Federal Supply Service
Authorized Federal Supply Schedule Pricelist

On-line access to contract ordering information, terms and conditions, up-to-date pricing, and the option to create an electronic delivery order are available through GSA Advantage!, a menu-driven database system. The INTERNET address for GSA Advantage! is: GSAAdvantage.gov.

MULTIPLE AWARD SCHEDULE

LARGE CATEGORY: INFORMATION TECHNOLOGY
SUBCATEGORY: IT SERVICES

SIN 54151ECOM  Electronic Commerce and Subscription Services
Includes value added network services, e-mail services, Internet access services, electronic subscription services, data transmission services, and emerging electronic commerce technologies.

NOTE: Subject to Cooperative Purchasing
FSC/PSC Code: D304

SIN 54151HEAL  Health Information Technology Services
Includes a wide range of Health IT services to include connected health, electronic health records, health information exchanges, health analytics, personal health information management, innovative Health IT solutions, health informatics, emerging Health IT research, and other Health IT services.

NOTE: Subject to Cooperative Purchasing
FSC/PSC Code: D399

SIN 54151S  Information Technology Professional Services
IT Professional Services and/or labor categories for database planning and design; systems analysis, integration, and design; programming, conversion and implementation support; network services, data/records management, and testing.

NOTE: Subject to Cooperative Purchasing
FSC/PSC Code: D399

LARGE CATEGORY: MISCELLANEOUS
SUBCATEGORY: COMPLIMENTARY SINS

SIN OLM  Order-Level Materials (OLM)
OLMs are supplies and/or services acquired in direct support of an individual task or delivery order placed against a Schedule contract or BPA. OLM pricing is not established at the Schedule contract or BPA level, but at the order level. Since OLMs are identified and acquired at the order level, the ordering contracting officer (OCO) is responsible for making a fair and reasonable price determination for all OLMs.
OLMs are procured under a special ordering procedure that simplifies the process for acquiring supplies and services necessary to support individual task or delivery orders placed against a Schedule contract or BPA. Using this new procedure, ancillary supplies and services not known at the time of the Schedule award may be included and priced at the order level.

OLM SIN-Level Requirements/Ordering Instructions:

OLMs are:
- Purchased under the authority of the FSS Program
- Unknown until an order is placed
- Defined and priced at the ordering activity level in accordance with GSAR clause 552.238-115 Special Ordering

Procedures for the Acquisition of Order-Level Materials. (Price analysis for OLMs is not conducted when awarding the FSS contract or FSS BPA; therefore, GSAR 538.270 and 538.271 do not apply to OLMs)
- Only authorized for use in direct support of another awarded SIN.
- Only authorized for inclusion at the order level under a Time-and-Materials (T&M) or Labor-Hour (LH) Contract Line Item Number (CLIN)
- Subject to a Not To Exceed (NTE) ceiling price

OLMs are not:
- "Open Market Items"
- Items awarded under ancillary supplies/services or other direct cost (ODC) SINs (these items are defined, priced, and awarded at the FSS contract level)

OLM Pricing:
- Prices for items provided under the Order-Level Materials SIN must be inclusive of the Industrial Funding Fee (IFF).
- The value of OLMs in a task or delivery order, or the cumulative value of OLMs in orders against a FSS BPA awarded under an FSS contract, cannot exceed 33.33%.

NOTE: When used in conjunction with a Cooperative Purchasing eligible SIN, this SIN is Cooperative Purchasing Eligible.

NOTE: Subject to Cooperative Purchasing

FSC/PSC Code: 0000

SPECIAL ITEM NUMBER 54151HEAL
HEALTH INFORMATION TECHNOLOGY SERVICES

Health IT Program Manager

Minimum/General Experience: Three years project management experience plus five years of specialized experience in managing large information systems and five years’ experience in a related field. Specific experience related to federal IT systems is a plus. Individuals with background and experience in EMR, HER, Health-exchanges are ideal candidates.

Functional Responsibility: Duties include but are not limited to overall management of tasks, software development, installation, training, transition, maintenance, security, and acceptance of healthcare IT systems applications. Provide supervisory technical and administrative direction for personnel performing tasks, including review of work products for correctness, adherence to the design concept and adherence to Government regulations and standards.

Minimum Education: An Associate Degree in life sciences.
Health IT Data Analyst

**Minimum/General Experience:** At least four years of related hands-on experience with the specific healthcare IT equipment, software or other requirements specified by an actual Statement of Work or Statement of Need. Scientific and healthcare data sets experience such as accessibility of care, ambulatory surgeries, emergency department visits, health care disparities, health care provided to low-income and other vulnerable populations, health care quality, health care spending, health care use, health information date element definitions, values and information models, HIV/AIDS, hospitalizations by payer, by states, for children and state specific health care quality information (strengths, weaknesses and opportunities for improvement) would be ideal.

**Functional Responsibility:** Provides expertise and guidance in the use of database management systems. Designs, implements, and maintains databases with respect to access methods and time, device allocation, validation checks, file organization, indexing methods, protection and security, documentation, guidelines, and statistical methods to support healthcare and related IT systems. Enforces guidelines such as FISMA and HIPPA. Establishes procedures for operations of the database and database management systems. Collects data elements and prepares database specifications. Develops, maintains, and controls the data dictionary. May include experience with database systems such as MS SQL Server, DB2, Sybase, Oracle, and Informix. May function as team leader and provide direction to less experienced database programmers/analysts.

**Minimum Education:** An Associate Degree or Bachelor’s degree.

Health IT Business Analyst

**Minimum/General Experience:** Five years of experience in analyzing data, monitoring and executing project plans in federal or state and local healthcare systems.

**Functional Responsibility:** Business Analyst will help with developing and operating solutions that integrate data from a range of patient, clinical and back office systems to healthcare providers, patients, payers, technology and pharmaceutical companies. Business Analyst will help and facilitate study of complex software requirements. Provide test activities and status, and assist in the development all test plans and test cases. Identifies, tracks and reports all defects discovered during system test, and works senior tester personnel and programmers to correct and implement system changes. Ensures the effective configuration management of software systems and applications.

**Minimum Education:** An Associate Degree or Bachelor’s degree.

Health IT Technical Consultant Level I

**Minimum/General Experience:** At least one year of related hands-on experience with the specific healthcare related application, equipment, software or other requirements specified by an actual Statement of Work or Statement of Need. An understanding of various COTS/GOTS package supporting Healthcare systems such as VISTA is desirable.

**Functional Responsibility:** Assists in the development of an emerging technologies plan and its technical implementation to support a healthcare IT application or infrastructure. Analyze the trade-off of implementing vs. not implementing the technology. Can provide cost benefit projections of using the emerging technology. Works under the general supervision of more experienced COTS/GOTS Technology Specialists.

**Minimum Education:** An Associate Degree or Bachelor’s degree.
Health IT Technical Consultant Level II

**Minimum/General Experience:** At least two years of related hands-on experience with the specific healthcare related application, equipment, software or other requirements specified by an actual Statement of Work or Statement of Need. Hands on experience working a federal or state and local healthcare system is highly desirable.

**Functional Responsibility:** Analyzes, designs, and applies the knowledge needed to investigate and solution emerging technologies and apply them to healthcare IT system or environment. Provide technical expertise and guidance in emerging technologies, plan, conduct, and technically implement. Analyze the trade-off of implementing vs. not implementing the technology. Can provide cost benefit projections of using the emerging technology.

**Minimum Education:** An Associate degree or Bachelor’s degree.

Health IT Technical Consultant Level III

**Minimum/General Experience:** At least four years of related hands-on experience with the specific healthcare related application, equipment, software or other requirements specified by an actual Statement of Work or Statement of Need. Hands on experience working a federal or state and local healthcare system is highly desirable.

**Functional Responsibility:** Assists in the development of an emerging technologies plan and its technical implementation. Analyze the trade-off of implementing vs. not implementing the technology as applicable in the context of healthcare IT environment. Can provide cost benefit projections of using the emerging technology. Works under the general supervision of more experienced COTS Technology Specialists.

**Minimum Education:** A Bachelor’s degree.

Health IT Technical Consultant Level IV

**Minimum/General Experience:** At least two years of related hands-on experience with the specific healthcare related application, equipment, software or other requirements specified by an actual Statement of Work or Statement of Need. Hands on experience working a federal or state and local healthcare system is highly desirable. A good understanding of federal, state, and local government health IT standards such as HIPPA is highly desirable.

**Functional Responsibility:** Assists in the development of an emerging technologies plan and its technical implementation to support a healthcare IT systems implementation and operations support. Analyze the trade-off of implementing vs. not implementing the technology. Analyses and recommends industry standards operational practices. Can provide cost benefit projections of using the emerging technology. Works under the general supervision of more experienced COTS/GOTS Technology Specialists.

**Minimum Education:** A Bachelor’s degree.
Health IT Database Administrator

**Minimum/General Experience:** At least four years of experience in monitoring and maintaining databases related to IT systems. A good understanding of health IT data governance practices, standards, and security framework.

**Functional Responsibility:** Administers computer databases supporting healthcare or related IT systems. Assigns contractor supplied personnel to various projects and directs their activities and evaluates and prepares performance reports. Consults with and advises various users of databases. Projects long-range requirements for database administration and design in conjunction with other managers in the information systems function. Prepares activity and progress reports in the database management section.

**Minimum Education:** An Associate Degree or Bachelor’s degree in science or public health.

IT Health Subject Matter Expert (SME)

**Minimum/General Experience:** At least 10 years of related hands-on experience with the specific healthcare application, systems, equipment, software or other requirements specified by an actual Statement of Work or Statement of Need. Hands on experience working a federal or state and local healthcare system in government and commercial enterprises. Exposure and working experience with health IT framework such as EMR, EHR, HIPPA, HL7 and IHE are preferred.

**Functional Responsibility:** Staff professional, expert in a specific domain with general knowledge of other domains. Provides strategic guidance and influences program direction. Recommends large scale information system solutions and policies, and assists with business integration across organizational levels. Provides program-level guidance within area of expertise and recommends healthcare IT-specific solutions and policies. Evaluates various business models including cost-benefit analysis and return on investment (ROI). May provide guidance to less experienced Business Consultants.

**Minimum Education:** A Bachelor’s degree in science or public health.
