**Service Contract Labor Standards:** Service Contract Labor Standards (SCLS), formerly the Service Contract Act (SCA), is applicable to this contract as it applies to the entire Multiple Award Schedule and all services provided. While no specific labor categories have been identified as being subject to SCLS due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCLS eligible labor categories. If and/or when the contractor adds SCLS labor categories/employees to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS matrix identifying the GSA labor category titles, the occupational code, SCLS labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.
SIGMA HEALTH CONSULTING LABOR CATEGORY DESCRIPTIONS

Technical Program Director
Must have at least 12 years of experience with a Master’s Degree. Executive level, who leads the management and direction of client engagements, possesses expertise in project definition and systems analysis, ensures overall soundness of technical approach, and is responsible for the creation of competitive strategies and integration of technical solutions. Must be proficient in program management activities including project estimation and resource planning, risk management and resolution, and engagement execution. Maintains responsibility for formulating work standards, creating strategic client objectives, managing client issues and feedback, supervising designated resources, and overall contract progress and performance. Serves as the client's engagement manager and assumes responsibility for client communications, especially communicating technical concerns and raising awareness appropriately. Is the contractor's chief liaison and point of contact with delegated government representatives.

Technical Program Manager
Must have at least 8 years of experience with a Master’s Degree. Organizes, directs, and coordinates the planning and execution of all program-level activities. Maintains responsibility for managing technical solutions, overseeing key technical enablers, identifying technical needs, delegating appropriate resources, and helping to ensure quality assurance principles are met across projects and deliverables. Is the primary point of contact with client representatives and assumes regular interaction and communications with the delegated government representatives.

Technical Project Manager
Must have at least 7 years of experience with a Bachelor's Degree. Responsible for project-level management and direction on engagements, leading the day-to-day interaction with the client, and helping to ensure successful project management through monitoring budgets, issues, resolutions and technical implementation. Must have extensive experience in all aspects of a system's development life cycle and formulating project definition. Actively manages scope, project resources, budget activities, quality control practices, and project deliverables. Assumes responsibility for proper implementation of technical solutions and overall project performance. Serves as the primary point of contact with client and provides technical direction and experience.
Technical Architect
Must have at least 5 years of experience with a Bachelor’s Degree. Leads the design of complete enterprise-wide IT solutions which incorporate technical infrastructure, hardware, and software. Identifies necessary interfaces between enterprise solution applications and legacy IT environment. Supports all program/project planning and milestone development, business case analysis and identification of alternative solutions and resulting business impacts.

Senior Technical Analyst
Must have at least 3 years of experience with a Bachelor’s Degree. Serves as analytical resource within engagement team and assumes responsibility for contributing to work plan development, reaching engagement milestones, and often leading specific project tasks. Applies data modeling, process modeling, and software design techniques to satisfy program requirements and create project deliverables. Formulates diagnoses through financial or statistical modeling, assesses appropriate alternatives, and offers conclusions to Project Manager.

Technical Analyst
Must have at least a Bachelor’s Degree. Serves as a support technical resource on engagement team. Assumes responsibility for conducting relevant research. Actively engages consulting tools and methodologies to meet project objectives and complete program management activities. Responsible for system documentation and technical writing tasks.
