What do Our Members Say?

Workshops are consistently our top-rated member experience.

“This was an awesome workshop! Extremely valuable for our team. We walked away with tangible artifacts, a clear roadmap for next steps, and areas to further discuss/deep dive into. Our workshop facilitator did an excellent job ensuring my needs (as company leader) where addressed in pre-meetings – and then performed a superb job engaging everyone and keeping the flow moving. My first real virtual workshop over multiple days (COVID 19) and it was a huge success. Will look to book [a workshop] again for future areas of interest.”

“Info-Tech’s project team was organized and thoroughly professional. They were proactive, adaptable, and worked diligently to understand our expectations. I was very impressed with the team and the quality of the delivered outputs.”

A college degree is a valuable asset and communicates the caliber of the employee. Info-Tech Research Group (ITRG) has a standard commercial practice of allowing education to be substituted for years of experience as shown in our Education Substitution Methodology (e.g. a bachelor’s degree may be substituted for 4 years of required experience with a high school diploma). Through ITRG’s years of experience with observing employee development, ITRG has determined that a beginner with a college degree is most likely to perform the work requirements to meet the quality assurance standards of the company.

ITRG has also found that actual on-the-job training (performing a job under the tutelage of a senior-level experienced manager) is an exceptionally valuable way to teach an employee how to perform a job that meets the high-quality standards expected by clients. ITRG has found that a non-degreed employee after 4 years of specific experience in a position begins to perform at the same level as a degreed individual. Therefore, ITRG also has a standard commercial practice of allowing experience to be substituted for education as shown in our Experience Substitution Methodology (e.g. high school diploma + 4 years’ additional experience equals bachelor’s degree).

Service Level Details

Accessing Info-Tech Services
Our Services include an easy-to-administrate access model that will allow maximum access by IT team members. Each Research Member is assigned a username and password and receives a new user tour upon registration.

Our services are provided via the web and are supported on the following web browsers:

- Chrome 55+
- Edge 12+
- Firefox 52+
- Safari 10+
- IE 11+

It is possible that our web-based services will run without issue on older software; however, we do not currently actively test using browser versions older than those listed above.

All online downloads are available in either MS Office or PDF formats and may also be available in compressed ZIP archives of the same formats.

We have clients in a wide variety of locations and time zones, and we accommodate them based on the times that are common to our respective time zones.

Analysts are available at their earliest opportunity, but due to the amount of preparation involved, a minimum of 24 hours lead time is required. Generally, if there are no travel complications, analysts are available within 2-3 business days of the request.

Dedicated Account Management
Info-Tech will provide members (license/seat holders) with an Account Manager who will be the main point of contact for all IT research & advisory service requirements.

These requirements include (but are not limited to):
- Onboarding all new members via teleconference.
- Creation and delivery of a Key Initiative Plan to align Info-Tech resources to the user’s specific requirements and needs based on role and upcoming technology projects.
- Handle all basic service requests (adding/deleting members, sending documents, answering all membership questions, sending usage reports, renewal duties, etc.).
- Book advisory services for members such as analyst calls, Guided Implementation calls, Workshop requests, contract review calls, data-driven diagnostic benchmarking programs, etc.
- Scheduled touchpoint to ensure maximum usage by the members.

Info-Tech’s Account Manager will be one dedicated person supported by a team. Users will also have access to Info-Tech’s entire bench of research analysts and subject matter experts to guide them through technology projects via their advisory services access. It is important to note that while the Account Manager will be one dedicated person, members will have access to hundreds of IT experts through their account manager and membership subscription services.

All these management services are included within the overall services offered to Info-Tech members. Please note it is Info-Tech’s mission to ensure our services are used, not just read. We will work with your team tirelessly to ensure all named members get the absolute most out of their membership and drive year-over-year services to provide ongoing and dedicated support to project success and sustainability.

Info-Tech has self-serve options in terms of booking calls, diagnostic programs, requesting research, etc. on our site that the members will all have access to. However, the dedicated Counselors and account management team will have developed project and technology plans to drive the membership services unique to the specific needs of the various members and shape the research and project assistance over a 12-month span. Info-Tech’s dedicated account manager will also work with non-named users via the named users for training program access and shared research and advisory service inclusion access.
