Instructions:

Additional SIN Description: Term Licenses The word "Term" is defined in this Solicitation as "a limited period of time". Term Software Licenses have a limited duration and are not owned in perpetuity. Unless Offerors provide an option for converting Term licenses into perpetual licenses, users lose the right to use these licenses upon the end of the term period. This SIN is NOT Infrastructure as a Service (IaaS), Platform as a Service (PaaS), or Software as a Service (SaaS) as defined in SIN 518210C - Cloud and Cloud-Related IT Professional Services. Term Software Licenses are distinct from Electronic Commerce and Subscription Services (SIN 54151ECOM).

Perpetual Licenses The word "perpetual" is defined in this Solicitation as "continuing forever, everlasting, valid for all time".

Software maintenance as a product includes the publishing of bug/defect fixes via patches and updates/upgrades in function and technology to maintain the operability and usability of the software product. It may also include other no charge support that is included in the purchase price of the product in the commercial marketplace. No charge support includes items such as user blogs, discussion forums, online help libraries and FAQs (Frequently Asked Questions), hosted chat rooms, and limited telephone, email and/or web-based general technical support for users self diagnostics.

Software Maintenance as a product is billed at the time of purchase.

Software maintenance as a product does NOT include the creation, design, implementation, integration, etc. of a software package. These examples are considered software maintenance services under SIN 54151 Software Maintenance Services.

1.) Specific Instructions for SIN 511210 - Software Licenses

a.) Offerors are encouraged to identify within their software items any component interfaces that support open standard interoperability. An item's interface may be identified as interoperable on the basis of participation in a Government agency-sponsored program or in an independent organization program. Interfaces may be identified by reference to an interface registered in the component registry located at http://www.core.gov.

b.) Contractors are encouraged to offer SIN 54151 Software Maintenance Services in conjunction with SIN 511210 - Software Licenses.

c.) Conversion From Term License To Perpetual License

i.) When standard commercial practice offers conversions of term licenses to perpetual licenses, and an ordering activity requests such a conversion, the contractor shall provide the total amount of conversion credits available for the subject software within ten (10) calendar days after placing the order.
ii.) When conversion credits are provided, they shall continue to accrue from one contract period to the next, provided the software has been continually licensed without interruption.

iii.) The term license for each software product shall be discontinued on the day immediately preceding the effective date of conversion from a term license to a perpetual license.

iv.) When conversion from term licenses to perpetual licenses is offered, the price the ordering activity shall pay will be the perpetual license price that prevailed at the time such software was initially ordered under a term license, or the perpetual license price prevailing at the time of conversion from a term license to a perpetual license, whichever is the less, minus an amount equal to a percentage of all term license payments during the period that the software was under a term license within the ordering activity.

d). Term License Cessation

i.) After a software product has been on a continuous term license for a period of ____ (Fill-in the period of time.) months, a fully paid-up, non-exclusive, perpetual license for the software product shall automatically accrue to the ordering activity. The period of continuous term license for automatic accrual of a fully paid-up perpetual license does not have to be achieved during a particular fiscal year; it is a written Contractor commitment which continues to be available for software that is initially ordered under this contract, until a fully paid-up perpetual license accrues to the ordering activity. However, should the term license of the software be discontinued before the specified period of the continuous term license has been satisfied, the perpetual license accrual shall be forfeited. Contractors who do not commercially offer conversions of term licenses to perpetual licenses shall indicate that their term licenses are not eligible for conversion at any time.

ii.) Each separately priced software product shall be individually enumerated, if different accrual periods apply for the purpose of perpetual license attainment.

iii.) Fill-in data and specific terms shall be attached to the GSA Price List (I-FSS-600 CONTRACT PRICE LISTS (OCT 2016)).

iv.) The Contractor agrees to provide updates and software maintenance services for the software after a perpetual license has accrued, at the prices and terms of SIN 54151 - Software Maintenance Services, if the licensee elects to order such services. Title to the software shall remain with the Contractor.

e.) Utilization Limitations for Perpetual Licenses

i.) Software Asset Identification Tags (SWID) (Option 1 Perpetual License)

1.) Option 1 is applicable when the Offeror agrees to include the International Organization for Standardization/International Electrotechnical Commission 19770-2 (ISO/IEC 19770-2:2015) standard identification tag (SWID Tag) as an embedded element in the software. An ISO/IEC 19970-2 tag is a discoverable identification element in software that provides licensees enhanced asset visibility. Enhance visibility supports both the goals of better software asset management and license compliance. Offerors may use the National Institute of Standards and Technology (NIST) document “NISTIR 8060: Guidelines for Creation of Interoperable Software Identification (SWID) Tags” December 2015 to determine if they are in compliance with the ISO/IEC 19770-2 standard.

2.) Section 837 of The Federal Information Technology Acquisition Reform Act (FITARA) of 2014, requires GSA to seek agreements with software vendors that enhance government-wide acquisition, shared use, and dissemination of software, as well as compliance with end user license agreements. The Megabyte Act of 2016
requires agencies to inventory software assets and to make informed decisions prior to new software acquisitions. In June of 2016, the Office of Management and Budget issued guidance on software asset management requiring each CFO Act (Public Law 101-576 –11/15/1990) agency to begin software inventory management (M-16-12). To support these requirements, Offerors may elect to include the terms of Option 1 and/or Option 2, which support software asset management and government-wide reallocation or transferability of perpetually licensed software.

ii.) Realllocaation of Perpetual Software (Option 2 Perpetual License)

1.) The purpose of SIN 511210 OPTION 2 is to allow ordering activities to transfer software assets for a pre-negotiated charge to other ordering activities.

2.) When an ordering activity becomes aware that a reusable software asset may be available for transfer, it shall contact the Contractor, identify the software license or licenses in question, and request that these licenses be reallocated or otherwise made available to the new ordering activity.

3.) Contractors shall release the original ordering activity from all future obligations under the original license agreement and shall present the new ordering activity with an equivalent license agreement. When the new ordering activity agrees to the license terms, henceforth any subsequent infringement or breach of licensing obligations by the new ordering activity shall be a matter exclusively between the new ordering activity and the Contractor.

4.) The original ordering activity shall de-install, and/or make unusable all of the software assets that are to be transferred. It shall have no continuing right to use the software and any usage shall be considered a breach of the Contractor’s intellectual property and a matter of dispute between the original ordering activity/original license grantee and the licensor.

5.) As a matter of convenience, once the original licenses are deactivated, de-installed, or made otherwise unusable by the original ordering activity or license grantee, the Contractor may elect to issue new licenses to the new ordering activity to replace the old licenses. When new licenses are not issued, the Contractor shall provide technical advice on how best to achieve the functional transfer of the software assets.

6.) Software assets that are eligible for transfer that have lapsed Software Maintenance Services (SIN 54151) may require a maintenance reinstatement fee, chargeable to the new ordering activity or license grantee. When such a fee is paid, the new ordering activity shall receive all the rights and benefits of Software Maintenance Services.

7.) When software assets are eligible for transfer, and are fully covered under pre-paid Software Maintenance Services (SIN 54151), the new ordering activity shall not be required to pay maintenance for those license assets prior to the natural termination of the paid for maintenance period. The rights associated with paid for current Software Maintenance Services shall automatically transfer with the software licenses without fee. When the maintenance period expires, the new ordering activity or license grantee shall have the option to renew maintenance.

8.) The administrative fee to support the transfer of licenses, exclusive of any new incremental licensing or maintenance costs shall be ______ percentage (%) of the original license fee. The fee shall be paid only at the time of transfer. In applying the transfer fee, the Software Contractor shall provide transactional data that supports the original costs of the licenses.

9.) Fill-in data and specific terms shall be attached to the GSA Price List (I-FSS-600 CONTRACT PRICE LISTS (OCT 2016)).
f.) Software Conversions: Full monetary credit will be allowed to the ordering activity when conversion from one version of the software to another is made as a result of a change in operating system, or from one computer system to another. Under a perpetual license, the purchase price of the new software shall be reduced by the amount that was paid to purchase the earlier version. Under a term license, if conversion credits had accrued while the earlier version was under a term license, those credits shall carry forward and remain available as conversion credits which may be applied towards the perpetual license price of the new version.

Special Item No. 54151 Software Maintenance Services

54151 Software maintenance services creates, designs, implements, and/or integrates customized changes to software that solve one or more problems and is not included with the price of the software. Software maintenance services includes person-to-person communications regardless of the medium used to communicate: telephone support, online technical support, customized support, and/or technical expertise which are charged commercially.

</thead>
<tbody>
<tr>
<td>611420</td>
<td>Computer Training</td>
<td>$12 million</td>
</tr>
</tbody>
</table>

Instructions:
1) Specific Instructions for SIN 611420 - Computer Training
a) Prepaid training tokens, credits, etc. shall not be permitted on this SIN.

b) Offerors shall provide training courses normally available to commercial customers, which will permit ordering activity users to make full, efficient use of general purpose commercial IT products. Training is restricted to training courses for those products within the scope of the IT Category.

c) Cancellation and Rescheduling
i) The ordering activity will notify the Contractor at least seventy-two (72) hours before the scheduled training date, if a student will be unable to attend. The Contractor will then permit the ordering activity to either cancel the order or reschedule the training at no additional charge. In the event the training class is rescheduled, the ordering activity will modify its original training order to specify the time and date of the rescheduled training class.

ii) In the event the ordering activity fails to cancel or reschedule a training course within the time frame specified above, the ordering activity will be liable for the contracted dollar amount of the training course. The Contractor agrees to permit the ordering activity to reschedule a student who fails to attend a training class within ninety (90) days from the original course date, at no additional charge.

iii) The ordering activity reserves the right to substitute one student for another up to the first day of class.

iv) In the event the Contractor is unable to conduct training on the date agreed to by the Contractor and the ordering activity, the Contractor must notify the ordering activity at least seventy-two (72) hours before the scheduled training date.

d) Follow-Up Support
The Contractor agrees to provide each student with unlimited telephone support or online support for a period of one (1) year from the completion of the training course. During this period, the student may contact the Contractor’s instructors for refresher assistance and answers to related course curriculum questions.

e) Format And Content Of Training
i) Offerors shall provide written materials (i.e., manuals, handbooks, texts, etc.) normally provided with course offerings, printed and copied two-sided on paper containing 30% postconsumer materials (fiber). Such documentation will become the property of the student upon completion of the training class.

ii) If applicable, for hands-on training courses, there must be a one-to-one assignment of IT equipment to students.

iii) Offerors shall provide each student with a Certificate of Training at the completion of each training course.

iv) Offerors shall provide the following information for each training course offered:
   A) course title,
   B) a brief description of the course content, to include the course format (e.g., lecture, discussion, hands-on training);
   C) length of the course;
   D) mandatory and desirable prerequisites for student enrollment;
   E) minimum and maximum number of students per class;
   F) locations where the course is offered;
   G) class schedules; and
   H) price (per student, per class (if applicable)).

v) For courses conducted at the ordering activity’s location, instructor travel charges (if applicable), including mileage and daily living expenses (e.g., per diem charges) are governed by Pub. L.99-234 and FAR Part 31.205-46, and are reimbursable by the ordering activity on orders placed under the Multiple Award Schedule, as applicable, in effect on the date(s) the travel is performed. The Industrial Funding Fee does NOT apply to travel and per diem charges.

vi) For Online Training Courses, a copy of all training material must be available for electronic download by the students.

f) “No Charge” Training
g) Offerors shall describe any training provided with equipment and/or software provided under this contract, free of charge on the GSA Price List (I-FSS-600 CONTRACT PRICE LISTS (OCT 2016)).

Special Item No. 54151S Information Technology Professional Services

Instructions:
1. Specific Instructions for SIN 54151ECOM - Electronic Commerce and Subscription Services
a. Acceptance Testing: Acceptance testing shall be performed of the systems for ordering activity approval in accordance with the approved test procedures. Management and operations pricing shall be provided on a uniform basis. All management and operations requirements for which pricing elements are not specified shall be provided as part of the basic service.

b. Normal commercial installation, operation, maintenance, and engineering interface training on the system shall be provided. If there is a separate charge, it must be stated on the GSA Price List (I-FSS-600 CONTRACT PRICE LISTS (OCT 2016)).

c. Monthly summary report may be provided to the Ordering Activity in accordance with commercial practice.

2. If an electronic commerce service plan is offered the following must be stated on the GSA Price List (I-FSS-600 CONTRACT PRICE LISTS (OCT 2016)):
   a. Describe the electronic service plan and eligibility requirements;
   b. Describe charges, if any, for additional usage guidelines; and
   c. Describe corporate volume discounts and eligibility requirements, if any.

CONSULTANT III (SP-CS3)
Minimum/General Experience: Ten or more years’ experience

Functional Responsibility: Specific expertise in four or more functional areas and knowledgeable in at least two others. Supervises guidance and direction for specific sub-tasks of a project. Interfaces with the client on a day-to-day basis. Supports the completion of project specific tasks within estimated time frames and budget constraints.

Minimum Education: Bachelor’s degree in Computer Science or related field preferred. Equivalent work experience considered.

CONSULTANT IV (SP-CS4)
Minimum/General Experience: Ten or more years’ experience

Functional Responsibility: Manages direction for specific sub-tasks of a project. Specific expertise in five or more functional areas and knowledgeable in at least two others. Interfaces with the client on a day-to-day basis. Supports the completion of project specific tasks within estimated time frames and budget constraints.

Minimum Education: Bachelor’s degree in Computer Science or related field preferred. Equivalent work experience considered.

PROGRAMMER/DEVELOPER III (SP-PRG3)
Minimum/General Experience: Four or more years’ experience

Functional Responsibility: Recommends new or emerging technology or software to satisfy functional requirements and processes. Provides highly technical and/or specialized guidance mapping complex technology to business processes and missions related to the subject field. Provides expert consultation in one or more areas for the design, development and implementation of technical products and systems. Recognized as technical leader and resource. Recommends alterations and enhancements to improve quality of products and/or procedures regarding open systems and client-service architectures.

Minimum Education: Bachelor’s degree in Computer Science or related field preferred. Equivalent work experience considered.

PROJECT MANAGER I (SP-PRJ1)
Minimum/General Experience: Three or more years’ experience

Functional Responsibility: Assists with plans, organizes and manages groups of employees engaged in various technical duties. Provides administrative and technical direction to personnel; coordinates approved task order; assist with establishing improved procedures and controls, where necessary, to ensure that all services meet schedule and/or production; Provides the customer representative the status and activities of personnel covered under contract; responds to administrative or technical requests from the customer representative; and applies continuous evaluation and control measures.

Minimum Education: Bachelor’s degree in Computer Science or related field preferred. Equivalent work experience considered.

PROJECT MANAGER II (SP-PRJ2)
Minimum/General Experience: Five or more years’ experience
**Functional Responsibility**: Supervises plans and manages groups of employees engaged in various technical duties. Provides administrative and technical direction to personnel; coordinates approved task order; establishes improved procedures and controls, where necessary, to ensure that all services meet schedule and/or production; Provides the customer representative the status and activities of personnel covered under contract; responds to administrative or technical requests from the customer representative; and applies continuous evaluation and control measures.

**Minimum Education**: Bachelor’s degree in Computer Science or related field preferred. Equivalent work experience considered.

**PROJECT MANAGER III (SP-PRJ3)**

**Minimum/General Experience**: Seven or more years’ experience

**Functional Responsibility**: Responsible for overall project management of complex, multi-task IT contracts. Plans, organizes and manages groups of employees engaged in various technical duties. Provides administrative and technical direction to personnel; Has the corporate authority to recruit, hire, terminate personnel and commit corporate resources; coordinates approved task order; establishes improved procedures and controls, where necessary, to ensure that all services meet schedule and/or production; Provides the customer representatives the status and activities of personnel covered under contract; responds to administrative or technical requests from the customer representative; and applies continuous evaluation and control measures; Works without supervision.

**Minimum Education**: Bachelor’s degree in Computer Science or related field. Master’s degree preferred. Equivalent work experience considered.

**APPLICATIONS SPECIALIST III (SP-SAS3)**

**Minimum/General Experience**: Ten or more years’ experience

**Functional Responsibility**: Provides project management for design, development and testing of critical projects. Analyzes user requests and produces research of requirements. Provides technical programming/systems guidance, QA and training for SW Development staff. 10 years relevant experience (degree can be substituted for 3 years’ experience).

**Minimum Education**: Bachelor’s degree in Computer Science or related field preferred. Equivalent work experience considered.

**APPLICATIONS SPECIALIST IV (SP-SAS4)**

**Minimum/General Experience**: Twelve or more years’ experience

**Functional Responsibility**: Provides technical development leadership and business support. Develops, implements and integrates custom and packaged applications. Manages client relationship in resolving complex support issues. Has a thorough understanding of the business processes and the information processing requirements of the client. Performs feasibility analyses and cost/benefit studies for the purpose of identifying solutions to information processing requirements, including the evaluation and recommendation of software packages and/or custom solutions.

**Minimum Education**: Bachelor’s degree in Computer Science or related field. Master’s degree preferred. Equivalent work experience considered.

**SYSTEMS INTEGRATOR II (SP-SI2)**

**Minimum/General Experience**: Seven or more years’ experience

**Functional Responsibility**: Provides technology expertise in a wide-range of information technology
environments by monitoring and evaluating performance, reliability and cost in order to upgrade the infrastructure through design changes. Develops and implements infrastructure changes. Develops solutions to breakdowns in the areas of recovery/integrity/security; assesses the impact of changes to the infrastructure, application software, system performance and to clients.

**Minimum Education**: Bachelor’s degree in Computer Science or related field. Master’s degree preferred. Equivalent work experience considered.

**SUBJECT MATTER EXPERT III (SP-SME3)**

**Minimum/General Experience**: Twelve or more years’ experience

**Functional Responsibility**: Specializes in technical development and business support. Has a thorough understanding of the business processes and the information processing requirements of the client. Identifies solutions to information processing requirements, including the evaluation and recommendation of software packages and/or custom solutions. Degree or equivalent experience.

**Minimum Education**: Bachelor’s degree in Computer Science or related field preferred. Equivalent work experience considered.

**SYSTEM ENGINEER I (SP-SYE1)**

**Minimum/General Experience**: Three or more years’ experience

**Functional Responsibility**: Assists with the development of code, testing and implementing computer programs and subsystems utilizing multiple programming languages. Assist with the support of system design, business studies and feasibility studies. Assists with the installation and support of network communications. Works from specifications to assist in developing and modifying operating software programming applications. Assists with design, coding, benchmark testing, debugging, and documentation.

**Minimum Education**: Bachelor’s degree in Computer Science or related field preferred. Equivalent work experience considered.

**SYSTEM ENGINEER III (SP-SYE3)**

**Minimum/General Experience**: Seven or more years’ experience

**Functional Responsibility**: Designs and implements IT systems to meet business needs. Develops code, test and implement computer programs and subsystems utilizing multiple programming languages. Leads subsystem design and participates in system design projects. Interfaces with customers to define system requirements and priorities. Leads business studies and feasibility studies. Manages the purchase, installation, and support of network communications. Responsible for evaluating current systems. Plans large scale systems projects. Provides technical direction for personnel performing software development tasks, including the review of work products for correctness, adherence to the design concept and to user standards, and for progress in accordance with schedules. Prepares milestone status reports and analysis related to the design, development, and integration of hardware, software, man-machine interfaces and all system level requirements. Develops integrated system test requirement, strategies, devices and systems. Directs overall system level testing. Assists with the development of code, testing and implementing computer programs and subsystems utilizing multiple programming languages. Assist with the support of system design, business studies and feasibility studies. Assists with the installation and support of network communications. Works from specifications to assist in developing and modifying operating software programming applications. Assists with design, coding, benchmark testing, debugging, and documentation.

**Minimum Education**: Bachelor’s degree in Computer Science or related field preferred. Master’s degree preferred. Equivalent work experience considered.
SYSTEM ENGINEER IV (SP-SYE4)

Minimum/General Experience: Seven or more years’ experience

Functional Responsibility: Designs and implements IT systems to meet business needs. Develops code, test and implement computer programs and subsystems utilizing multiple programming languages. Leads subsystem design and participates in system design projects. Interfaces with customers to define system requirements and priorities. Leads business studies and feasibility studies. Manages the purchase, installation, and support of network communications. Responsible for evaluating current systems. Plans large scale systems projects. Provides technical direction for personnel performing software development tasks, including the review of work products for correctness, adherence to the design concept and to user standards, and for progress in accordance with schedules. Prepares milestone status reports and analysis related to the design, development, and integration of hardware, software, man-machine interfaces and all system level requirements. Develops integrated system test requirement, strategies, devices and systems. Directs overall system level testing.

Minimum Education: Bachelor’s degree in Computer Science or related field preferred. Master’s degree preferred. Equivalent work experience considered
