- a) The maintenance and/or repair service rates per the contract are applicable to any ordering activity locations within the 48 contiguous states, Alaska, Hawaii, Puerto Rico, Washington, DC, and U.S. Territories. If any additional charge is to apply because of the greater distance from the Contractor/OEM service locations, the mileage rate or other distance factor shall be negotiated at the Task Order level.
- b) When maintenance and/or repair services cannot be performed at the ordering activity installation site, the repair services will be performed at the Contractor's plant(s) listed below:

1700 N Moore St Ste 1810		
Address		
ARLINGTON	VA	22209-2793
City	State	Zip Code

2) Loss or Damage

When the Contractor moves equipment to its/OEM location for repairs, the Contractor shall be responsible for any damage or loss, from the time the equipment is removed from the ordering activity installation, until the equipment is returned to such installation.

3) Scope

- a) The Contractor shall provide maintenance for all equipment listed herein, as requested by the ordering activity during the contract term. Repair service and repair parts/spare parts shall apply exclusively to the equipment types/models within the scope of the Information Technology Category.
- b) Equipment placed under maintenance and/or service shall be in good operating condition.
  - i) In order to determine that the equipment is in good operating condition, the equipment shall be subject to inspection by the Contractor, without charge to the ordering activity.
  - ii) Costs of any repairs performed for the purpose of placing the equipment in good operating condition shall be borne by the Contractor, if the equipment was under the Contractor/OEM guarantee/warranty or maintenance responsibility prior to the effective date of the maintenance order.
  - iii) If the equipment was not under the Contractor/OEM responsibility, the costs necessary to place the equipment in proper operating condition are to be borne by the ordering activity, in accordance with the provisions of the contract.

4) Responsibilities

- a) For equipment not covered by a maintenance contract or warranty, repair service personnel shall complete repairs as soon as possible after notification by the ordering activity that service is required. Within the service areas, this repair service should normally be done within 4 hours after notification.

- b) If the Ordering Activity task or delivery order specifies a factory authorized/certified service personnel then the Contractor is obligated to provide such a factory authorized/certified service personnel for the equipment to be repaired or serviced, unless otherwise agreed to in advance between the Ordering Activity and the Contractor.
- 5) Repair Service Rate Provisions
- a) Charges for repair service will include the labor charge, computed at the rates set forth below, for the time during which repairmen are actually engaged in work, and, when applicable, the charge for travel or transportation.
  - b) Multiple Machines: When repairs are ordered by the ordering activity on two or more machines located in one or more buildings within walking distance of each other, the charges will be computed from the time the repairman commences work on the first machine, until the work is completed on the last machine. The time required to go from one machine to another, or from one building to another, will be considered actual work performance, and chargeable to the ordering activity, provided the time consumed in going between machines (or buildings) is reasonable.
  - c) At the Contractor/OEM's Facility
    - i) When equipment is returned to the Contractor/OEM's Facility for adjustments or repairs which are not covered by the guarantee/warranty provision, the cost of transportation, packing, etc. from the ordering activity location to the Contractor's plant, and return to the ordering activity location, shall be borne by the ordering activity.
    - ii) The ordering activity should not return defective equipment to the Contractor/OEM for adjustments and repairs or replacement without prior consultation and instruction.
  - d) At the Ordering Activity Location (Within Established Service Areas)
    - i) When equipment is repaired at the ordering activity location, and repair service rates are established for service areas or zones, the listed rates are applicable to any ordering activity location within such service areas or zones. No extra charge, time, or expense will be allowed for travel or transportation of repairmen or machines to or from the ordering activity office; such overhead is included in the repair service rates.
  - e) At the Ordering Activity Location (Outside Established Service Areas)
    - i) If repairs are to be made at the ordering activity location, and the location is outside the service area terms defined in the GSA Price list. Rates negotiated at the task order will apply.
    - ii) When the overall travel charge computed at the above mileage rate is unreasonable (considering the time required for travel, actual and necessary transportation costs, and the allowable ordering activity per diem rate for each night the repairman is required to remain overnight at the ordering activity location), the ordering activity shall have the option of reimbursing the Contractor for actual costs, provided that the actual costs are reasonable and allowable. The Contractor shall furnish the ordering activity with a report of travel performed and related expenses incurred. The report shall include departure and arrival dates, times, and the applicable mode of travel.
  - f) Labor Rates
    - i) Regular Hours: Contract rates shall entitle the ordering activity to repair service during the period 8:00 a.m. to 5:00 p.m., Monday through Friday, exclusive of holidays observed at the ordering activity location. - ii) After Hours: When the ordering activity requires that repair service be performed outside the Regular Hours defined above, except Sundays and Holidays observed at the ordering activity location, the After-Hours repair service rates listed herein shall apply. The Regular Hours rates defined above shall apply when repair service is requested during Regular Hours but performed After Hours at the convenience of the Contractor.

### Descriptions and Equipment Compatibility

The Contractor shall include, in the schedule pricelist, a complete description of each software product and a list of equipment on which the software can be used. Also, included shall be a brief, introductory explanation of the modules and documentation which are offered.

Right-to-Copy Pricing: Licensee may make one copy of Software to be used solely for archival, backup, or disaster recover purposes; provided that Licensee may not operate that copy of the Software at the same time as the original Software is being operated.

### Utilization Limitations

- a) Software acquisition is limited to commercial computer software defined in FAR Part 2.101.
- b) When acquired by the ordering activity, commercial computer software and related documentation shall be subject to the following:
  - i. Title to and ownership of the software and documentation shall remain with the Contractor, unless otherwise specified.
  - ii. Software licenses are by site and by ordering activity. An ordering activity is defined as a cabinet level or independent ordering activity. The software may be used by any subdivision of the ordering activity (service, bureau, division, command, etc.) that has access to the site the software is placed at, even if the subdivision did not participate in the acquisition of the software. Further, the software may be used on a sharing basis where multiple agencies have joint projects that can be satisfied by the use of the software placed at one ordering activity's site. This would allow other agencies access to one ordering activity's database. For ordering activity public domain databases, user agencies and third parties may use the computer program to enter, retrieve, analyze and present data. The user ordering activity will take appropriate action by instruction, agreement, or otherwise, to protect the Contractor's proprietary property with any third parties that are permitted access to the computer programs and documentation in connection with the user ordering activity's permitted use of the computer programs and documentation. For purposes of this section, all such permitted third parties shall be deemed agents of the user ordering activity.
  - iii. Except as provided above, the ordering activity shall not provide or otherwise make available the software or documentation, or any portion thereof, in any form, to any third party without the prior written approval of the Contractor. Third parties do not include prime Contractors, subcontractors and agents of the ordering activity who have the ordering activity's permission to use the licensed software and documentation at the facility, and who have agreed to use the licensed software and documentation only in accordance with these restrictions. This provision does not limit the right of the ordering activity to use software, documentation, or information therein, which the ordering activity may already have or obtains without restrictions.
  - iv. The ordering activity shall have the right to use the software and documentation with the run-time computing environment (e.g. operating system, virtual machine, mobile operating system, processor etc.) to be specifically identified for which it is acquired at any other facility/user device to which that time computing environment may be transferred, or in cases of Disaster Recovery, the ordering activity has the right to transfer the software to another site/user device if the ordering activity site for which it is acquired is deemed to be unsafe for ordering activity personnel; to use the software and documentation with a backup time computing environment when the primary is inoperative; to copy computer programs for safekeeping (archives) or backup purposes; to transfer a copy of the software to another site/user for purposes of benchmarking new hardware and/or software; and to modify the software and documentation or combine it with other software, provided that the unmodified portions shall remain subject to these restrictions.
  - v. "Commercial Computer Software" may be marked with the Contractor's standard commercial restricted rights legend, but the schedule contract and schedule pricelist, including this clause, "Utilization Limitations" are the only governing terms and conditions, and shall take precedence and

supersede any different or additional terms and conditions included in the standard commercial legend.

- vi. Licensee Data belongs exclusively to Licensee, regardless of where the Data may reside at any moment in time including, but not limited to Licensor hardware, networks or other infrastructure and facilities where Data may reside, transit through or be stored from time to time. Licensor makes no claim to a right of ownership in Licensee Data. Licensor agrees to keep the Licensee Data Confidential as that term is defined in the relevant FAR and DFARS provisions pertaining to Confidential Information and Confidentiality. Licensor is not permitted to use Licensee's data for a purpose that is not explicitly granted in writing by Licensee. Upon Licensee request, for any reason whatsoever, Licensor must promptly return all Licensee Data in Licensor's possession in a format as may be designated at the time of request by Licensee.
- vii. Licensee may create or hire others (including Licensor) to create modifications, customizations or other enhancements to the Software which might be classified as "Derivative Works" of the software. Unless otherwise negotiated and mutually agreed upon at the order level, the intellectual property (IP) rights to the Derivative Works shall be owned by the owner of the underlying intellectual property. The Derivative Work[s] shall be made available to the Licensee through a royalty free, perpetual worldwide, no charge license to the Licensee.

#### **Specific Instructions for SIN 511210 - Software Licenses**

- Edge Digital Group, Inc. is not offering SIN 54151 Software Maintenance Services in conjunction with SIN 511210 - Software Licenses.
- Offerors are encouraged to identify within their software items any component interfaces that support open standard interoperability. An item's interface may be identified as interoperable on the basis of participation in a Government agency-sponsored program or in an independent organization program. Interfaces may be identified by reference to an interface registered in the component registry located at <http://www.core.gov>.

#### **Conversion from Term License to Perpetual License**

- i. When standard commercial practice offers conversions of term licenses to perpetual licenses, and an ordering activity requests such a conversion, the contractor shall provide the total amount of conversion credits available for the subject software within ten (10) calendar days after placing the order.
- ii. When conversion credits are provided, they shall continue to accrue from one contract period to the next, provided the software has been continually licensed without interruption.
- iii. The term license for each software product shall be discontinued on the day immediately preceding the effective date of conversion from a term license to a perpetual license.
- iv. When conversion from term licenses to perpetual licenses is offered, the price the ordering activity shall pay will be the perpetual license price that prevailed at the time such software was initially ordered under a term license, or the perpetual license price prevailing at the time of conversion from a term license to a perpetual license, whichever is the less, minus an amount equal to a percentage of all term license payments during the period that the software was under a term license within the ordering activity.

#### **Term License Cessation**

- i. After a software product has been on a continuous term license for a period of TBD, a fully paid-up, non-exclusive, perpetual license for the software product shall automatically accrue to the ordering activity. The period of continuous term license for automatic accrual of a fully paid-up perpetual license does not have to be achieved during a particular fiscal year; it is a written Contractor commitment which continues to be available for software that is initially ordered under this contract, until a fully paid-up perpetual license accrues to the ordering activity. However, should the term license of the software be discontinued before the specified period of the continuous term license has been satisfied, the perpetual license accrual shall be forfeited. Contractors who do not commercially offer conversions of term licenses to perpetual licenses shall indicate that their term licenses are not eligible for conversion at any time.
- ii. Each separately priced software product shall be individually enumerated, if different accrual periods apply for the purpose of perpetual license attainment.

## Utilization Limitations for Perpetual Licenses

- i. Software Asset Identification Tags (SWID) (Option 1 Perpetual License)
  1. Option 1 is applicable when the Offeror agrees to include the International Organization for Standardization/International Electrotechnical Commission 19770-2 (ISO/IEC 19770- 2:2015) standard identification tag (SWID Tag) as an embedded element in the software. An ISO/IEC 19970-2 tag is a discoverable identification element in software that provides licensees enhanced asset visibility. Enhance visibility supports both the goals of better software asset management and license compliance. Offerors may use the National Institute of Standards and Technology (NIST) document “NISTIR 8060: Guidelines for Creation of Interoperable Software Identification (SWID) Tags,” December 2015 to determine if they are in compliance with the ISO/IEC 19770-2 standard.
  2. Section 837 of The Federal Information Technology Acquisition Reform Act (FITARA) of 2014, requires GSA to seek agreements with software vendors that enhance government- wide acquisition, shared use, and dissemination of software, as well as compliance with end user license agreements. The Megabyte Act of 2016 requires agencies to inventory software assets and to make informed decisions prior to new software acquisitions. In June of 2016, the Office of Management and Budget issued guidance on software asset management requiring each CFO Act (Public Law 101-576 – 11/15/1990) agency to begin software inventory management (M-16-12). To support these requirements, Offerors may elect to include the terms of Option 1 and/or Option 2, which support software asset management and government-wide reallocation or transferability of perpetually licensed software.
- ii. Reallocation of Perpetual Software (Option 2 Perpetual License)
  1. The purpose of SIN 511210 OPTION 2 is to allow ordering activities to transfer software assets for a pre-negotiated charge to other ordering activities.
  2. When an ordering activity becomes aware that a reusable software asset may be available for transfer, it shall contact the Contractor, identify the software license or licenses in question, and request that these licenses be reallocated or otherwise made available to the new ordering activity.
  3. Contractors shall release the original ordering activity from all future obligations under the original license agreement and shall present the new ordering activity with an equivalent license agreement. When the new ordering activity agrees to the license terms, henceforth any subsequent infringement or breach of licensing obligations by the new ordering activity shall be a matter exclusively between the new ordering activity and the Contractor.
  4. The original ordering activity shall de-install, and/or make unusable all of the software assets that are to be transferred. It shall have no continuing right to use the software and any usage shall be considered a breach of the Contractor’s intellectual property and a matter of dispute between the original ordering activity/original license grantee and the licensor.
  5. As a matter of convenience, once the original licenses are deactivated, di-installed, or made otherwise unusable by the original ordering activity or license grantee, the Contractor may elect to issue new licenses to the new ordering activity to replace the old licenses. When new licenses are not issued, the Contractor shall provide technical advice on how best to achieve the functional transfer of the software assets.
  6. Software assets that are eligible for transfer that have lapsed Software Maintenance Services (SIN 54151) may require a maintenance reinstatement fee, chargeable to the new ordering activity or license grantee. When such a fee is paid, the new ordering activity shall receive all the rights and benefits of Software Maintenance Services.
  7. When software assets are eligible for transfer and are fully covered under pre-paid Software Maintenance Services (SIN 54151), the new ordering activity shall not be required to pay maintenance for those license assets prior to the natural termination of the paid for maintenance period. The rights associated with paid for current Software Maintenance Services shall automatically transfer with the

software licenses without fee. When the maintenance period expires, the new ordering activity or license grantee shall have the option to renew maintenance.

8. The administrative fee to support the transfer of licenses, exclusive of any new incremental licensing or maintenance costs shall be 20 percentage (%) of the original license fee. The fee shall be paid only at the time of transfer. In applying the transfer fee, the Software Contractor shall provide transactional data that supports the original costs of the licenses.

#### Software Conversions

Full monetary credit will be allowed to the ordering activity when conversion from one version of the software to another is made as a result of a change in operating system, or from one computer system to another. Under a perpetual license, the purchase price of the new software shall be reduced by the amount that was paid to purchase the earlier version. Under a term license, if conversion credits had accrued while the earlier version was under a term license, those credits shall carry forward and remain available as conversion credits which may be applied towards the perpetual license price of the new version.

# Kodak Alaris Inc. Software End User License Agreement

dated July 9, 2018

Read the following terms and conditions carefully before installing or using the Software (defined below) you have acquired. Your installation and use of this Software constitutes acceptance of these terms and conditions. If you are under the age of 18, you should review these terms and conditions with your parent or guardian to make sure that you and your parent or guardian understand these terms and conditions. These terms supersede and replace all previous terms and conditions between Kodak Alaris Inc. (the "Company") and you, unless the parties have expressly agreed in writing otherwise.

## LICENSE

"You" means either (a) in the case of an individual the person over the age of 18 entering into this License or (b) in the case of a corporation (or other legal entity) the party for whom this License is being agreed to on behalf of an authorized person having authority to bind the party.

This End User License Agreement ("License") applies to [NAME OF SOFTWARE]. The term "Software" applies to the software components you install on your own computers and devices, as well as software components hosted by 3<sup>rd</sup> parties accessed through the software you installed; and all related documentation that accompanies these software components.

References to the Company's licensors refer to any third parties licensing all or any portion of such Software to Kodak Alaris Inc, ("Company"), including all companies, subsidiaries and all related companies. This License is specifically intended for the benefit of the Company, its subsidiaries, related companies and any licensors.

- 1. Grant of License.** So long as you are in compliance with this Agreement, we grant you a non-exclusive license to use one instance of the Software at a time for internal use and not in connection with software as a service, solely for intended purposes, and further subject to the license restrictions set forth below. No rights to the use of any Company or its licensors', names, logos or trademarks are conveyed by this License. This Agreement is not for the sale of Software or any other intellectual property. All right, title, interest, and intellectual property rights in and to the Software are owned by the Company or its licensors.
- 2. Restrictions on Use.** You may use only one instance of the Software at a time and only for internal use. For each additional instance of the Software running at the same time, you must obtain an additional license for the Software. If you purchased Client Access Licenses (please see your invoice to confirm whether this is applicable), multiple users may work with the Software concurrently, in the number specified. You may not use the Software in connection with software as a service. The Software may contain subroutine libraries and sample files. You may not modify any of these files for any reason. You may use the Software solely for its intended purposes as defined by the Company.
- 3. Transfer of the Software.** You may not transfer the Software to another party. You may not further redistribute, sublicense, rent, loan or lease the Software to a third party.
- 4. Copyright.** The Software is owned by the Company, its licensors or its suppliers and protected by copyright laws and international treaties. You may not copy the Software. You may not reverse engineer, decompile, disassemble or otherwise attempt to derive the source code for the Software, or use any part of the Software for any use other than that for which it was supplied by us, unless specifically authorized by the Company. You may not modify, adapt, alter, translate, or create derivative works from the Software, merge the Software with other software, or integrate the Software into third party solutions.
- 5. Term.** This License is effective until terminated. You may terminate it at any time by destroying the Software together with all copies in any form. It will also automatically terminate if you fail to comply with any term or condition of this license. Upon termination, for any reason, you agree to destroy the Software together with all copies in any form. Provisions which, by their nature, should remain in effect beyond termination of this Agreement shall survive. The Company may terminate this Agreement, at any time, without cause, with 60 days written notice.
- 6. Protection.** By using the Software, you acknowledge that the Software contains valuable proprietary and confidential information of the Company. You therefore agree: (i) to use the Software only for the limited purposes authorized in the license granted herein, and to limit access to the Software to its own employees, agents, consultants, and independent contractors who are directly involved in the accomplishment of such purpose; (ii) not to copy the Software except as authorized in writing by the Company and to include on all such authorized copies any designated and requested copyright, trademark, and proprietary information notices of the Company and any Company licensor; (iii) to take any reasonable action, as instructed by the Company, with respect to any person permitted access to the Software to enable you to satisfy your obligations under this Agreement; (iv) to otherwise protect the Software from disclosure using at least the same degree of care you use to protect your own software source code and proprietary information; (v) to securely store all copies of the Software at all times and in any form; (vi) to notify

the Company in writing of any unauthorized access to the Software of which you become aware; and (vii) you will not (and will use your best efforts consistent not to allow any third party to): (a) copy, decompile, disassemble, reverse engineer or attempt to discover any source code or underlying ideas or algorithms of the Software (except to the extent that applicable law prohibits reverse engineering restrictions), (b) except as expressly provided herein, provide, lease, lend, use for timesharing or service bureau purposes or otherwise use or allow others to use the Software for the benefit of any third party, (c) use the Software in violation of any law or regulation or any third party rights, or (d) modify or make derivative works of the Software or remove, modify, or obscure any copyright or other proprietary notices of any related documentation.

**7. Software Features.** The Software may contain features that enable the Company or 3<sup>rd</sup> parties for product fulfillment or other purposes, via the internet, to notify you of available software upgrades, and to update product data files and instructional content in the Software. The Software may also contain features that enable you to download new data files. You agree that we may utilize these features to provide such notices and updates, permit such downloads and to collect such data.

**8. Privacy.** The Software may request or collect certain limited information about you when you use the Software. The Software may also collect information regarding what content you send through the Software and who you send it to (“Transmission Data”). The Software may also use cookies or other passive tracking mechanisms and tools to collect information in order to facilitate your use of the Software. We reserve the right, whether by the Company or a third party, to collect aggregated non-personal data from all users of the Software relating to, for example, the number of times a user has launched or logged into the Software, the specific features of the Software utilized by a user and the types and frequency of errors with the Software that occur (“Aggregate Data”). We will only use the Aggregate Data to assess the overall use of the Software by customers in order to determine how the Software is being used and how it and other products can be improved. The Company may share Aggregate Data with vendors who assist us in providing its products and services; with third party business partners with whom we provide joint promotions; with our affiliated companies, including any parent or subsidiaries of the Company; and we may share your Aggregate Data if we believe it is necessary to comply with legal process (such as a court order, subpoena, search warrant, etc.), or other legal requirements of any governmental authority; if we believe it would potentially mitigate our liability in an actual or potential lawsuit; if we believe it is permitted by law or if doing so will not violate the law; or if we believe it is otherwise necessary to protect the Company’s rights or property; or is necessary to protect the interests of other users of the Software. In the unlikely event that all or part of our business is sold or acquired by a third party, we will transfer the Transmission Data and the Aggregate Data to the new business owner.

**9. Your Representations and Warranties.** You represent and warrant that you possess the legal right and ability to agree to this License Agreement, and that all information or material that you transmit through the Software is owned by you, is true, accurate and current, including login credentials. You agree that you will not: (i) copy, reproduce or transmit any material that is copyrighted, protected by trade secret or otherwise subject to third party proprietary rights, including privacy and publicity rights, unless you are the owner of such rights or have written permission from their rightful owner to post the material and to grant the right to use such materials as provided in this Agreement; and (ii) enter into any conduct that could result in liability or damage to us or any third party as a result of your use of the Software.

You agree to indemnify and hold harmless the Company and its licensors for all liability and damages that may be incurred in any legal action in connection with the above.

**10. DISCLAIMER OF WARRANTY.** You assume responsibility for operation of the Software, and for the installation, use, and results obtained from the Software.

**11. LIMITATION OF LIABILITY.** YOUR USE OF THE SOFTWARE IS ENTIRELY AT YOUR OWN RISK. UNDER NO CIRCUMSTANCE WILL THE COMPANY, ITS AGENTS, LICENSORS OR SUPPLIERS BE LIABLE TO YOU ON ACCOUNT OF YOUR USE OR MISUSE OF, OR RELIANCE ON, THE SOFTWARE. TO THE EXTENT PERMITTED BY LAW, IN NO EVENT WILL THE COMPANY, ITS LICENSORS, SUPPLIERS OR DEALERS BE LIABLE TO YOU FOR ANY INDIRECT, INCIDENTAL, SPECIAL, CONSEQUENTIAL, OR PUNITIVE DAMAGES, INCLUDING ANY LOST PROFITS, LOST SAVINGS, COSTS OF PROCUREMENT OF SUBSTITUTE PRODUCTS OR SERVICES OR OTHER DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE SOFTWARE EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

**12. Governing Law.** If the Software was obtained in the United States, this License is governed by the laws of the State of Delaware. If the Software was obtained outside of the United States, this License is governed by the laws of the country in which it was obtained. This License shall not be governed by the United Nations Convention on Contracts for the International Sale of Goods, the application of which is expressly excluded. If for any reason a court of competent jurisdiction finds any provision, or portion thereof, to be unenforceable, the remainder of this License shall continue in full force and effect.

**13. Export Law Assurances.** You may not use or otherwise export or re-export the Software except as authorized by United States law and laws of the jurisdiction in which the Software was obtained. In particular, but without limitation, the Software may not be exported or re-exported (a) into (or to a national or resident of) any U.S. embargoed countries (including without limitation Cuba, Iran, Iraq, Libya, North Korea, Serbia, Sudan, and Syria) or (b) to anyone on the U.S. Treasury Department's list of Specially Designated Nationals or the U.S. Department of Commerce Denied Person's List or Entity List. By using the Software, you represent and warrant that you are not located in, under control of, or a national or resident of any such country or on any such list.

**14. Federal Acquisitions.** This Section 16 applies to all acquisitions of the Software by or for the federal government, or by any prime contractor or subcontractor (at any tier) under any contract, grant, cooperative agreement or other activity with the federal government. The Software is a "commercial item" as that term is defined in 48C.F.R. 2.101 (October 2004) consisting of "commercial computer software" and "commercial computer software documentation" as such terms are used in 48 C.F.R. 227.7202-1, 227.7202-3, 227.7202-4 (October, 2004). If you are in the U.S. Government or any agency or department thereof, the Software is licensed (a) only as a commercial item and (b) with only those rights as are granted hereunder.

**15. EUROPEAN COMMUNITY PROVISIONS.** If you obtained this Software within a country of the European Community, nothing in this License shall be construed as restricting any rights available under the European Community Software Directive (91/250/EEC).

**16. Miscellaneous.** Each provision of this Agreement is severable. If a provision is found to be unenforceable, this finding does not affect the enforceability of the remaining provisions, terms, or conditions of this Agreement. This Agreement is binding on successors and assigns. The Company will not be responsible for any non-performance or delay attributable in whole or in part to any cause beyond its reasonable control. Nothing contained herein shall be construed as creating any agency, partnership, or other form of joint enterprise between the parties. You acknowledge that you have read this Agreement, that you understand it, that you agree to be bound by its terms, and that the foregoing is the complete and exclusive statement of the Agreement.

We are not responsible for how your User Content is handled by your recipients. Please consider this carefully when creating a Vaporstream Message. However, we cannot guarantee such deletion (due to compliance with certain laws and regulations, archiving and/or pursuant to requests received by Vaporstream by authorized law enforcement). Additionally, certain features of the Service allow a user to employ screen capture prevention techniques (such as by dividing an image into multiple portions for separated display to a recipient). We cannot guarantee that a recipient will not take actions to circumvent such techniques in order to screen capture, save, or otherwise create an image of the User Content contained within a Vaporstream Message. Additionally, deleted data on a storage device may be recovered using means of reconstructing deleted digital data.
