Section III Terms and Conditions for all IT Contractors

1) Organizational Conflicts of Interest
   a) Definitions
      "Contractor" means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.
"Contractor and its affiliates" and "Contractor or its affiliates" refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor. An "Organizational conflict of interest" exists when the nature of the work to be performed under a proposed ordering activity contract, without some restriction on ordering activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor's or its affiliates' objectivity in performing contract work.

b) To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508

2) Services Performed
   a) All services performed by the Contractor under the terms of this contract shall be as an independent Contractor, and not as an agent or employee of the ordering activity.

   b) The Contractor shall commence performance of services on the date agreed to by the Contractor and the ordering activity.

   c) The Contractor agrees to render services only during normal working hours, unless otherwise agreed to by the Contractor and the ordering activity.

3) Travel
   Any Contractor travel required in the performance of services must comply with the Pub. L. 99-234 and FAR Part 31.205-46, as applicable, in effect on the date(s) the travel is performed. Established Federal Government per diem rates will apply to all Contractor travel.

4) Warranty
   a) Unless otherwise specified in this contract, the Contractor's standard commercial warranty as stated in the contract's commercial pricelist will apply to this contract.

   b) The Contractor's commercial guarantee/warranty shall be included in the Commercial Supplier Agreement to include Enterprise User License Agreements or Terms of Service (TOS) agreements, if applicable.

   c) Except as otherwise provided by an express or implied warranty, the Contractor will not be liable to the ordering activity for consequential damages resulting from any defect or deficiencies in accepted items.

   - Communicate project status, attends and facilitates project review meetings
   - Lead client and IT project team through business process redesign activities and change management impacts
   - Work with client and IT project team in the design and implementation of new organization structures and the design and development of training programs
   - Help provide vision and strategy for the successful completion of the project

2. **Senior Applications Systems Analyst**
   **Minimum Education:** Bachelor’s Degree in Computer Science, Information Systems, Engineering, Business, Social Science, or other related analytical, scientific, or technical disciplines.

   **General Experience:** A minimum of five (5) years of professional experience in information system implementations, post implementation support, business process redesign or change management.

   **Functional Responsibility:** The Senior Applications Systems Analyst will utilize their comprehensive skills and significant technical and or functional experience to implement complex business solutions. The Senior Applications Systems Analyst will leverage their extensive knowledge of technology, industry, and processes to provide direction and support to the IT project team. The Senior Applications Systems Analyst will have outstanding interpersonal, written, and oral communication skills as well as a broad understanding of the project implementation process, participating in the delivery of business objectives, project priorities and milestones. The individual is capable to perform the following tasks:
   - Define Business and Information System requirements
   - Develop Functional and Technical designs
   - Lead IT project team through process redesign, configuration, training, testing, pilot, prototype and post implementation delivery and support activities
   - Oversee the development of software configuration, designs, and computer programming
   - Provide senior level subject matter expertise in a specific discipline and may direct activities of
other expert and team resources
  - Participate in quality reviews to ensure deliverables adhere to project standards and requirements

3. **Applications Systems Analyst**

**Minimum Education:** Bachelor’s Degree in Computer Science, Information Systems, Engineering, Business, Social Science, or other related analytical, scientific, or technical disciplines.

**General Experience:** A minimum of three (3) years of professional experience in information system implementations, post implementation support, business process redesign or change management.

**Functional Responsibility:** The Applications Systems Analyst will utilize their strong analytical, technical and or functional experience to assist in the implementation of business solutions. The Applications Systems Analyst will leverage their knowledge of technology, industry, and processes to provide support to the IT project team. The Applications Systems Analyst will have outstanding interpersonal, written, and oral communication skills as well as an understanding of project implementation process, participating in the delivery of business objectives, project priorities and milestones. The Applications Systems Analyst will provide IT subject matter expertise in a specific discipline and may direct activities of other team resources. The individual is capable to perform the following tasks:

  - Define Business and Information System requirements
  - Develop Functional and Technical designs
  - Provide process redesign, configuration, training, testing, pilot, prototype and post implementation delivery and support activities
  - Participate in the development of software configuration, designs and computer programming
  - Provide subject matter expertise in a specific discipline and may direct activities of other expert and team resources
  - Develop documentation to support business processes, requirements, designs, testing, training, and briefings to support overall project
  - Participate in quality reviews to ensure deliverables adhere to project standards and requirements

4. **Senior Solution Architect**

**Minimum Education:** Bachelor’s Degree in Computer Science, Information Systems, Engineering, Business, Social Science, or other related analytical, scientific, or technical disciplines.

**General Experience:** A minimum of five (5) to eight (8) years of professional experience in information system implementations, post implementation support, process redesign and system integration.

**Functional Responsibility:** The Solution Architect Senior Solution Architect will utilize their comprehensive skills and significant technical and or functional experience to implement complex integrated business solutions. The Solution Architect Senior Solution Architect will leverage their extensive knowledge of technology to provide direction, lead and support to the IT project team. The Solution Architect Senior Solution Architect will have a broad understanding of the project implementation process, participating in the delivery of business objectives, project priorities and milestones. The individual is capable to perform the following tasks:

  - Define Business and Information System integrated requirements
  - Develop Functional and Technical integrated designs and processes
  - Lead project team through design, development, configuration, training, testing, pilot, prototype and post implementation delivery and support activities
  - Oversee the development of system integration, data mapping designs, identification of data sources and destinations, data integrity, error handling and audit tracking
- Provide configuration, designs, and computer programming
- Develops and applies systems engineering and architecture design methods, processes, tools, and techniques to analyze total systems, technology, and process integration requirements across multiple applications
- Provide subject matter expertise in a specific discipline and may direct activities of other experts and team resources
- Functional service delivery roles include but are not limited to the following: Solution Architect, System Analyst, and Programmer

5. Technical Analyst

**Minimum Education:** Bachelor’s Degree in Computer Science, Information Systems, Engineering, Business, Social Science, or other related analytical, scientific, or technical disciplines.

**General Experience:** A minimum of one (1) to three (3) years of professional experience in information system implementations, post implementation support, process redesign and system integration and development.

**Functional Responsibility:** The Technical Analyst will utilize their comprehensive skills and significant technical experience to implement complex integrated business solutions. The Technical Analyst will leverage their extensive knowledge of technology, system design and development to provide direction, lead and support to the IT project team.
