Utilizes diagnostic programs, equipment, tools or instruments to determine cause of malfunctions and performs appropriate corrective actions.

Minimum Education: High school degree and two years technical training in computer science, or related field. Advanced training and experience in network design, installation and configuration, with extensive hands-on experience. 10 years work experience with either MCSE or CCNE certification.

DCS Technician: \$81.36

Minimum/General Experience: Experience in the installation, testing, servicing and maintenance of Process Control Systems, equipment, computers, programs and associated peripherals. Some experience in planning, monitoring, managing and teaching various tasks and activities.

Functional Responsibility: Provide support for installations, re-configurations, modifications of Honeywell TDC and Experion DCS in the Process Control Lab. Loads DCS points, prepare and compile DCS schematics, package completed simulator database for site delivery

Minimum Education: High school degree and two years technical training in computer science, or related field. Advanced training and experience in network design, installation and configuration, with extensive hands-on experience. 5 years work experience.

IT Web Developer: \$86.14

Minimum/General Experience: Professional software development experience with extensive hands on experience in Microsoft .NET technologies. Professional experience in requirements gathering, analysis, design, data modeling, develop, test, deploy and support for highly scalable object oriented, multi-tiered, and enterprise distributed applications.

Functional Responsibility: The ability to interact face-to-face with end users, translate user needs into well-defined technical specifications and functioning code, work well in a team-based environment under pressures and on multiple projects at any one time as work is prioritized or new assignments are developed. Managed software development life cycle, and having strong abilities in Database Design, Normalization, writing Stored Procedures, LINQ Queries, Triggers, Views, Functions and SSIS/DTS Packages in MS SQL Server.

Minimum Education: BS in computer science, or related field. Advanced training and experience in C#.NET,ASP.NET, AJAX,WCF, XML Web Services, WCF, JavaScript,ASP,VB 6.0, COM, COM+, DCOM. 5 years work experience.

Senior IT Web Developer: \$105.29

Minimum/General Experience: Professional software development experience with extensive hands on experience in Microsoft .NET technologies. Professional experience in requirements gathering, analysis, design, data modeling, develop, test, deploy and support for highly scalable object oriented, multi-tiered, and enterprise distributed applications.

Functional Responsibility: The ability to interact face-to-face with end users, translate user needs into well-defined technical specifications and functioning code, work well in a team-based environment under pressures and on multiple projects at any one time as work is prioritized or new assignments are developed. Managed software development life cycle, and having strong abilities in Database Design, Normalization, writing Stored Procedures, LINQ Queries, Triggers, Views, Functions and SSIS/DTS Packages in MS SQL Server.

Minimum Education: BS in computer science, or related field. Advanced training and experience in C#.NET,ASP.NET, AJAX,WCF, XML Web Services, WCF, JavaScript,ASP,VB 6.0, COM, COM+, DCOM. 10 years work experience.

SQL Database Programmer: \$119.65

Minimum/General Experience: Database design and development, database maintenance, and software application development experience working in full life cycle environments. Experience working in both SQL Server and Oracle environments, and strong experience executing database scripts. Experience working with SQL tables and providing database and application support, and strong Excel and Mathematical skills. Experience working with mathematical expressions, logic functions and Boolean operators.

Functional Responsibility: Responsible for designing and maintaining computer databases. Skilled at handling the storage, organization and security of information contained in relational database systems. Duties including being responsible for testing, debugging and troubleshooting databases, and they can also be tasked with developing new databases in response to user needs or merging database information from older to newer systems.

Minimum Education: BS in computer science, or related field. Advanced training and experience in SQL Server 2000, 2005, 2008, Oracle 10g, Oracle 9i, Oracle 8i. JQuery, C#, C++,VB,VB script, AJAX, VB.NET, Java Script,

CSS, HTML, ASP. SharePoint 2013/2010/2007 including SharePoint Server and SharePoint Foundation. 10 years work experience.

Senior Application Developer:

\$129.22

Minimum/General Experience: Experience in the process, life cycle and creation of the software aimed at helping users complete a computer task or program. The ability to work closely with computer analysts and engineers in using languages such as Java, C++ or ORACLE to develop the necessary specifications for software. The developer may also test, debug and improve generally faulty applications for clients.

Functional Responsibility: Experienced at creating, maintaining and implementing the source code that makes up the application or program. Responsible for designing the prototype application, indicate program unit structure, and coordinate application plans with the development team or client.

Minimum Education: BS in computer science, or related field. Advanced training and experience in Python frameworks, Web application development, SQL, Linux and JavaScript. 10 years work experience.
