Minimum Years of Experience: 5 years information technology experience, including 1 years of experience in a management or supervisory capacity, plus three years of experience in the functional area of the project to be managed.

Minimum Educational/Degree Requirements: Bachelor’s degree in computer science, information systems or equivalent.
Applicable Training or Certification Requirements: Project Management Institute (PMI) certified Project Management Professional (PMP)

**Labor Category: Data Modeler**

Functional Responsibilities: Develop logical and physical data models. Map logical entities to the enterprise Canonical Data Model. Ensure data objects adhere to defined company standards and best practices. Develop, test, and implement scripts, programs, and related processes to collect, manage, and publish DEV and PROD metadata from data models. Develop DDL implementation/back-out plans. Promote data models into production metadata environments. Provide Level of Efforts (LOEs), activity status, identify dependencies impacting deliverables, identify risks and mitigation plans, and identify issues and impacts.

Minimum Years of Experience: 4 years of data modeling and metadata management experience.
Experience with both relational and dimensional data modeling. Experience with data management standards and data model practices

Minimum Educational/Degree Requirements: Bachelor’s degree in computer science, information systems or equivalent.

Applicable Training or Certification Requirements: Relevant Information Technology certifications to be determined on a per job/project/contract basis.

**Labor Category: Systems Admin**

Functional Responsibilities: Provide systems administration, operational support and problem resolution for the enterprise environments. Coordinate and perform the restoration of files and troubleshooting of problems by interacting with information technology staff/vendors. Coordinate the installation and maintenance of security patches, third party vendor software and hardware, maintenance and support, disk space management, backups and file restoration. Maintain availability of assigned services. Analyzes system problems and recommend solutions. Troubleshoot and coordinate with other members to resolve problems and implement resolutions. Provide technical support to resolve any Network and Operating system related issues rises during the production, performance test and end user test. Provide expertise in automated patch delivery systems, hardening, storage area network, and operating systems. Work with Security team to harden the servers. Must work well with general guidance, provide competent technical input to technical writing team for system documentation, be detailed and security oriented.

Minimum Years of Experience: Minimum 5 years of hands on experience in virtualization technologies,
systems and network administration in Linux, UNIX and Windows environments. equivalent.

Applicable Training or Certification Requirements: Relevant Information Technology certifications to be determined on a per job/project/contract basis.

**Labor Category: Business Analyst**

Functional Responsibilities: Work closely under the general direction of Information Technology Project Manager, or other consultants, supporting the information management needs of users and groups across an organization. IT Perform activities including requirements gathering, translation of requirements to systems specifications, data management and manipulation, and technology implementation. Shall bring a combination of business process understanding with practical information technology implementation experience.

Minimum Years of Experience: 6 years’ experience in the business processes associated with information technology implementations, as well as the adaptation of those processes to the IT lifecycle.

Minimum Educational/Degree Requirements: Bachelor’s degree in computer science, information systems or equivalent.

Applicable Training or Certification Requirements: Relevant Information Technology certifications to be determined on a per job/project/contract basis
