| OLM    | Order-Level Materials (OLM’s) - Order-Level Materials are supplies and/or services acquired in direct support of individual task or delivery order placed against a Schedule contract or BPA. OLM pricing is not established at the Schedule contract or BPA level, but at the order level. OLMs are Purchased under the authority of the FSS Program, Unknown until an order is placed, Only authorized for use in direct support of another awarded SIN, Only authorized for inclusion at the order level under a Time-and-Materials (T&M) or Labor-Hour (LH) Contract Line Item Number (CLIN), OLMs are not open-market items, OLMs are not awarded under ancillary supplies/services or other direct cost (ODC) SINs (these items are defined, priced, and awarded at the FSS contract level).

The Order-Level Materials SIN is only authorized for use in direct support of another awarded SIN, Price analysis for OLMs is not conducted when awarding the FSS contract or FSS BPA, Order-Level Materials SIN must be inclusive of the Industrial Funding Fee (IFF) and the cumulative value of OLMs in an individual task or delivery order cannot exceed 33.33% of the total value of the order.
Disaster Recovery* and Cooperative Purchasing** Options have been elected

* Federal agencies, state, and local agencies, under the GSA Disaster Recovery Purchasing Program, can acquire supplies and equipment from our online shopping and ordering system at GSAAdvantage®. The disaster relief section is designed to quickly link you to specific products and services typically needed for preparation, response, and recovery from disasters. Federal buyers, civilian or military, can do simple requisitions to purchase supplies from GSA Global Supply on this site too.

State and local governments can now use GSA schedule contracts for procurements before and after emergencies. A variety of products and services are available supporting recovery from major disasters, terrorism, or nuclear, biological, chemical, or radiological attack.

https://www.gsa.gov/governmentwide-initiatives/emergency-response/purchasing-for-disaster-recovery

** The Cooperative Purchasing Program allows state, local, and tribal governments to purchase IT, security, and law enforcement products and services offered through specific Schedule contracts. Cooperative Purchasing allows eligible entities to purchase from approved industry partners, at any time, for any reason, using any funds available.

1b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer, should show the range of the lowest price, and cite the areas to which the prices apply.

54151S - IT Systems Administrator I - $70.51 per hour.
OLM – Determined at the Task Order Level.

1c. If the Contractor is proposing hourly rates, a description of all corresponding commercial job titles, experience, functional responsibility and education for those types of employees or subcontractors who will perform services shall be provided. If hourly rates are not applicable, indicate “Not applicable” for this item. See pages four to seven.

2. Maximum order:

**Title: IT Engineering / Network Technician III.**

**Minimum Experience:** Must have a minimum of four (4) years of Information Technology (IT)-related experience.

**Functional Duties:** Functional Responsibility is IT-related/focused. Includes Engineering, Network and User Tech Support Techs.

ENG – Prepares designs and specifications for various complex equipment or systems. Plans approach to solve design problems; conceives and recommends new design techniques; resolves design problems with contract personnel. Designs and coordinates test set-ups and experiments to prove or disprove the feasibility of preliminary design.

NET – Ensures performance of the telecommunications network through constant monitoring of traffic, performance, and network configurations. Takes corrective action to re-route traffic when problems occur and works with network engineering to resolve issues. Advises customer and contractor personnel of company requirements for products and services, support equipment, and installations. Directs regular, special, and integrated system test programs. Prepares and conducts special reports and presentations pertinent to company products and services, field operations, or other applications. Plans, prepares, and conducts on-the-job training as required in support of these activities.

**Minimum Education:** Minimum Education required is Associate’s Degree, plus one (1) year of IT-related experience. Two (2) years of IT specialized experience may be substituted for a degree.
Title: IT System Design Engineer I

Minimum Experience: Must have a minimum of two (2) years of Information Technology (IT)-related experience, including good understanding of the underlying principles of Systems Engineering, Functional Analysis, or Information Engineering.

Functional Duties: Functional Responsibility is IT-related/focused. Assists more experienced Information/Systems Engineer/Functional Analyst in applying methods, theories, and research techniques in the investigation and solution of system design requirements and problems. Functional Responsibility is IT-related/focused. Assists more experienced Information/Systems Engineer/Functional Analyst in applying methods, theories, and research techniques in the investigation and solution of system design requirements and problems requiring the application of expert knowledge. Analyzes and evaluates user requirements by coordinating with the user to define the problem, data availability, report requirements, and system design problems. Defines system objectives and prepares system design specifications. Analyzes alternative means of deriving input data to select the most accurate, feasible, and economical methods. Performs process and data modeling using both manual and Computer Aided System Engineering (CASE) tools. Applies reverse engineering and reengineering disciplines to develop migration, strategic, and planning documents. Defines input and output file specifications including file organization. Defines controls, conversion procedures, and system implementation plans. Assignments are generally of limited scope and reviewed by more experienced engineers.

Minimum Education: Minimum Education required is a Bachelor’s Degree in Computer Science, Information Systems, Engineering, Business, or other related scientific or technical discipline, plus two (2) years of IT-related experience. With at least four (4) years of IT specialized experience, a degree is NOT required.

Title: IT Systems Administrator I

Minimum Experience: Must have a minimum of one (1) year of Information Technology (IT)-related experience, including knowledge in computer systems administration

Functional Duties: Functional Responsibility is IT-related/focused. Administers the operation of business systems that may be mainframe-, mini-, or client/server-based. Troubleshoots computer-related problems and, as necessary, contacts appropriate service representatives to resolve systems problems. Installs hardware and software, as needed. Performs backups, database administration, and file recovery. Provides assistance to users in accessing and using business systems. Routes complex problems to more experienced technical specialists.

Minimum Education: Minimum Education required is a Bachelor’s Degree in Computer Science, Information Systems, Engineering, Business, or other related scientific or technical discipline, plus one (1) year of IT-related experience. With four (4) years of overall IT-related experience, including two (2) years in computer systems administration, a degree is NOT required.
Title: IT Subject Matter Specialist III

Minimum Experience: Must have a minimum of seven (7) years of Information Technology (IT)-related experience, six (6) years of which must be related to the Subject or Client environment, to include specific knowledge in emerging or current technology.

Functional Duties: Functional Responsibility is IT-related/focused. Using line of business, functional area, or specialized technology expertise, analyzes, plans and establishes requirements; performs functional modeling; and assists with developing procedures and functional architectures. Applies knowledge of state-of-the-art technology to process studies and analysis projects. Analyzes client requirements and assists with developing recommendations for development, systems improvements, operational optimizations or acquisition strategies. Assists client in developing strategic plans and concepts relative to the particular area of expertise. Demonstrates good oral and written communication skills. Provides direction and specific support the Project or Program team.

Minimum Education: An Associate’s Degree in a related technical field along with appropriate certification, plus seven (7) years of IT-related experience. Two (2) years of IT specialized experience may be substituted for a degree.
