<tbody>
<tr>
<td>IT Architect</td>
<td>is a practitioner of solution architecture. Typically part of the solution development team, the solution architect translates requirements collected from customer-defined needs into the architecture for that solution and describing it through architecture and design artifacts.</td>
<td>10+</td>
<td>1) B.A. or B.S. in IT;</td>
</tr>
<tr>
<td>IT Engineer</td>
<td>is responsible to understand and meet customer's needs for computer hardware, software and networking tools. They work to develop, test, install, configure and troubleshoot computer hardware and software. As part of this process, they work to create proper documentation, diagrams and other detailed instructions to help other employees make the best use of new technologies.</td>
<td>5+</td>
<td>1) B.A. or B.S. in IT;</td>
</tr>
<tr>
<td>Data Manager</td>
<td>is responsible for ensuring that the data resource in an organization completely supports the business goals of the organization. The data manager does not necessarily need to know all the details of managing a high-quality data resource, but does need to know the broad data needs of the organization. Those data needs are most often determined by looking at the knowledge needed by the organization’s knowledge workers, the information needed to provide that knowledge, and the data needed to provide the information. It’s the data management executive’s responsibility to ensure that the determination of knowledge, information, and data needs are carried out for every business function in the organization. In doing so, establishes the organization's data management policy.</td>
<td>5+</td>
<td>1) B.A. or B.S. in IT;</td>
</tr>
<tr>
<td>Subject Matter Expert</td>
<td>is responsible for the technical subject-matter (SME) or domain expertise and authority in a particular IT and/or business operations area or topic. A domain expert is a person with special knowledge or skills in a particular area of endeavor. A SME should have expertise in designing and guiding the implementation of solutions and tools used to functionally realize a real-world, working manifestation of their discipline to solve a specific customer problem or need. A SME should also have basic knowledge of other technical subjects.</td>
<td>12+</td>
<td>1) B.A. or B.S. in IT;</td>
</tr>
<tr>
<td>IT Project Manager</td>
<td>is responsible for organizing, coordinating and managing multiple, concurrent IT projects. She provides strategic guidance to teams, project managers and other stakeholders in ways that promote the achievement of customer-defined business value via the program's portfolio of projects. She oversees and communicates the progress of program operations within the customer-defined constraints of scope, schedule and budget.</td>

Service Contract Labor Standards: The Service Contract Labor Standards (SCLS), formerly known as the Service Contract Act (SCA), is applicable to this contract as it applies to the entire Professional Services Schedule (PSS) Schedule and all services provided. While no specific labor categories have been identified as being subject to SCLS/SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCLS/SCA eligible labor categories. If and/or when the contractor adds SCLS/SCA labor categories to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS/SCA matrix identifying the GSA labor category titles, the occupational code, SCLS/SCA labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.
