be included. OCONUS efforts will be negotiated specifically with ordering activities on an individual task order basis.**
