COMPANY BACKGROUND

AlphaSix Corporation (AlphaSix) is an IT services and products contractor specializing in big data solutions, infrastructure, cybersecurity, medical fraud detection, virtualization, and managed print. Located within the Dulles Technology Corridor in Sterling, VA, we cater to the unique needs of government and education organizations. AlphaSix executives and employees have direct experience supporting Federal customers for more than 20 years. The following is a brief description of our core offerings:

- **Infrastructure Services.** Every organization's IT environment requires planning, maintenance, and upgrades. Of key importance are the architecture, design, and implementation of Enterprise Solutions, such as Data Center server and storage solutions, as well as client solutions such as laptops, desktops, and tablets. AlphaSix has extensive experience with networks and security and is able to not only help our customers design their infrastructures, but also provide the components that comprise the solution.
- **Cyber Security.** Our cyber security team consists of highly skilled, certified IT security experts and engineers. The majority of our staff hold security clearances and have worked in for some of the most highly sensitive Government customers in some of the most secure environments. Our personnel are adept in developing, evaluating, and implementing cyber security policy, conducting risk and vulnerability assessments, and securing and optimizing our nation's most critical and private IT systems. Skills include digital forensics services, vulnerability and risk assessments, penetration testing, policy development, configuration management, enterprise security architecture design, computer security incident response, operations management, application and software security assurance, insider threat, and counter-intelligence.
- **Virtualization.** Due to the rising costs of managing and maintaining sprawling data centers, virtualization has become the standard, enabling customers to more efficiently manage their servers and storage by creating virtual machines that better utilize their costly hardware. In addition, customers are virtualizing their applications and moving them to the cloud and then accessing them through zero clients in a virtual desktop infrastructure (VDI). AlphaSix has designed and implemented numerous secure VDI installations and can assist our customers as they initiate these efforts.
- **Big Data Solutions.** Big Data is the latest trend in the world of business intelligence wherein customers are attempting to harness the vast amount of data that is being produced at unprecedented levels. For many of our customers in the intelligence and law enforcement fields, this data can be used to pinpoint suspicious activities and help focus their efforts in the right direction. We couple our expertise in database design with new tools, such as Hadoop, to allow our customers to extract, transform, and load their information so they can quickly access and leverage that information.
- **Print Management.** Printing is referred to as the last bastion of cost savings due to many workers claiming to need their own devices for security reasons; these devices are often underutilized and expensive to maintain. AlphaSix offers a secure print solution that allows our customers to remove printers from the desktop, reduce the amount of toner applied to each page, and save millions of dollars.
- **Medical Fraud Detection.** Drug diversion is the movement of any pharmaceutically controlled substance from the legal drug delivery system for illicit use. At present, drug diversion is reaching epidemic proportions in the United States and is a growing concern among Federal, State and Local Governments regulators and investigators as well as health care practitioners. Drug diversion represents a substantial patient safety risk but also a significant legal and liability risk to health care providers. AlphaSix has domain-specific experience delivering innovative solutions to health-related missions from policy to healthcare-related IT initiatives.

INFORMATION FOR ORDERING ACTIVITIES APPLICABLE TO ALL SPECIAL ITEM NUMBERS

SPECIAL NOTICE TO AGENCIES: SMALL BUSINESS PARTICIPATION

SBA strongly supports the participation of small business concerns in the Federal Acquisition Service. To enhance Small Business Participation SBA policy allows agencies to include in their procurement base and goals, the dollar value of orders expected to be placed against the Federal Supply Schedules, and to report accomplishments against these goals.

For orders exceeding the micropurchase threshold, FAR 8.404 requires agencies to consider the catalogs/pricelists of at least three schedule contractors or consider reasonably available information by using the GSA Advantage!TM on-line shopping service (www.gsaadvantage.gov). The catalogs/pricelists, GSA Advantage!TM and the Federal Acquisition Service Home Page (www.gsa.gov/fas) contain information on a broad array of products and services offered by small business concerns.

This information should be used as a tool to assist ordering activities in meeting or exceeding established small business goals. It should also be used as a tool to assist in including small, small disadvantaged, and women-owned small businesses among those considered when selecting pricelists for a best value determination.

For orders exceeding the micropurchase threshold, customers are to give preference to small business concerns when two or more items at the same delivered price will satisfy their requirement.

Renewal of the term licenses and/or

maintenance orders citing the new appropriation shall be required, if the term licenses and/or maintenance is to be continued during any remainder of the contract period.

d. Cross-Year Funding Within Contract Period. Where an ordering activity's specific appropriation authority provides for funds in excess of a 12 month (fiscal year) period, the ordering activity may place an order under this schedule contract for a period up to the expiration of the contract period, notwithstanding the intervening fiscal years.

e. Ordering activities should notify the Contractor in writing thirty (30) calendar days prior to the expiration of an order, if the term licenses and/or maintenance is to be terminated at that time. Orders for the continuation of term licenses and/or maintenance will be required if the term licenses and/or maintenance is to be continued during the subsequent period.

7. CONVERSION FROM TERM LICENSE TO PERPETUAL LICENSE

a. The ordering activity may convert term licenses to perpetual licenses for any or all software at any time following acceptance of software. At the request of the ordering activity the Contractor shall furnish, within ten (10) calendar days, for each software product that is contemplated for conversion, the total amount of conversion credits which have accrued while the software was on a term license and the date of the last update or enhancement.

8. TERM LICENSE CESSATION

a. After a software product has been on a continuous term license for a period of _____* months, a fully paid-up, non-exclusive, perpetual license for the software product shall automatically accrue to the ordering activity. The period of continuous term license for automatic accrual of a fully paid-up perpetual license does not have to be achieved during a particular fiscal year; it is a written Contractor commitment which continues to be available for software that is initially ordered under this contract, until a fully paid-up perpetual license accrues to the ordering activity. However, should the term license of the software be discontinued before the specified period of the continuous term license has been satisfied, the perpetual license accrual shall be forfeited.

b. The Contractor agrees to provide updates and maintenance service for the software after a perpetual license has accrued, at the prices and terms of Special Item Number 132-34, if the licensee elects to order such services. Title to the software shall remain with the Contractor.

9. UTILIZATION LIMITATIONS - (SIN 132-32, SIN 132-33, AND SIN 132-34)

(1) Title to and ownership of the software and documentation shall remain with the Contractor, unless otherwise specified.

The software may be used by any subdivision of the ordering activity (service, bureau, division, command, etc.) that has access to the site the software is placed at, even if the subdivision did not participate in the acquisition of the software. Further, the software may be used on a sharing basis where multiple agencies have joint projects that can be satisfied by the use of the software

placed at one ordering activity's site. This would allow other agencies access to one ordering activity's database. For ordering activity public domain databases, user agencies and third parties may use the computer program to enter, retrieve, analyze and present data. The user ordering activity will take appropriate action by instruction, agreement, or otherwise, to protect the Contractor's proprietary property with any third parties that are permitted access to the computer programs and documentation in connection with the user ordering activity's permitted use of the computer programs and documentation. For purposes of this section, all such permitted third parties shall be deemed agents of the user ordering activity.

(3) Except as is provided in paragraph 8.b(2) above, the ordering activity shall not provide or otherwise make available the software or documentation, or any portion thereof, in any form, to any third party without the prior written approval of the Contractor. Third parties do not include prime Contractors, subcontractors and agents of the ordering activity who have the ordering activity's permission to use the licensed software and documentation at the facility, and who have agreed to use the licensed software and documentation only in accordance with these restrictions. This provision does not limit the right of the ordering activity to use software, documentation, or information therein, which the ordering activity may already have or obtains without restrictions.
