## Labor Category Descriptions

### Program Manager

Responsible for overall program management of complex, multi-task IT projects. Oversees all technical operations, prepares financial and contractual requirements. Responsible for cost control, works with client representatives to ensure smooth project operation. Manages technical and administrative personnel when necessary, works without immediate supervision.

**Minimum Qualifications:** Bachelor Degree (or equivalent years of experience) in Computer Science, Information Science, Engineering or a related field.

**Experience:** 6 years of work experience with 4 years of program management experience.

**Education:** B.A or B.S. (or equivalent years of experience).

### Project Manager

Oversees various systems projects of a highly complex nature. Responsible for assembling project team, assigning individual responsibilities, identifying appropriate resources needed, and developing schedule to ensure timely completion of project and meeting deadlines of project. Must be familiar with the systems scope and project objectives, as well as the role and function of each team member in order to effectively coordinate the activities of the team.

**Minimum Qualifications:** Bachelor Degree (or equivalent years of experience) in Computer Science, Information Science, Engineering, Business or a related field.

**Experience:** 4 years of work experience with 2 years of project management experience.

**Education:** B.A or B.S. (or equivalent years of experience).

### Systems Analyst

Analyzes the problem and the information to be processed and develops detailed plans for the development of a new or modified automated system. Design, develops and maintains computer software for moderately complex to highly complex computer systems. Translates detailed design into software, preparing detailed flowcharts, writing program code, testing, and implementing systems. Prepares test data and systems, user and program documentation. Coordinates all project analysis and requirement efforts. Responsible for both routine and complex testing and analysis of all elements of the network facilities; including power, software, communications machinery/devices, lines, modems and terminals. Monitors and controls the performance and status of the network resources. Utilizes software and hardware tools, identifies and diagnoses problems and factors affecting network performance.

**Minimum Qualifications:** Bachelor Degree (or equivalent years of experience) in Computer Science, Information Science, Engineering or a related field.

**Experience:** 2 years of technical analysis, software development or related experience

**Education:** B.A or B.S (or equivalent years of experience).

## **Enterprise Software Engineer**

Establishes system information requirements using analysis of the information engineer(s) in the development of enterprise-wide or large-scale information systems. Designs architecture to include the software, hardware, and communications to support the total requirements as well as provide for present and future cross functional requirements and interfaces. Ensures these systems are compatible and in compliance with the standards for open systems architectures as they apply to the implementation and specification of Information Management (IM) solution of the application platform, across the application program interface (API), and the external environment/software application. Evaluates analytically and systematically problems of workflows, organization, and planning and develops appropriate corrective action. Provides daily supervision and direction to staff.

**Minimum Qualifications:** Bachelor Degree (or equivalent years of experience) in Computer Science, Information Science, Engineering or a related field.

**Experience:** 6 years of technical analysis, software development or related experience

**Education:** B.A or B.S (or equivalent years of experience).

## **User Experience/Designer**

Provide support in upgrading, maintaining and creating designs for software products. Provide day-to-day product design and creation. Experience in web design and development using HTML, CSS, and JavaScript is desired. Must have good communication skills and the ability to work with all levels of management and technical personnel. Working knowledge of browsers, WYSIWYG editors, graphic design software (ex. - Photoshop, Illustrator), animation software, and image optimization is desirable. **Minimum Qualifications:** Bachelor Degree (or equivalent years of experience) in Computer Science, Graphics Design, Information Science, Engineering or a related field.

**Experience:** 2 years of user experience and / or graphics design

**Education:** B.A or B.S. (or equivalent years of experience).

## **Software Engineer**

Provide support to develop mobile and web based applications. Provide support in developing the app concept, interface design, and architecture of the web-site. Provide support for the implementation of interfaces to applications. Solid programming skills in Java, .NET, Ruby, and/or PHP required. Experience in HTML, CSS, JavaScript (including JSON), and XML is desired. Must have experience designing and building user interfaces leveraging web standards, open frameworks (e.g. jQuery). Should also have expertise in using RDBMS (e.g. MySQL) and fluent in SQL.

**Minimum Qualifications:** Bachelor Degree (or equivalent years of experience) in Computer Science, Information Science, Engineering or a related field.

**Experience:** 2 years of technical analysis, software development or related experience

**Education:** B.A or B.S. (or equivalent years of experience).

### **Functional Subject Matter Expert**

Analyzes user needs to determine functional requirements. Performs functional allocation to identify required tasks and their interrelationships. Identifies resources required for each task. Possesses requisite knowledge and expertise so recognized in the professional community that the Government is able to qualify the individual as an expert in the field for an actual task order. Demonstrates exceptional oral and written communication skills.

**Minimum Qualifications:** Bachelor Degree (or equivalent years of experience) in Computer Science, Information Science, Engineering or a related field.

**Experience:** 10 years of work experience with 6 years' experience as subject matter expert.

**Education:** B.A or B.S. (or equivalent years of experience).

### **Quality Assurance Specialist**

Writes test cases as specified, or needed. Works with team to test software products to ensure quality of products. Understanding of automated testing tools is desired. Individuals must be able to test on mobile devices with multiple scenarios and be proficient in integration testing of subsystems. The QA specialist participates in all applicable Scrum activities. Agile Scrum experience - major plus. Individual must have the ability to understand software system architectures and have experience with Open Source testing tools. Ability to perform complex SQL queries and to troubleshoot applications is a plus.

**Minimum Qualifications:** Bachelor Degree (or equivalent years of experience) in Computer Science, Information Science, Engineering or a related field.

**Experience:** 2 years of technical analysis, software development or related experience

**Education:** B.A or B.S. (or equivalent years of experience).
