**Special Item No. 54151S Information Technology Professional Services**

NOTE 1: All non-professional labor categories must be incidental to and used solely to support hardware, software and/or professional services, and cannot be purchased separately.

NOTE 2: Offerors and Agencies are advised that the Group 70 – Information Technology Schedule in not to be used as a means to procure services which properly fall under the Brooks Act. These services include, but are not limited to, architectural, engineering, mapping, cartographic production, remote sensing, geographic information systems, and related services. FAR 36.6 distinguishes between mapping services of an A/E nature and mapping services which are not connected nor incidental to the traditionally accepted A/E Services.

NOTE 3: This solicitation is not intended to solicit for the reselling of IT Professional Services, except for the provision of implementation, maintenance, integration, or training services in direct support of a product. Under such circumstances the services must be performance by the publisher or manufacturer or one of their authorized agents.

About Stratium Consulting...

Stratium Consulting Group, Inc. is a business and technology consulting and services firm serving its clients throughout North America. The founders, with Big-5 heritage, have many years of experience in consulting for Fortune 500 clients. Stratium has a diverse client base and expertise within financial services, telecommunications, energy, and healthcare industries. Stratium is proud to list some of our clients we have worked with:

- Department of Energy (DoE)
- AT&T
- KPMG International
- Michaels Stores, Inc.
- Bank of America
- GE Capital Corporation
- Morgan Stanley

Stratium excels in delivering services and solutions around project/program management, Information Management (Business Intelligence, web portals, Enterprise Content Management, Data Security,), and specialized business/IT services/solutions. We offer a holistic approach and bring business and technology together through strategy, services and solutions. Key focus areas include, but not limited to:

- Information Management
- Systems Integration/Architecture
- Specialized Services and Solutions
- Project Management

Please call us at (972) 370-5065 to find out more information.

1b. Identification of the lowest priced model for each SIN:
Not applicable; professional services.

1c. Labor Categories and Hourly Rates.
Please see Attachment I for a complete listing of labor categories, descriptions, and hourly rates.

2. Maximum order.
$500,000.00

3. Minimum order.
$100.00

4. Geographic coverage (delivery area).
50 United States and US Territories.
5. Point(s) of production (city, county, and State or foreign country).

Stratium Consulting Group, Inc.
Dallas Signature Place
14785 Preston Road, Suite 550
Dallas, Texas 75254
Phone: 972.370.5065
Fax: 972.637.9425

6. Discount from list, prices or statement of net price.

Please see Attachment I for a complete listing of labor categories, descriptions, and hourly rates. All prices shown in this pricelist are NET prices; basic discounts have been deducted.

7. Quantity discounts.

An additional 1% discounts on Task Orders greater than $500,000.

8. Prompt payment terms.

Net 30

9a. Notification that Government purchase cards are accepted at or below the micro-purchase threshold.

Commercial credit cards are accepted in full.

9b. Notification whether Government purchase cards are accepted or not accepted above the micro-purchase threshold.

Government purchase cards accepted.

10. Foreign items (list items by country of origin).

None.

11a. Time of delivery. (Contractor insert number of days).

Negotiated on a Task Order Basis.

11b. Expedited Delivery.

Negotiated on a Task Order Basis.

11c. Overnight and 2-day delivery.

Negotiated on a Task Order Basis.

11d. Urgent Requirements.

Contact the contractor’s representative.
12. F.O.B. point(s).
F.O.B. Destination

13a. Ordering address.

23. Preventive maintenance (if applicable).
N/A

24a. Special attributes such as environmental attributes (e.g., recycled content, energy efficiency, and/or reduced pollutants).
N/A

24b. Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services at www.stratiumconsulting.com. The EIT standard can be found at: www.section508.gov.

25. Data Universal Number System (DUNS) number.
831274738

26. Notification regarding registration in System for Award Management (SAM) database.
Stratium Consulting Group, Inc. is registered in the SAM database.
Attachment I: Labor Category Descriptions and Pricing

SMA Level 3

Functional Responsibility: The SMA Level 3 provides technical, managerial, and administrative direction for problem definition, analysis, requirements development and implementation for complex to extremely complex systems in the subject matter area. Makes recommendation and advises on organization-wide system improvements, optimization or maintenance efforts in the following specialties: information systems architecture; networking; automation; communications protocols; risk management/electronic analysis; software; life-cycle management; software development methodologies; and modeling and simulation.

Minimum Education: Bachelor’s degree in related field (e.g. Electrical Engineering, Computer Information Systems, etc.) or equivalent experience.

Minimum Experience: 15+ years of experience in the IT field. At least 10 years of combined new and related older technical experience in the IT field directly related to the required area of expertise.

SMA Level 2

Functional Responsibility: The SMA Level 2 defines the problems and analyzes and develops plans and requirements in the subject matter area for moderately complex to complex systems. Coordinates and manages the preparation of analysis, evaluations, and recommendation for proper implementation of programs and systems specification in the following specialists: information systems architecture; networking; automation; communications protocols; risk management/electronic analysis; software; life-cycle management; software development methodologies; and modeling and simulation.

Minimum Education: Bachelor’s degree in related field (e.g. Electrical Engineering, Computer Information Systems, etc.) or equivalent experience.

Minimum Experience: 12+ years of experience in the IT field. At least 8 years of combined new and related older technical experience in the IT field directly related to the required area of expertise.

SMA Level 1

Functional Responsibility: The SMA Level 2 develops requirements in the subject matter area for simple to moderately complex systems and assists other moderately complex systems. Assists other senior consultants with analysis and evaluation and with the preparation of recommendations for system improvements, optimization, development, and/or maintenance efforts in the following specialties: information systems architecture; networking; automation; communications protocols; risk management/electronic analysis; software; life-cycle management; software development methodologies; and modeling and simulation.

Minimum Education: Bachelor’s degree in related field (e.g. Electrical Engineering, Computer Information Systems, etc.) or equivalent experience.

Minimum Experience: 8+ years of experience in the IT field. At least 5 years of combined new and related older technical experience in the IT field directly related to the required area of expertise.
PM Level 5

**Functional Responsibility:** The PM Level 5 is the senior resource for leading high risk/complex project or program with little room for error. Performs day-to-day management of assigned delivery order projects that involve teams of data processing and other information system and management professionals, who have previously been involved in analyzing, designing, integrating, testing, documenting, converting, extending, and implementing automated information systems. Demonstrates proven skills in those technical areas addressed by the delivery order to be managed. Organizes, directs, and coordinates the planning and production of all activities associated with assigned delivery order projects. Demonstrates writing and oral communication skills.

**Minimum Education:** Bachelor’s degree in related field (e.g. Electrical Engineering, Computer Information Systems, etc.) or equivalent experience.

**Minimum Experience:** 12+ years of experience in the IT field. At least 6 years of experience in direct supervision of IT software development and/or integration maintenance projects.

PM Level 4

**Functional Responsibility:** The PM Level 4 is very experienced in resource leading in complex projects or programs with little room for error. Performs day-to-day management of assigned delivery order projects that involve teams of data processing and other information system and management professionals who have previously been involved in analyzing, designing, integrating, testing, documenting, converting, extending, and implementing automated information systems. Demonstrates proven skills in those technical areas addressed by the delivery order to be managed. Organizes, directs, and coordinates the planning and production of all activities associated with assigned delivery order projects. Demonstrates writing and oral communication skills.

**Minimum Education:** Bachelor’s degree in related field (e.g. Electrical Engineering, Computer Information Systems, etc.) or equivalent experience.

**Minimum Experience:** 5+ years of experience in direct supervision of IT software development and/or integration maintenance projects. At least 5 years of experience in direct supervision of IT software development and/or integration maintenance projects.

PM Level 3

**Functional Responsibility:** The PM Level 3 is experienced in resource leading in complex projects or programs. Performs day-to-day management of assigned delivery order projects that involve teams of data processing and other information system and management professional who have previously been involved in analyzing, designing, integrating, testing, documenting, converting, extending, and implementing automated information systems. Demonstrates proven skills in those technical areas addressed by the delivery order to be managed. Organizes, direct, and coordinates the planning and production of all activities associated with assigned delivery order projects. Demonstrates writing and oral communication skills.

**Minimum Education:** Bachelor’s degree in related field (e.g. Electrical Engineering, Computer Information Systems, etc.) or equivalent experience.

**Minimum Experience:** 6+ years of experience in the IT field. At least 3-5 years of experience in direct supervision of IT software development and/or integration maintenance projects.
PM Level 2

Functional Responsibility: The PM Level 2 is experienced in resource leading in moderately complex/risky project or programs. Performs day-to-day management activities and experienced with analyzing, designing, integrating, testing, documenting, converting, extending, and implementing automated information systems. Demonstrates proven skills in these technical areas addressed by the delivery order to be managed. organizes, direct, and coordinates the planning and production of all activities associated with assigned delivery order projects. Demonstrates writing and oral communication skills.

Minimum Education: Bachelor's degree in related field (e.g. Electrical Engineering, Computer Information Systems, etc.) or equivalent experience.

Minimum Experience: 2-4 years of experience in direct supervision of IT software development and/or integration maintenance projects.

PM Level 1

Functional Responsibility: The PM Level 1 is a resource with some experience leading low to moderately complex/risky project or programs. Performs day-to-day management activities and experienced with analyzing, designing, integrating, testing, documenting, converting, extending, and implementing automated information systems. Demonstrates proven skills in those technical areas addressed by the delivery order to be managed. Organizes, directs, and coordinates the planning and production of all activities associated with assigned delivery order projects. Demonstrates writing and oral communication skills.

Minimum Education: Bachelor’s degree in related field (e.g. Electrical Engineering, Computer Information Systems, etc.) or equivalent experience.

Minimum Experience: Must have up to 2 years of experience in the IT field in direct supervisions of IT software development and/or integration maintenance projects.

IT Architect Level 5

Functional Responsibility: The Arch Level 5 is the senior architecture resource leading high risk/complex project or program with little room for error. Experienced in all aspects of the full software development life cycle as well as the ability to lead a team in the design and development life cycle as well as the ability to lead a team in the design and development of web applications. Technically well rounded and has experience implementing many different types of software solutions and has a solid understanding of standard database design concepts. Experience interfacing with clients directly and exhibits excellent organizational and communication skills. Takes full ownership and responsibility on independent projects and is also responsible for helping fulfill the overall technical direction of IT related projects. Provides support and designs, develops, and implements applications for computer systems. Directs the design of new applications from conception to completion and oversees the technical staff involved with the development project.

Minimum Education: Bachelor's degree in related field (e.g. Electrical Engineering, Computer Information Systems, etc.) or equivalent experience.

Minimum Experience: 12+ years of experience in the IT field, including at least 10 years of combined new and related older technical experience in the IT field directly related to the requires area of expertise.
IT Architect Level 4

Responsibility: The IT Architect Level 4 is the most experienced in architecture resource leading complex projects or programs with little room for error. Experienced in all aspects of the full software development life cycle as well as the ability to lead a team in the design and development of web applications. Technically well rounded and has experience implementing many different types of software solutions and has a solid understanding of standard database design concepts. Experienced interfacing with clients directly and exhibits excellent organizational and communication skills. Takes full ownership and responsibility on independent projects and is also responsible for helping fulfill the overall technical direction of IT related projects. Provides support and designs, develops, and implements applications for computer systems. Directs the design of new applications from conception to completion and oversees the technical staff involved with the development project.

Minimum Education: Bachelor’s degree in related field (e.g. Electrical Engineering, Computer Information Systems, etc.) or equivalent experience.

Minimum Experience: 8+ years of experience in the IT field, including at least 4 years of combined new and related older technical experience in the IT field directly related to the required area of expertise.

IT Architect Level 3

Functional Responsibility: The IT Architect Level 3 is the experienced in architecture resource leading complex projects or programs. Experienced in all aspects of the full software development life cycle as well as the ability to lead a team in the design and development of web applications. Technically well rounded and has experience implementing many different types of software solutions and has a solid understanding of standard database design concepts. Experienced interfacing with clients directly and exhibits excellent organizational and communication skills. Takes full ownership and responsibility on independent projects and is also responsible for helping fulfill the overall technical direction of IT related projects. Provides support and designs, develops, and implements applications for computer systems. Directs the design of new applications from conception to completion and oversees the technical staff involved with the development project.

Minimum Education: Bachelor’s degree in related field (e.g. Electrical Engineering, Computer Information Systems, etc.) or equivalent experience.

Minimum Experience: 6+ years of experience in the IT field, including at least 4 years of combined new and related older technical experience in the IT field directly related to the required area of expertise.

IT Architect Level 2

Functional Responsibility: The IT Architect Level 2 is experienced in architecture resource leading moderately complex/risky projects or programs. Experienced in all aspects of the full software development life cycle as well as the ability to lead a team in the design and development of web applications. Technically well rounded and has experience implementing many different types of software solutions and has a solid understanding of standard database design concepts. Experienced interfacing with clients directly and exhibits excellent organizational and communication skills. Takes full ownership and responsibility on independent projects and is also responsible for helping fulfill the overall technical direction of IT related projects. Provides support and designs, develops, and implements applications for computer systems. Directs the design of new applications from conception to completion and oversees the technical staff involved with the development project.

Minimum Education: Bachelor’s degree in related field (e.g. Electrical Engineering, Computer Information Systems, etc.) or equivalent experience.

Minimum Experience: 4+ years of experience in the IT field, including at least 2 years of combined new and related older technical experience in the IT field directly related to the required area of expertise.
IT Architect Level 1

**Functional Responsibility:** The IT Architect Level 1 is an architecture resource with some experience leading low to moderately complex/risky projects or programs. Experienced in all aspects of the full software development life cycle as well as the ability to lead a team in the design and development of web applications. Technically well rounded and has experience implementing many different types of software solutions and has a solid understanding of standard database design concepts. Experienced interfacing with clients directly and exhibits excellent organizational and communication skills. Takes full ownership and responsibility on independent projects and is also responsible for helping fulfill the overall technical direction of IT related projects. Provides support and designs, develops, and implements applications for computer systems. Directs the design of new applications from conception to completion and oversees the technical staff involved with the development project.

**Minimum Education:** Bachelor’s degree in related field (e.g. Electrical Engineering, Computer Information Systems, etc.) or equivalent experience.

**Minimum Experience:** 1-2+ years of experience in the IT field, including up to 2 years of combined new and related older technical experience in the IT field directly related to the required area of expertise.

Developer Level 3

**Functional Responsibility:** The Developer Level 3 is an experienced developer responsible for complex technical activities. Must be able to translate applications requirements into web-based solutions using available technology. Must be able to apply new and emerging technologies to the software development process. Programs software components to specifications. Integrates, tests, and debugs software components. Deploys and maintains software systems. Tunes system performance in both software and hardware.

**Minimum Education:** Bachelor’s degree in related field (e.g. Electrical Engineering, Computer Information Systems, etc.) or equivalent experience.

**Minimum Experience:** 4+ years of computer experience in at least two of the following disciplines: system programming, application programming, and equipment analysis, including at least 1 year of experience developing application using advanced technologies, including internet protocols or web-based technology. Technologies such as HTML, CGI applications, PERL or Javascript, and Java

Developer Level 2

**Functional Responsibility:** The Developer Level 2 is an experienced developer responsible for moderately complex/risky technical activities. Must be able to translate applications requirements into web-based solutions using available technology. Must be able to apply new and emerging technologies to the software development process. Programs software components to specifications. Integrates, tests, and debugs software components. Deploys and maintains software systems. Tunes system performance in both software and hardware.

**Minimum Education:** Bachelor’s degree in related field (e.g. Electrical Engineering, Computer Information Systems, etc.) or equivalent experience.

**Minimum Experience:** 2+ years of computer experience in at least two of the following disciplines: system analysis, system programming, application programming, and equipment analysis. Experience must include at least 1 year of experience developing applications using advanced technologies, including Internet protocols or web-based technology. Technologies such as HTML, CGI applications, PERL or Javascript, and Java.
**Developer Level 1**

**Functional Responsibility:** The Developer Level 1 is the developer responsible for low to moderately complex/risky technical activities. Must be able to translate applications requirements into web-based solutions using available technology. Must be able to apply new and emerging technologies to the software development process. Programs software components to specifications. Integrates, tests, and debugs software components. Deploys and maintains software systems. Tunes system performance in both software and hardware.

**Minimum Education:** Bachelor’s degree in related field (e.g. electrical Engineering, Computer Information Systems, etc.) or equivalent experience.

**Minimum Experience:** 0 - 2 years of experience in at least two of the following disciplines: system analysis, system programming, application programming, and equipment analysis. Experience must also include at least 6 months of experience developing applications using advanced technologies, including internet protocols or web-based technology. Technologies such as HTML, CGI applications, PERL or Javascript, and Java.

**Analyst Level 5**

**Functional Responsibility:** The Analyst Level 5 is one of the senior analysts that applies management analysis processes, statistical methods, and advanced technical and analytical research techniques to determine solutions based on client requirements with an IT services/solutions-based scope. Analyzes operational activities to obtain a quantitative, rational basis for decision making and resource allocation. Employs process improvements and reengineering methodologies and principles for modernization of systems and projects. Creates project plans to achieve performance-based objectives, enhancing implementation, systems and service. Provides integral support in mission requirements determination, conceptualization, design, development, testing, verification and validation, documentation, and implementation of system applications.

**Minimum Education:** Bachelor’s degree in related field (e.g. Electrical Engineering, Computer Information Systems, etc.) or equivalent experience.

**Minimum Experience:** Must have a minimum of 8 year of IT Analyst experience. This experience should include the application of fundamental concepts, processes, practices, and procedures of the specific professional or technical assignment or specialty area.

**Analyst Level 4**

**Functional Responsibility:** The Analyst Level 4 is one of the senior analysts that applies management analysis processes, statistical methods, and advanced technical and analytical research techniques to determine solutions based on client requirements with an IT services/solutions-based scope. Analyzes operational activities to obtain a quantitative, rational basis for decision making and resource allocation. Employs process improvements and reengineering methodologies and principles for modernization of systems and projects. Creates project plans to achieve performance-based objectives, enhancing implementation, systems and service. Provides integral support in mission requirements determination, conceptualization, design, development, testing, verification and validation, documentation, and implementation of system applications.

**Minimum Education:** Bachelor’s degree in related field (e.g. Electrical Engineering, Computer Information Systems, etc.) or equivalent experience.

**Minimum Experience:** 6+ years of IT Analyst experience. This experience should include the application of Applies fundamental concepts, processes, practices, and procedures of the specific professional or technical assignment or specialty area. Performs work that requires practical experience and training. Work is performed independently, with evaluation and innovation in analyzing and identifying data, processes, problems, and solutions.
Analyst Level 3

**Functional Responsibility:** The Analyst Level 3 is an experienced analyst that applies management analysis processes, statistical methods, and advanced technical and analytical research techniques to determine solutions based on client requirements with an IT services/solutions-based scope. Analyzes operational activities to obtain a quantitative, rational basis for decision making and resource allocation. Employs process improvements and reengineering methodologies and principles for modernization of systems and projects. Creates project plans to achieve performance-based objectives, enhancing implementation, systems and service. Provides integral support in mission requirements determination, conceptualization, design, development, testing, verification and validation, documentation, and implementation of system applications.

**Minimum Education:** Bachelor’s degree in related field (e.g. Electrical Engineering, Computer Information Systems, etc.) or equivalent.

**Minimum Experience:** 4+ years of IT Analyst experience. This experience includes the application of fundamental concepts, processes, practices, and procedures of the specific professional or technical assignment or specialty area. Performs work that requires practical experience and training. Work is performed independently, with evaluation and innovation in analyzing and identifying data, processes, problems, and solutions.

Analyst Level 2

**Functional Responsibility:** The Analyst Level 2 is an experienced analyst that applies management analysis processes, statistical methods, and technical and analytical research techniques to determine solutions based on client requirements with an IT services/solutions-based scope. Analyzes operational activities to obtain a quantitative, rational basis for decision making and resource allocation. Employs process improvements and reengineering methodologies and principles for modernization of systems and projects. Creates project plans to achieve performance-based objectives, enhancing implementation, systems and service. Provides integral support in mission requirements determination, conceptualization, design, development, testing, verification and validation, documentation, and implementation of system applications.

**Minimum Education:** Bachelor’s degree in related field (e.g. Electrical Engineering, Computer Information Systems, etc.) or equivalent experience.

**Minimum Experience:** 2+ years of IT Analyst experience. This includes understanding of Understands fundamental concepts, processes, practices, and procedures of the specific professional or technical assignment or in specialty area. Performs tasks that are routine and learns to apply training to practice. Uses established procedures and works under close supervision in support of assigned projects.

Analyst Level 1

**Functional Responsibility:** The Analyst Level 1 is an analyst resource that applies analysis processes, statistical methods, and technical and analytical research techniques to determine solutions based on client requirements with an IT services/solutions-based scope. Analyzes operational activities to obtain a quantitative, rational basis for decision making and resource allocation. Employs process improvements and reengineering methodologies and principles for modernization of systems and projects. Creates project plans to achieve performance-based objectives, enhancing implementation, systems and service. Provides integral support in mission requirements determination, conceptualization, design, development, testing, verification and validation, documentation, and implementation of system applications

**Minimum Education:** Bachelor’s degree in related field (e.g. Electrical Engineering, Computer Information Systems, etc.) or equivalent experience.

**Minimum Experience:** 1+ years of IT Analyst experience. The experience must mean that the candidate is familiar with fundamental concepts, processes, practices, and procedures of the specific professional or technical assignment or in specialty area. Perform tasks that are routine and learns to apply training to practice. Follows standard practices and written instruction to accomplish duties and works under direct supervision in support of assigned projects.
Systems Engineer

**Functional Responsibility:** The Systems Engineer is responsible for the management and execution of the installation of new servers, system upgrades, evaluating and installing patches and resolving software related problems; Performing system backups and recovery; Maintaining data files and monitoring system configuration to ensure data integrity.

**Minimum Education:** Associate’s degree in Technology, or similar field, or 3 years experience, or combination of both.

**Minimum Experience:** 1+ years of related experience, including the knowledge and use of routers and switches.
