Customer Information:

1a. Special item number(s):

   54151S Information Technology Professional Services
   541611 Management and Financial Consulting, Acquisition and Grants Management Support, and Business Program and Project Management Services
   541300ENG Engineering Services
   541219 Budget and Financial Management Services
   OLM – Order-Level Materials

1b. Labor Category Pricing – Please see Pages 6-7

1c. Labor Category Descriptions: Please see Pages 8-14

2. Maximum Order: 54151S; 541611; 541330ENG, 541219 = $1,000,000.00 / OLM = $250,000.00

3. Minimum Order: $100.00

4. Geographic Coverage (delivery Area): Domestic Only

5. Point(s) of production (city, county, and state or foreign country): Same as company address

6. Discount from list prices or statement of net price: Government net prices (discounts already deducted).

7. Quantity discounts: None

8. Prompt payment terms: Net 30 Days. Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions.

9. Foreign items (list items by country of origin): None

10a. Time of Delivery: Negotiated at the order level

10b. Expedited Delivery: Negotiated at the order level

10c. Overnight and 2-day delivery: Negotiated at the order level

10d. Urgent Requirements: Negotiated at the order level

11. F.O. B Points(s): Destination

12a. Ordering Address(es): Same as Contractor
12b. Ordering procedures: For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA’s) are found in Federal Acquisition Regulation (FAR) 8.405-3.

13. Payment address(es): Same as company address

14. Warranty provision.: Contractor’s standard commercial warranty.

15. Export Packing Charges (if applicable): N/A

16. Terms and conditions of rental, maintenance, and repair (if applicable): N/A

17. Terms and conditions of installation (if applicable): N/A

18a. Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable): N/A

18b. Terms and conditions for any other services (if applicable): N/A

19. List of service and distribution points (if applicable): N/A

20. List of participating dealers (if applicable): N/A

21. Preventive maintenance (if applicable): N/A

22a. Special attributes such as environmental attributes (e.g., recycled content, energy efficiency, and/or reduced pollutants). N/A

22b. Section 508 compliance information: N/A
23. Data Universal Numbering System (DUNS) number: 837108161

24. Notification regarding registration in SAM.gov Registration: Registered

Labor Category Descriptions

1. Journeyman Information Systems Engineer
Minimum/General Experience: 5 years specialized systems experience
Individuals at this level perform routine engineering tasks to support systems development. They participate in disciplined processes that assure compliance with rigorous company and client standards, policies and procedures for quality task performance and must be qualified to serve as Configuration Manager. Performing any combination of software and systems engineering, network services, hardware analysis and integration, database planning and design, data/records management, programming, system prototyping, business process re-engineering, system acquisition support, systems analysis and design, test and evaluation design support, systems integration, studies and analysis.
Education: Bachelor's Degree

2. Application Developer/DBA
Minimum/General Experience: 5 years general experience of which at least 2 years in application development and 2 years in specialized database experience
Responsible for the administration and management of database management systems. Perform the creation and management of databases, database performance, monitoring, tuning and capacity planning of the databases. Respond to frequent management requests for information. Analyzes complex organizational and computer database system(s); designs and implements computer database systems in both stand-alone and network configurations; is very knowledgeable in both commercially-available off-the-shelf (COTS) and custom database software platforms; and develops technical documentation detailing the installation procedures. Performs analyses of organizational and computer database system(s); Designs and implements computer databases systems in both stand-alone and networks configurations using commercially available and custom database software platforms; Task lead or supervisor of intermediate, junior and/or entry level database engineers. Knowledge and experience in database security including access control, back-up and recovery.
Education: Bachelor's Degree

3. Senior Principal Engineer
Minimum/General Experience: 6 years specialized systems experience
Provides system engineering support in architectural design and engineering of large-scale enterprise systems, heterogeneous systems integration and legacy system migrations.
Develop and implementation plan for developing complex systems comprising of diverse hardware, software, communication and security components. Defines and develops goals and milestones for subsystem implementation and testing. Analyzes and develops interface specifications for integrating dissimilar systems. Develops system/subsystem test plans, and evaluates test results. Advise on the selection of technologies with regards to programming languages, data storage, and data access, inter-process communications and hardware/software platform. Provide technical direction and guidance for system engineers involved modifications, development or migration of computer systems. Task lead or supervise of intermediate, junior and/or entry level systems engineers.
Education: Bachelor's Degree
4. **Senior Principal Engineer**  
Minimum/General Experience: 6 years specialized systems experience  
Provides system engineering support in architectural design and engineering of large-scale enterprise systems, heterogeneous systems integration and legacy system migrations. Develop and implementation plan for developing complex systems comprising of diverse hardware, software, communication and security components. Defines and develops goals and milestones for subsystem implementation and testing. Analyzes and develops interface specifications for integrating dissimilar systems. Develops system/subsystem test plans, and evaluates test results. Advise on the selection of technologies with regards to programming languages, data storage, and data access, inter-process communications and hardware/software platform. Provide technical direction and guidance for system engineers involved modifications, development or migration of computer systems. Task lead or supervise of intermediate, junior and/or entry level systems engineers.  
Education: Bachelor's Degree

5. **Data Base Administrator**  
Minimum/General Experience: 8 years’ experience in IT discipline using variety of database systems and experience in developing and administering relational database management systems  
Acts as a DB Manager or Lead and leads the design, implementation and maintenance of complex databases, access methods, access time, device allocation, validation checks, organization, protection and security, documentation and statistical methods. Direct junior DB Administrators in maintaining database dictionaries, monitoring standards and procedures and integration of systems through database design. Provide technical expertise and support in planning, acquiring, implementing, and operating database management systems. Evaluates and recommends available DBMS products to support validated user requirements. Define file organization, indexing methods, and security procedures for specific user applications. Develops, implements, and maintains data backup and recovery, data integrity, security and recoverability. Monitors performance of the DBMS and evaluates for improving efficiency.  
Education: Bachelor's Degree

6. **Senior Database Administrator**  
Minimum/General Experience: 10 years of experience in using variety of database systems and experience in developing and administering relational database management systems  
Experience in all functions of database administration with specialized experience in application programming and design. Provide highly technical expertise and support in the use of DBMS. Must be able to evaluate and recommend available DBMS products to support validated user requirements. Define file organization, indexing methods, and security procedures for specific user applications. Develops, implements and maintains database backup and recovery procedures for the processing environments and ensure data integrity, security and recoverability are built into the DBMS applications. Acts as a DB Manager or Lead and leads the design, implementation and maintenance of complex databases. Direct junior and mid-level DB Administrators in maintaining database dictionaries, monitoring standards and procedures and integration of systems through database design. Provide technical expertise and support in planning, acquiring, implementing, and operating database management systems.  
Education: Bachelor's Degree
7. **Network Admin**  
Minimum/General Experience: Three (3) years of technical experience  
Maintain, monitor, install and configure computer networks and systems to improve network performance for computer systems and networks. Administer design, organization, or implementation of network. Fixing software and hardware configuration issues and communicates with users, technical teams, and vendors on new technology and system upgrades and to determine software and hardware installation requirements. Document software technical specifications, application design, and database design.  
Education: Bachelor’s Degree

8. **Web Developer**  
Minimum/General Experience: Three (3) years of technical experience  
Analyze, design, develop, test, and maintain web applications. Perform app maintenance and troubleshoot problems. Develop custom reports. Meet with end users to analyze their needs to implement software solutions. Provide analysis and recommendations to management in user needs and software requirements to determine feasibility of design.  
Education: Bachelor’s Degree

9. **IT Specialist**  
Minimum/General Experience: Five (5) years of technical experience  
Diagnose, research, analyze, troubleshoot, and implement solutions for user-reported and technology issues. Testing, analyzing results for software fixes, Mods, software loads, etc. Analyses and identifies customer’s system requirements by designing or conducting analytical studies, cost benefit analysis. Participates in design reviews, develops information, systems testing strategies, plans, or scenarios, as well as develops and implements information systems security plans and procedures  
Education: Bachelor’s Degree

10. **Senior Software Developer**  
Minimum/General Experience: 7+ years full stack experience in software development  
Work with team in an Agile environment to design, develop, test, and deploy web-based applications. Be involved in all phases of the software development lifecycle for custom client/server web-based applications comprising a variety of programming languages, databases, and business intelligence tools. Strong understanding of Object-Oriented Programming (OOP) principals. Design and build dynamic web reports. Documenting business and system requirements, processes, workflows and test plans.  
Education: Bachelor’s Degree

11. **Systems Architect**  
Minimum/General Experience: 7+ years of experience  
Assists in the design, development, maintenance, and documentation of solution architectures ensuring traceability to the Enterprise architecture and Enterprise requirements. Performs the analysis of user requirements, procedures, and problems to automate or improve existing systems and review computer system capabilities, workflow, and scheduling limitations. Assists in the development of proposed changes to the solutions architecture design based on analysis of requirements and new technology.  
Education: Bachelor’s Degree
12. **IT Consultant**  
Minimum/General Experience: 5+ years of experience  
Provides technical guidance concerning automated solutions to information processing problems. Performs analyses and studies; manages the project work; Provides technical and specialized guidance and solutions; Develop functional and technical information system designs; Design and manage databases; Define information systems requirements.  
Education: Bachelor’s Degree

13. **Database Architect**  
Minimum/General Experience: 5+ years of experience  
Designing and building relational databases, and experience performing data analysis design, and archive/recovery design and implementation. Developing strategies for data acquisitions, archive recovery, and implementation of a database. Reviews data structures and recommends optimizations and reconfigurations. Models, documents, and guides the logical and conceptual relationship of data and database changes. Design and manage databases.  
Education: Bachelor’s Degree

14. **Subject Matter Expert**  
Minimum/General Experience: 5+ years of experience  
Serve as subject matter expert in a functional, technical area. Participate across project phases. Apply principles, methods, and knowledge towards the project approach, deliverables, reports, representations, or quality control. Supporting system user insights that will help deliver impactful services.  
Education: Bachelor’s Degree
Labor Category Descriptions 541611

1. Acquisition Specialist
Minimum/General Experience: 6 years
Experience in acquisition planning, acquisition strategy, contracts, performance information, workflow analysis, process analysis, source selection and by utilizing an understanding of the FAR develop management techniques and processes. Detailed knowledge of acquisition policy, programs and budgets including funds control, and fund transfers. Developing acquisition policy, guidance and procedures to ensure timely requirements development, tracking contract funding execution and analyzing program and project schedules. Developing acquisition strategies, to include all program documentation to develop RFP packages, to include Acquisition Strategy/Plan, Source Selection Plans, SoW/SoO (or other requirements documents) CDRL deliverables.
Education: Bachelor’s Degree

2. Financial Resource Manager
Minimum/General Experience: 6 years
Serve as a Financial Resource Manager. Advise and assist management with the financial review and assessment of programs. Perform various budget functions involving formulation, justification, and execution of funds. Serves as financial specialist to the acquisition program office on all financial matters and interpreting and implementing related policies and procedures to government personnel. Monitors limitation of funds statuses and coordinates with program officer and customers on funding requests. Complete weekly, monthly and annual reconciliation of costs for acquisition programs. Develop program life cycle cost estimates, cost models and estimating relationships. Track annual funding in regards to allocation, obligation, and expenditure of funds.
Education: Bachelor’s Degree

3. Cost/Budget Analyst
Minimum/General Experience: 5 years
Skilled in budgeting, manpower and resource planning and financial reporting. Develop and prepare budget estimates, justifications, plans, and cost estimates.
