Multiple Award Schedule – Large Category – Information Technology Category (ITC)

PSC: D399

Contract number: GS35F498DA

Valid from September 15, 2016 through September 14, 2021

A812 MAS Consolidation: 2/7/2020

Business Size: Small Business

Ameex Technologies Corporation,
1701 E Woodfield Rd Suite 710,
Schaumburg, IL 60173
www.ameexusa.com
Phone: (847) 563-3064
Fax: 847-517-9441

Contract Administrator
Preethi Arockia,
Email: arockia.preethi@ameexusa.com
Phone: 847-963-3064

On-line access to contract ordering information, terms and conditions, up to date pricing and the option to create an electronic delivery order is available through GSA Advantage! a menu-driven database system. The INTERNET address for GSA Advantage! is http://www.gsaadvantage.gov

| Business Analyst     | • Elicit requirements using document analysis, surveys, site visits, business process descriptions, use cases, scenarios, business analysis, task and workflow analysis  
                        • Critically evaluate information gathered from multiple sources, reconcile conflicts, decompose high-level information into details, abstract up from low-level information to a general understanding, and distinguish user requests from the underlying true needs.  
                        • Proactively communicate and collaborate with external and internal customers to analyze information needs and functional requirements and deliver the following artifacts as needed  
                        • Utilize experience in using enterprise-wide requirements definition and management systems and methodologies required.  
                        • Successfully engage in multiple initiatives simultaneously  
                        • Work independently with users to define concepts and under direction of project managers  
                        • Drive and challenge business units on their assumptions of how they will successfully execute their plans  
                        • Serves as the conduit between the customer community (internal and external customers) and the software development team through which requirements flow.  
                        • Develop requirements specifications according to standard templates, using natural language.  
                        • Collaborate with developers and subject matter experts to establish the technical vision and | 2 yrs                     | Bachelor's degree       | Not Applicable         |
| CMS Solutions Architect | • Understand Client needs and strategize appropriate CMS implementation  
• Critically evaluate information gathered from multiple sources, reconcile conflicts, decompose high-level information into details, abstract up from low-level information to a general understanding, and distinguish user requests from the underlying true needs  
• Serve as Technical expert and help out in Pre-sales calls  
• Creates and conducts proposal presentations and RFP responses  
• Elicit requirements using document analysis, surveys, site visits, business process descriptions, use cases, scenarios, business analysis, task and workflow analysis  
• Proactively communicate and collaborate with external and internal customers to analyze information needs and functional requirements  
• Prepare Functional Requirements Specifications, Information Architecture, and Implementation Guide  
• Collaborate with developers and subject matter experts to establish the technical vision and analyze tradeoffs between usability and performance needs.  
• Be the liaison between the business units, technology teams and support teams. | 1 yrs | Bachelor's degree | Not Applicable |
| Creative Director/Team | • Proven designing experience  
• Possession of creative flair, versatility, conceptual/visual ability and originality  
• Demonstrable designing skills  
• Upto date with industry leading software and technologies.  
• Highly proficient in all design aspects.  
• Take the design “brief” to record requirements and clients needs  
• Schedule project implementation and define budget constraints  
• Work with a wide range of media and use graphic design software  
• Think creatively and develop new design concepts, graphics and layouts  
• Prepare rough drafts and present your ideas  
• Amend final designs to clients comments and gain full approval | 3 yrs | Bachelor’s degree | Not Applicable |
|-----------------------|------------------------------------------------------------------------------|--------|----------------|----------------|
| Project Manager       | • Project Management  
• Process Management  
• Resource Management  
• Client co-ordination and Client Management  
• Cross-functional team Management  
• Lead planning and/or implementation of projects.  
• May participate in design or testing phases.  
• Responsible for assembling the project staff for their technical or functional development.  
• Manage resource allocation for project.  
• Present oral or written reports defining plans, problems and resolutions to appropriate levels of management. | 1 yrs | Bachelor’s degree | Basic CMS Application Knowledge |
| Senior developer / Tech Lead | • Provides technical direction for the development, design, and systems integration across multiple client engagements from definition phase through implementation.  
• Applies significant knowledge of industry trends and developments to improve service to our clients.  
• Easily recognizes system deficiencies and implements effective solutions.  
• Suggests alternative technical solutions to meet client requirements more efficiently, and/or with greater reusability, and/or longer life.  
• Possesses significant knowledge of complex database concepts and ensures project teams are effectively employing appropriate database design techniques.  
• Possesses demonstrated work experience with more than one relational database management system.  
• Understands the benefits of the various programming languages and accurately suggests the use of the appropriate technology for the application.  
• Possesses significant knowledge of OO concepts and ensures they are consistently and appropriately applied in client engagements.  
• Possesses significant knowledge of client/server and internet systems architectures and accurately suggests the use of the appropriate technology for the application. | 3 yrs | Bachelor’s degree | Expert in CMS application knowledge, Programming knowledge |

</table>
| Quality Analyst          | • Clear communicator (written and verbal) – to ensure ability to write test plans and test cases. To communicate bugs to developers and other stakeholders  
  • Creative solving of technical problems – to ensure the ability translate technical requirements test plans  
  • Ability to focus on deadlines and deliverables – ensures the ability to find the bad defects and bugs quickly  
  • Ability to think abstract – to ensure ability to not conform to the norm. Norms do not find bugs quickly.  
  • Experiences in Quality Management Software and Processes  
  • Knowledge and experience in technical aspects of software solution being tested  
  • Business process understanding | 3 yrs | Bachelor’s degree | Not Applicable |
| System Administrator     | • Install new / rebuild existing servers and configure hardware, peripherals, services, settings, directories, storage, etc. in accordance with standards and project/operational requirements.  
  • Install and configure systems such as supports GIS infrastructure applications or Asset Management applications.  
  • Develop and maintain installation and configuration procedures.  
  • Contribute to and maintain system standards.  
  • Research and recommend innovative, and where possible automated approaches for system administration tasks. Identify approaches that leverage our resources and provide economies of scale.  
  • Perform daily system monitoring, verifying the integrity and availability of all hardware, server resources, systems and key processes, reviewing system and application logs, and verifying completion of scheduled jobs such as backups.  
  • Perform regular security monitoring to identify any possible intrusions.  
  • Perform daily backup operations, ensuring all required file systems and system data are successfully backed up to the appropriate media, recovery tapes or disks are created, and media is recycled and sent off site as necessary.  
  • Perform regular file archival and purge as necessary.  
  • Create, change, and delete user accounts per request.  
  • Investigate and troubleshoot issues.  
  • Repair and recover from hardware or software failures. Coordinate and communicate with impacted constituencies.  
  • Apply OS patches and upgrades on a regular basis, and upgrade administrative tools and utilities. Configure / add new services as necessary.  
  • Upgrade and configure system software that supports GIS infrastructure applications or Asset Management applications per project or operational needs.  
  • Maintain operational, configuration, or other | 4 yrs | Bachelor’s degree | Systems Administration/System Engineer certification. |
procedures.
• Perform periodic performance reporting to support capacity planning.
• Perform ongoing performance tuning, hardware upgrades, and resource optimization as required. Configure CPU, memory, and disk partitions as required.
• Maintain data center environmental and monitoring equipment.
