Xerox Corporation- <http://www.xerox.com/about-xerox/citizenship/section-508-process/enus.html>

About the Xerox Section 508 Assessment Process

Section 508 of the Rehabilitation Act of 1973 requires Federal agencies to ensure their procurement of electronic and information technology takes into account the needs of all end users - including people with disabilities. Xerox has a long history of engineering products that are easy to access and operate. We have taken seriously our compliance with Section 508 requirements and have developed a rigorous process for assessing product compliance.

Task-based Assessment

The Xerox Section 508 Assessment Process is a set of guidelines for applying the Section 508 accessibility requirements to our products coupled with an understanding of how Xerox customers use our products. Users perform a variety of tasks in order to use office equipment products such as printers, copiers, fax machines, and multifunction devices. General user tasks include programming the job at the user interface, loading documents into the document handler, and removing the completed job from any of the Xerox-supplied output devices. For fax machines, general user functions also include dialing, connecting, and receiving status when faxing. Due to the wide range of Xerox product offerings, general user tasks will vary widely. For example, the user tasks associated with the use of a walk-up copier are actually quite different from the user tasks associated with operating our high-speed production publishers.

Beginning in January of 2001, personnel from Xerox's industrial design and human interface organization worked to define guidelines for applying each Section 508 specification to Xerox products. Clarifications, where necessary, were supplied by the U.S. Government Access Board. In parallel with this activity, individual product development teams defined the specific tasks performed by the general user of each product. These two pieces of information, the guidelines and the product's general user tasks, form the framework for the assessment performed by the product development teams. As a result, every individual product assessment consists of an evaluation of each general user task against the applicable guidelines.

Compliance Results

After this rigorous assessment process is completed, the overall assessment results for each product are rated as "**Compliant**," "**Compliant with minor exceptions**," or "**Compliant with some exceptions**." A result of "Compliant" means that the product met each Section 508 applicable guidelines for every general user task required to operate the product. Assignment of a product into either of the latter two categories is based upon the number of exceptions. Where exceptions exist, they are summarized on the Xerox Section 508 web pages and specifics are detailed in the individual product data sheets, which are also available on the web. We urge all customers to examine the detailed assessments to obtain a complete picture of the compliance of Xerox products with Section 508 requirements.

Beginning in January of 2001, personnel from Xerox's industrial design and human interface organization worked to define guidelines for applying each Section 508 specification to Xerox products. Clarifications, where necessary, were supplied by the U.S. Government Access Board. In parallel with this activity, individual product development teams defined the specific tasks performed by the general user of each product. These two pieces of

information, the guidelines and the product's general user tasks, form the framework for the assessment performed by the product development teams. As a result, every individual product assessment consists of an evaluation of each general user task against the applicable guidelines.

24. **Notification regarding registration in System for Award Management (SAM) database**–Yes.

DESCRIPTION OF ITS SERVICES AND PRICING

Documentation Specialist

Minimum/General Experience: A project support position requiring 5 or more years of experience. Associates in this position are skilled in MS Windows series, MS Office 97 or 2000 which includes Excel, Access, and PowerPoint, graphic design, and MS Project, among other applications.

Functional Responsibility: Performs project tasks as required by the Project Manager.

Minimum Education: Bachelor's Degree required or equivalent experience (5 to 8 years) considered.

Systems Consultant

Minimum/General Experience: Associates in this entry-level position have one to two years relevant experience and have basic experience and theoretical knowledge of healthcare, healthcare information systems, advanced technology products and technologies, or software development skills and tools. The consultant is demonstrating technical proficiency in his/her area of expertise (see various areas of expertise as set forth in the addendum.)

Functional Responsibility: Systems Consultants are expected to perform portions of client assignments independently and in teams as assigned by and under the supervision of the Project Manager.

Minimum Education: 1 - 2 Years of previous work experience or comparable collegiate or post-graduate education. Bachelor's Degree or 5 to 8 years' experience considered.

Sr. Systems Consultant

Minimum/General Experience: Associates in this position have several years' relevant information management/information technology experience and are developing a deep technical skill set in a focused area, advanced technical area, or advanced system development skills. These people can work independently.

Functional Responsibility: These consultants are expected to perform a variety of complex project tasks independently and in teams as assigned by the Project Manager.

Minimum Education: Bachelor's Degree required and 2 to 3 years' experience.

Management Consultant

Minimum/General Experience: Colleagues in this position have 3-5 years relevant experience and advanced knowledge of information systems, advanced technology products and technologies, or software development skills and tools. The consultant is demonstrating technical and management proficiency in his/her area of expertise (see various areas of expertise as set forth in the addendum.)

Functional Responsibility: Management Consultants are expected to perform portions of client assignments independently and in teams as assigned by and under the supervision of the Project Manager.

Minimum Education: 3-5 Years of previous work experience and appropriate collegiate or post-graduate education. Bachelor's Degree or 5 to 8 years' experience considered.

Senior Management Consultant

Minimum/General Experience: These senior managers have several years' experience and have, in addition to excellent project management and people skills, deep and/or broad functional and technical expertise in a focused area, advanced technical area, and/or advanced system development skills. These senior managers have a strong understanding of the Information Technology arena and the technology to support multiple special areas. These senior consultants can lead larger teams of information technology professionals (5-12 people) across multiple technology specialties. They are key leaders in large-scale program management and responsible for integration of work across complex projects.

Functional Responsibility: These senior managers are responsible for the project management which includes planning, monitoring and documenting a project; development of project associates, building relationships with the client; delivery of the project economics, and recruiting other consultants to the Firm.

Minimum Education: Bachelor's Degree required and 3 to 5 years' experience.

Technical Advisor

Minimum/General Experience: The Technical Advisor is a skilled practitioner with several years' relevant experience and highly developed focused, specialty or advanced information technology core skill sets. The Technical Advisor is the associate primarily responsible for the delivery of specific subject matter expertise with deep technically focused knowledge. They also contribute detailed technical knowledge to a project and play a key role in augmenting the role of the consultant, senior consultant in specific subject areas.

Functional Responsibility: Technical Advisor positions provide the advanced skills required to complete project deliverables.

Minimum Education: Bachelor's Degree required and 3 to 5 years' experience.

Senior Technical Advisor

Minimum/General Experience: The Senior Technical Advisor has several years' relevant experience and has advanced expertise in a focused area, advanced technical area, and/or advanced system development skills. These individuals have significant contacts in the market within their area of expertise, publish and/or speak at conferences, and are recognized firm-wide leaders in a specific specialty area.

Functional Responsibility: The Senior Technical Advisor positions provide very advanced skills required to complete project deliverables.

Minimum Education: Bachelor's Degree required and 3 to 5 years' experience.

Project Manager

Minimum/General Experience: Associates in this position have several years of relevant experience and are skilled practitioners with a broadly developed technical and project management skill set. The Project Manager is the colleague primarily responsible for the detailed delivery of the project. These people blend the capability to run project(s), provide professional information technology advice, interface with smaller size client groups, and manage small teams of colleagues (3-5 people).

Functional Responsibility: Responsible for Project Management. The Project Manager, Consulting Services manages the project's quality, economics, staff and deliverables. This position assures quality services to the client.

Minimum Education: Bachelor's Degree required and 3 to 5 years' experience.

Engagement Manager

Minimum/General Experience: The engagement manager has several years' experience and may be a generalist or specialist. The engagement manager has a strong understanding of the Information Technology industry in general and 1-3 deep specialty areas and knowledge of the information technology to support a given area(s). Engagement managers have responsibility for multiple projects running concurrently and have responsibility for several managers and/or senior managers on a project. The Engagement Manager is a key leader with responsibility for interaction and relationship management with senior IM/IT executives at 1-3 customer sites.

Functional Responsibility: Responsible for quality assurance for projects in the region as assigned by the appropriate practice area Vice-President; may perform as Client Service Executive on projects; and contributes through add-on and new business development.

Minimum Education: Bachelor's Degree required and 3 to 5 years' experience.

Client Service Executives (CSE)

Minimum/General Experience: Colleagues at the CSE level typically have 15+ years of experience, have a solid understanding of business in general and are industry leaders in several specific information technology specialty areas. CSEs are responsible for client relationships and program management & delivery. CSEs manage a large customer segment and several concurrently running projects (depending on size). CSEs are industry leaders in specific subject areas, publish regularly and are frequent industry speakers. They are responsible for executive level relationships, provide coaching to executives and their senior managers, assist with strategy development and implementation of large programs. One of a CSE's primary roles is to work with client executives on information management and information technology planning strategies.

Functional Responsibility: Insures the quality of work with clients and achieves satisfaction; develops new and add-on engagements through the delivery of superior service and value received; manages and achieves the project/service line economics.

Minimum Education: Bachelor's Degree required and 8-10 years' experience.

Corporate Officer

Minimum/General Experience: Colleagues at the Corporate Officer level typically have 15+ years of experience, have a solid understanding of the business in general and are corporate and industry leaders in several specific information technology specialty areas. Corporate Officers are responsible for the management of the business and ultimately responsible for the entire client relationship. Corporate Officers direct large customer segments and several concurrently running projects (depending on size). Corporate Officers are industry leaders in specific subject areas publish regularly and are frequent industry speakers. They are responsible for executive level relationships between Sierra7 and all clients in the area of responsibility. They direct strategy development and implementation of large programs. One of a Corporate Officer's primary roles is to work with client executives on information management and information technology visioning strategies.

Functional Responsibility: Insures the quality of work with clients and achieves satisfaction; develops new and add-on engagements through the delivery of superior service and value received; manages and achieves the project/service line economics.

Minimum Education: Bachelor's Degree required and 5 to 8 years' experience.

INFORMATION TECHNOLOGY SKILLS ADDENDUM

For purposes of these position descriptions for information technology skills, specific focused, advanced technical, and software development areas include:

- Clinical information system(s);
- Managed care system(s);
- enterprise networking;
- desktop and messaging;
- e-commerce and e-health;
- web enabling technologies;
- data center design, security, and operations;
- disaster avoidance and recovery;
- network and systems management;
- voice systems and networks;
- customer service/call centers;
- help desks;
- picture archival and retrieval systems (PACS);
- telemedicine;
- data warehousing;
- data mining;
- interface engines;
- interface design;
- custom application development;
- document management systems;
- compliance engines;
- graphical user interface (GUI) front ends;
- work flow and process engineering;
- Information management/information technology (IM/IT) requirements definition;
- IM/IT strategy;
- IT contracting support;
- Cost/Benefit & ROI analysis;
- IT Change Management;
- Program management;
- IM/IT communication planning;
- front & back office systems;
- enterprise resource planning;
- financial & clinical systems;
- reporting & compliance;
- utilization, disease, & wellness management systems;
- pharmacy systems;

Functional and technical skills include, but are not limited to, planning, designing, selecting, architecture building, implementing, and/or administering network systems and services, telecommunications systems and services, interface engines, databases, data warehouses, web applications, healthcare information systems, managed care systems, system development, and systems integration.
