1b Lowest Priced Item: N/A

1c Hourly Rates & Labor Category Descriptions: See Terms and Conditions

2 Maximum Order: 54151S - $500,000; OLM - $250,000

3 Minimum Order: $100

4 Geographic Coverage: Worldwide

5 Point of Production: N/A

6 Discount: See attached price list. Prices shown are net of discount.

7 Quantity Discounts: Additional 2% on orders over $200,000 (total of 5%); Additional 2% on orders over $500,000 (total of 7%)

8 Prompt Payment Terms: 1% - 10 Days, Net 30

Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions.

9a Government Purchase Cards: Government Purchase Cards must be accepted at or below the micro-purchase threshold.

9b Contractor will not accept the Government Commercial Credit Card above the micro-purchase threshold.

10 Foreign Items: None

11 Time of Delivery:

   a. Normal: As Agreed Upon with Ordering Activity
   b. Expedited: Contact Contractor for Availability
   c. Overnight & 2-day delivery: Contact Contractor for Availability
   d. Urgent Requirements: Contact Contractor for Availability

12 FOB Point(s): Destination for Domestic and Overseas delivery

13a Ordering Address: Same as Contractor address

13b Ordering procedures: For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA’s), are found in Federal Acquisition Regulation (FAR) 8.405-3.

The Service Contract Labor Standards (SCLS) is applicable to this contract as it applies to the entire Professional Services Schedule and all services provided. While no specific labor categories have been identified as being subject to SCLS due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CFR 541.300), this contract still maintains the provisions and protections for SCLS eligible labor categories. If and / or when the contractor adds SCLS labor categories / employees to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS matrix identifying the GSA labor category titles, the occupational code, SCLS labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.

**LABOR CATEGORY DESCRIPTIONS:**

**SYSTEMS ARCHITECT/DBA**

**Minimum/General Experience:** 22 years.

**Functional Responsibility:** Participates in the design, creation, and maintenance of computerized databases. Recommends systems changes to programming management. Establishes system information requirements in the development of enterprise-wide or large-scale information systems. Designs architecture to include the software, hardware and communications to support the total requirements. Evaluates systemic problems of work flows, organization and planning and develops appropriate corrective action. Works with management to develop database strategies to support company needs. Consults with and advises users on access to various databases. Provides technical guidance for personnel performing planning, development, operations and sustainment activities.

**Minimum Education:** Master’s Degree

**TECHNICAL ARCHITECT / SENIOR DEVELOPER**

**Minimum/General Experience:** 25 years.

**Functional Responsibility:** Leads project implementations from a technological perspective. Advises clients on key architectural decisions concerning platform and supporting technologies. Reviews system requirements, identifies resources and estimates timelines for project completion. Produces technical architectures that are modifiable, dependable and scalable. Offers solutions including database consolidation, implementation and application integration with focus on architectural services.

**Minimum Education:** Bachelor’s Degree
**SYSTEMS ADMINISTRATOR / PROJECT LEAD**

**Minimum/General Experience:** 25 years.

**Functional Responsibility:** Responsible for the installation, maintenance, configuration, and integrity of computer software and systems. Ensures long-term requirements of systems operations and administration are included in the overall information systems planning of the organization. Implements operating system enhancements that will improve the reliability and performance of the system. Monitors the system to achieve optimum performance levels. Selects operating systems and protocol suites, and configures network devices. Implements a schedule of system backups and database archive operations.

**Minimum Education:** Bachelor’s Degree

**PROJECT MANAGER**

**Minimum/General Experience:** 20 years.

**Functional Responsibility:** Organizes, directs, and coordinates the planning, production, and delivery of all contract required deliverables. Ensures that technical solutions and schedules are implemented in a timely manner. Oversees information technology professionals involved in analyzing, designing, integrating, testing, documenting, implementing, operating, and sustaining information systems. Serves as primary customer contact for program information, understanding customer needs, and addressing issues.

**Minimum Education:** Bachelor’s Degree

**TECHNICAL LEAD**

**Minimum/General Experience:** 15 years.

**Functional Responsibility:** Ensures deliverables meet design and technical specifications of clients. Performs system wide requirement analysis. Provides solutions to technical challenges in development of digital products or solutions. Performs thorough unit testing and integration testing for the whole systems. Assists Project lead in project coordination.

**Minimum Education:** Bachelor’s Degree

**BUSINESS ANALYST**

**Minimum/General Experience:** 5 years.

**Functional Responsibility:** Formulates and defines systems scope and objectives based on user needs and an understanding of business systems and industry requirements. Researches and analyzes business requirements. Devises or modifies procedures to solve complex problems
considering computer equipment capacity and limitations. Considers the business implications of the application of technology to the current and future business environment.

**Minimum Education:** Bachelor’s Degree

### DATABASE DEVELOPER

**Minimum/General Experience:** 15 years.

**Functional Responsibility:** Responsible for product support and maintenance of the database reporting system. Designs/implements data strategy methods. Develops appropriate programs and systems documentation. Collects data, analyzes the collected information, and then implements code for the logic developed through algorithms and flowcharts. Reviews security issues of the data and develops structures, procedures and triggers. Prepares and maintains report of the entire backend development life cycle.

**Minimum Education:** Bachelor’s Degree

### SENIOR DEVELOPER

**Minimum/General Experience:** 15 years.

**Functional Responsibility:** Creates logical and functional software code in a variety of languages. Designs, develops, troubleshoots, debugs, implements and tests software code for software components of a system. Reviews current systems and presents ideas for system improvements. Understands and articulates the benefits and risks associated with various coding languages and functional environments. Oversees project team and implements approaches to integrate developed software with other components, including backend databases. Coordinates integration of new products per client requirements. Mentors tasks of more junior developers.

**Minimum Education:** Bachelor’s Degree

### DEVELOPER

**Minimum/General Experience:** 10 years.

**Functional Responsibility:** Designs, develops, troubleshoots, debugs, implements and tests software code for software components of a system. Able to analyze customer needs and develop overall concept and design objectives. Experienced in debugging and correcting errors in computer programs. Works with other members of a project team to specify and implement approaches to integrate developed software with other components, including backend databases. Produces detailed specifications and tests product in controlled situations. Performs unit testing to ensure applications meet technical and functional requirements.

**Minimum Education:** Bachelor’s Degree
ASSOCIATE DEVELOPER

Minimum/General Experience: 5 years.

Functional Responsibility: Designs, develops, troubleshoots, debugs, implements and tests software code for software components of a system. Works with other members of a project team to specify and implement approaches to integrate developed software with other components, including backend databases. Reviews current systems and presents ideas for system improvements. Coordinates integration of new products per client requirements. Produces detailed specifications and tests product in controlled situations. Maintains systems once they are up and running. Performs tasks under supervision of more senior developers.

Minimum Education: Bachelor’s Degree

TECHNICAL PROJECT MANAGER

Minimum/General Experience: 15 years including 10 years of development experience.

Functional Responsibility: Coordinates team managers and technical personnel throughout all stages of a project. Performs day-to-day management of data processing and other information system professionals who have been involved in analyzing, designing, integrating, testing, documenting, converting, extending, and implementing information systems. Manages hardware and software installation and upgrades while maintaining internal and external sites. Monitors project progress continuously and makes detailed scheduled reports relating to milestones and deliverables. Identifies problems, creates solutions, and implements efficiency improvements. Reviews proposed modifications on project plans, including meeting with interested parties to approve and implement beneficial changes. Oversees acquisition of resources and materials as needed.

Minimum Education: Bachelor’s Degree

SALESFORCE/SOFTWARE ARCHITECT

Minimum/General Experience: 10 years

Functional Responsibility: Responsible for designing, developing and implementing software solutions to address complex business issues. Dictates design choices to software developers, including but not limited to: platforms, coding and technical levels. Makes sure the software and system architectures are in synchronization. Manage risk identification and risk mitigation strategies associated with the architecture. Interprets business requirements and recommends processes to ensure the highest quality product platform.

Minimum Education: Bachelor’s Degree
